Introduction ................................................................. 1
   About This Book ................................................................. 1
   Foolish Assumptions ............................................................. 2
   Icons Used in This Book ...................................................... 3
   Beyond the Book ............................................................... 3
   Where to Go from Here ....................................................... 4

Part I: Getting Started with Business Analysis ............... 5

Chapter 1: Business Analysis in a Nutshell ................. 7
   Defining Business Analysis ................................................... 7
   Knowing Your Role in the Basic Business Analysis Lifecycle ......... 8
   Looking at the Value of Business Analysis .................................. 11
   Considering the Skills of a Successful BA .................................. 13
      Outstanding communication ............................................ 13
      Detailed research, analysis, and recording ......................... 13
      Time management and information organization .................. 14
      The ability to see the big picture ....................................... 14
      Customer-focused and value-driven perspective .................. 15
      A large BA toolkit ....................................................... 15
      Flexibility ........................................................................ 15
   Getting to Know the IIBA BABOK ......................................... 16
   Pursuing Business Analysis Certification ................................ 17

Chapter 2: Breaking Down the Different Levels of Business Analysis ............................................. 19
   Checking out an Overview of the Levels ................................. 20
   Going to the Top: The Enterprise Level .................................. 21
      Doing business analysis activities at the enterprise level .......... 22
      Overcoming challenges at the enterprise level ....................... 23
   Moving to the Organizational Level ....................................... 23
      Fulfilling duties at the organizational level .......................... 24
      Dealing with organizational-level obstacles ......................... 25
   Drilling Down to the Operational Level ................................. 26
      Knowing your tasks at the operational level ......................... 26
      Taking on operational-level challenges ............................... 27
   Getting a Handle on the Project Level .................................... 28
      Tackling activities at the project level .................................. 28
      Rising above project-level hurdles ................................. 29
Chapter 3: Identifying and Working with Stakeholders ............ 31

Reviewing a Who’s Who of Potential Project Participants ............ 32
Starting at the top with management ........................................ 32
Seeking subject matter experts .............................................. 34
Adding project support personnel .......................................... 36
Turning to technical personnel ............................................ 37

Identifying the Stakeholders in Your Project ............................. 39
Find your stakeholders .................................................... 39
Using the RACI matrix ..................................................... 41

Playing (and Communicating) Well with Others ........................ 42
Targeting your communication to the various stakeholders ...... 42
Using active listening to your advantage ................................ 45
Overcoming common barriers to effective communications ...... 45
Understanding and responding to verbal and nonverbal messages ................................................................. 46

Fostering Strong Relationships ............................................. 48
Building trust and respect .................................................. 48
Generating consensus/gaining buy-in ..................................... 49

Part II: The BA Toolkit: Tools, Terms, and Techniques .... 51

Chapter 4: Talking about Tools of the Trade ......................... 53

Examining Communication Tools for Every Situation .............. 54
Talking about your options .............................................. 54
Choosing the right communication tool ................................ 56

Trying Collaboration Tools .................................................. 57
Physical places ................................................................ 58
Electronic places .......................................................... 58

Investigating Innovation and Idea Capture Tools .................... 59
Looking at the technology spectrum .................................... 60
Considering specific features ............................................ 61

Discovering Definition Tools ............................................... 62
Textual definition tools .................................................. 62
Modeling and diagraming tools ......................................... 62
Prototyping and simulation tools ....................................... 64

Reviewing Requirements Management Tools .......................... 64
Low- and mid-tech options .............................................. 65
High-tech options ......................................................... 66

Picking the Right Tools for the Situation ............................... 66
Inventorying the situation you have now ............................... 66
Determining what situation you need later ............................ 67
Avoiding unnecessary tools and features .............................. 69
Money, money, money: Facing budget challenges .................. 69
Preparing Team Members for Change ................................. 70
# Table of Contents

## Chapter 5: Understanding What Requirements Truly Entail ............ 73
- Defining Needs ........................................................................................................... 73
  - Business needs ......................................................................................................... 74
  - Stakeholder needs ..................................................................................................... 76
- Defining Requirements .................................................................................................. 77
  - Business requirements ............................................................................................... 80
  - Stakeholder requirements .......................................................................................... 80
  - Solution requirements ................................................................................................. 82
  - Transition requirements ............................................................................................. 84
  - Technology requirements ........................................................................................... 85
- Making Your Requirements Excellent ........................................................................... 86
  - Complete ....................................................................................................................... 87
  - Correct ................................................................................................................................ 87
  - Unambiguous ................................................................................................................ 87
  - Verifiable ........................................................................................................................ 87
  - Necessary ....................................................................................................................... 88
  - Feasible .......................................................................................................................... 88
  - Prioritized ...................................................................................................................... 89
- Focusing on the Four Core Components ........................................................................... 89
  - Data ................................................................................................................................ 90
  - Process (use cases) ........................................................................................................ 92
  - External agents and actors .......................................................................................... 93
  - Business rules .............................................................................................................. 94

## Chapter 6: Hunting for the Right Information, Part 1: The Process ... 97
- Elicit, Don’t Gather: Developing the Right Questions .................................................. 98
  - Identifying the type of question you want to ask ....................................................... 98
  - Identifying appropriate sources of information ....................................................... 103
- Choosing an Approach .................................................................................................. 105
  - Using Clear, Consistent Language ............................................................................. 107
  - Choosing terms consistently ..................................................................................... 108
  - Using language that’s consistent with the company’s language............................ 108
  - Framing questions that clearly reveal core needs ..................................................... 109
- Planning Your Elicitation Sessions ............................................................................... 110

## Chapter 7: Hunting for the Right Information, Part 2: The Techniques ................. 113
- Starting with Document Analysis .................................................................................. 113
  - Understanding the benefits of document analysis .................................................... 114
  - Perusing examples of documents you can review .................................................... 115
- Looking Out for Observation ......................................................................................... 118
  - Knowing when to use observation .............................................................................. 118
  - Choosing your observation method and completing the process .................................. 119

Part III: Selling the Plan and Keeping It on Track...... 161

Chapter 9: Making the (Business) Case ......................... 163

Before You Dive In: Breaking Down Business Case Basics .......... 163
Looking at the benefits of writing a business case ..................... 164
Playing to the crowd: Knowing your audience ......................... 165
Following basic business case structure ................................... 166
Defining and Presenting the Opportunity ................................. 167
Executive summary .................................................................... 168
Mission statement....................................................................... 169
Description of the approach used .............................................. 171
Justifying the Recommendation ............................................... 172
Identifying and prioritizing alternative solutions ..................... 172
Including a cost/benefit analysis .............................................. 174
The Devil Is in the Details: Providing Supporting Materials .......... 180
Addressing supporting documentation ..................................... 181
Noting your assumptions ....................................................... 182
Documenting risk ..................................................................... 183
Presenting the Business Case ..................................................... 183

Chapter 10: Creating and Maintaining Scope ...................... 185

Making Sure You’re Scoping the Right Solution ..................... 186
Recognizing Relevant Stakeholders ........................................ 186
Uncovering stakeholders by asking project-specific questions .... 187
Discovering key stakeholders in different parts of the organization .......................................................... 188
Ensuring That the Scope Aligns with Key Business Drivers ........ 188
Identifying Interfaces That Are Part of the Project .................... 191
User interfaces .......................................................................... 192
System interfaces ...................................................................... 192
Hardware interfaces ................................................................... 193
Defining Scope with a Data Flow Diagram ................................ 193
Identifying parties and systems that will be impacted by the project .......................................................... 195
Identifying information (data) flows among the parties or systems ......................................................... 195
Gaining consensus on the scope for the project ....................... 196
Giving the project a descriptive name ...................................... 197
Finalizing the scope diagram .................................................... 197
Using Project Initiation Documentation to Clarify Scope ............ 198
Stating the purpose of the project ............................................. 198
Describing the project approach or methodology ..................... 199

</table>
Documenting transition requirements ............................................ 247
Documenting technical requirements ............................................. 247
Ensuring Your Requirements Have Traceability ............................. 248

Chapter 13: Defining Solutions, Part 2: Choosing the Right Analysis Technique ........................................ 251
Dealing with Data Flow Diagrams and External Interaction Textual Templates ............................................ 252
  Getting a handle on data flow diagrams ........................................ 252
  Examining the external interaction textual template .................... 254
ERD Is the Word: Using Entity Relationship Diagrams ...................... 255
  Getting familiar with the ERD .................................................... 255
  Presenting the data with entity relationship text templates ....... 257
  Rounding out the data: Entity text templates ........................... 257
Drilling Down a Process Decomposition Diagram ..................... 258
  Step 1: Creating the process decomposition diagram ............. 260
  Step 2: Documenting the processes .......................................... 261
Deciding on Decision Tables .......................................................... 262
Working with Workflow Diagrams .................................................... 264
  Decoding diagram symbols ................................................... 265
  Creating a workflow diagram ................................................ 266
  Seeing a diagram in action: An example ................................. 267
Making a Use Case Model ................................................................. 268
  The graphic: Use case diagram .............................................. 269
  The text: Use case description ............................................. 271
Prototyping .................................................................................... 274
  Familiarizing yourself with mockup basics .............................. 276
  Creating mockups ................................................................. 278
Keeping It Brief with User Stories .................................................. 280
  Creating user stories .............................................................. 281
  Confirming user stories .......................................................... 281

Chapter 14: Verifying and Validating Solutions .............................. 283
Getting a Handle on Testing Basics .................................................. 283
  Differentiating between verification and validation .............. 284
  Making testing an ongoing activity ........................................... 284
Verification Testing: Confirming You Built the System Right ........ 286
  Smoke test ................................................................. 286
  Unit test ................................................................. 286
  Integration test ............................................................. 287
  System test ................................................................. 288
Validation Testing: Making Sure You Built the Right System ........... 290
  Utilizing a usability test ...................................................... 291
  Getting users involved with a user acceptance test ............ 293
  Receiving feedback with a post-implementation user assessment ......................................................... 294
Preparing for the Test ................................................................................. 295
Creating test cases .................................................................................. 296
Putting together the verification and validation plan ................... 297
Conducting a Requirements Review ......................................................... 302
Conducting a step-by-step review of the artifact .................................. 303
Recruiting participants ..................................................................... 304

Chapter 15: Transition: Moving from Planning to Implementing . . . 307
Preparing for the Transition ................................................................. 307
Transition requirements: The basics .................................................. 308
Reviewing the requirement components ........................................ 308
Assessing organization readiness .................................................... 309
Fostering stakeholders’ motivation and competence ................... 310
Rolling Out Your Strategy with the Right Approach ..................... 312
Trying parallel processing ................................................................. 313
Picking piloting ................................................................................... 313
Selecting single cutover .................................................................... 314
Examining the Components of Your Rollout Plan ....................... 315
Turning Your Solution Over to Operations ....................................... 317

Part V: The Part of Tens ................................................................. 319

Chapter 16: Ten Ways to Keep Your Business Analysis Skills Sharp ................................................................. 321
Participate in Social Media ................................................................. 321
Network with Peers ............................................................................ 322
Get/Be a Mentor .................................................................................. 323
Leverage Peer Reviews ........................................................................ 323
Attend Formal Training ......................................................................... 324
Present on Business Analysis Topics .................................................. 324
Read Books (Like This One!) ............................................................... 325
Have Lunch with Business Partners .................................................... 325
Rotate to Multiple Business Domains or Applications .................. 326
Use Business Analysis Techniques at Home .................................. 327

Chapter 17: Ten Ways to Prepare Yourself for a New Project . . . 329
Hit the Ground Running and Get Up to Speed .................................. 329
Clear Your Calendar and Your To-Do List ........................................ 330
Take a Vacation! .................................................................................. 330
Get Organized ....................................................................................... 331
Identify What’s Been Done So Far ..................................................... 332
Color in the Solution ........................................................................... 332
Define Everyone’s Roles, Responsibilities, and Deadlines .......... 333
Table of Contents
