Index

Accelerated testing, 276
Adstat.exe software, 201
Alternate multiple comparison test for percentiles, 259
Analysis of variance (ANOVA), 249, 329
Anderson-Darling goodness-of-fit test parameters completely specified, 199
parameters estimated, 201

Censoring
interval censoring, 131
left censoring, 131
multiple censoring, 131
progressive censoring, 131
random censoring, 131
right censoring, 130
type I censoring, 131
type II censoring, 131
type III censoring, 132

Central limit theorem, 61
Composite matrix resins, 263
Conditional Weibull distribution, 86
Confidence limits
for a binomial proportion, 38
for a percentile base on sets of Weibull samples, 244
for the common shape parameter based on sets of Weibull samples, 239
for the location parameter, 305
for the mean of an exponential distribution, 149
for the mean of a normal distribution, 61, 63
for the mean value of an estimator using simulation, 134
for the reliability at a specified life, 218
for the stress-life exponent in Weibull regression, 281
for the variance of a normal distribution, 64
for the Weibull scale parameter, shape parameter known, 155
for the Weibull shape parameter and a percentile, 163

Control charts, 109
Covariate, 277

Decomposition method, 17

Disk operating system (DOS) programs
LOCEST.exe, 306, 312
REGEST, 291, 297
TWOWAY, 320, 324, 332
Weib.exe, 160
WEIBEST.exe, 253, 297
Weibsam.exe, 93

Distributions
  beta, 89, 136
  binomial, 34, 40
  chi-square, 64, 148, 155–156, 253, 257, 296
  exponential, 51, 126, 147
  geometric, 41, 123
  lognormal, 66, 206
  normal, 54
  Poisson, 36, 39, 40, 127
  Rayleigh, 109
  right triangular, 45
  standard normal, 55
  type I distribution of smallest extremes, 84
  uniform, 52
Doubly exponential distribution, see Distributions, type I distribution of smallest extremes

Eccentricity, 109
Empirical distribution function (EDF), 136, 195

Estimation
  bias, 132
  interval, 130
  point, 130
  precision, 132
Euler’s constant, 85

Events, 2
  elementary events, 3
  independent events, 8
  intersection of events, 6
  mutually exclusive events, 2
  odds of an event, 4
  union of events, 3
  Venn diagram depiction, 3
Experiment-wise error rate, 258

Factorial experiments, 313
Factors, 235, 276, 313

Gamma function, 78
Gauss-Markov theorem, 68, 137
Goodness-of-fit tests, 161, 195
Guarantee time, see Location parameter
Harmonic mean, 260
Hazard paper, 141

Hazard plotting, 144
Heteroscedasticity, 84
Homogeneity of variance, 235
Hypothesis testing
  alternative hypothesis, 184
  for a Weibull percentile, 185, 221
  for the Weibull shape parameter, 188, 223
  null hypothesis, 184

Inclusion-exclusion principle, 6, 19
Incomplete gamma function, 87
Inference on $P(Y < X)$, 266
Information matrix, 170
  local information matrix, 170
  observed information matrix, 171
Interaction, 316

Jointly distributed random variables, 28, 32, 51
  conditional expectation, 32, 51
  correlation coefficient, 30, 51
  covariance, 30, 51
  marginal distributions, 28
Kaplan-Meier plotting position, 143
Kolmogorov-Smirnov goodness-of-fit test
  parameters completely specified, 195
  parameters estimated, 198

Law of total expectation, 33–34, 104
Law of total probability, 9–11, 16, 18, 103
Least significant ratio (LSR), 258, 266
Levels of a factor, 235, 276, 314
Likelihood function, 146, 169
Likelihood ratio test, 252, 282
Linear regression, 67, 138
  estimation of slope and intercept, 68
Location parameter, 73, 140, 298
LocationPivotal.exe software, 309, 312
