Codd, R. Trent, III, 124–125
Cognitive behavior therapy (CBT): accreditation for, 80–81; for anxiety disorders, 102–109; CTS for, 9; for depression, 97–102; in European Union, 5; evidence-based practices in, 207–223; face validity of, 18; limited-exposure, 8–9; longer-duration, 9; Low Intensity movement, 184; NICE guidelines for, 184; nontraditional providers for, 14–15; novices, 14; for personality disorders, 109–112; pharmacotherapy and, as natural combination, 155–156; in primary care settings, 194; for psychotic mental illnesses, 116–118; public health policy as influence on, 5; self-management through, 246–252; for
substance abuse, 113–116; theory of, 9; training processes compared to, 17. See also Nontraditional care providers; Training, for CT/CBT

Cognitive behavior therapy (CBT) supervisors, training for: ACT guidelines for, 227; basic components of, 231–237; case formulation in, 231; competency evaluation in, 229; competency guidelines, 239–240; duration of supervision in, 232; EABCT guidelines for, 227, 239; expectation setting in, 228; feedback in, 232–233, 237; goal setting in, 228; under HIPPA, 239; instruction methods, 233–234; interfering beliefs and, 238; language barriers in, 238; learning delivery systems in, 234–236; learning exercises for, 240–241; noncompliance and, 239; patient material supervision in, 231–232; problems in, 237–240; scoring in, 232–233; skills development in, 237; structure of, 229; supervisory experience, 227–231; work samples in, 230–231

Cognitive distortions, 251

Cognitive errors, 102

Cognitive model: for hallucinations, 118; for negative bias, 99–101; for psychotic mental illnesses, 117; of relapse, 113–114

Cognitive therapy (CT): for depression, 2, 160; historical roots of, 1–6. See also Cognitive behavior therapy; Training, for CT/CBT

Cognitive Therapy and the Emotional Disorders (Beck, A.), 2, 145

Cognitive Therapy of Depression (Beck, A./Rush/Shaw/Emery), 2

Cognitive Therapy Rating Scale (CTS): ACT and, 73; agenda setting in, 75; behaviors in, 78–79; for CBT, 9; change strategies in, 79; cognitions in, 78–79; cognitive behavioral techniques and, 79–80; collaboration in, 77; competence measures with, 73–80; in CT/CBT training, 14, 167, 195–196; development of, 2; feedback in, 75–76; guided discovery in, 78; homework as part of, 80; interpersonal effectiveness in, 76–77; interrater reliability in, 74; pacing in, 77–78; scoring key for, 74–75; for therapists seeking CBT training, 167; time use in, 77–78; understanding in, 76

Cognitive Therapy Rating Scale-Children and Adolescents (CTRS-CA), 229

Cognitive Therapy Rating Scale-Revised (CTS-R), 14, 73, 167

Collaboration: in CTS, 77; in skill acquisition, 71; with supervisors, 212

Compassion fatigue, 244

Competence measures: for accreditation, 80–81; with ACCS, 69; assessment instruments, 68–69; case conceptualization assessment, 67; in CBT supervisor training, 239–240; with CTS, 73–80; through CTS-R, 167; data sources of, 67; for declarative knowledge, 69–70; evaluation measures, 68–70; in lifelong learning, 71–72; outcomes and, 70–71; for procedural knowledge, 69–70; in training assessment, 71–72; training efficiency and, 68

Competency. See Core competencies

Competent therapists, 19
Conceptualization, function of, 219
Confirmation bias, 54
Confirmatory feedback, 49
Consent documents, for recording sessions, 72–73
Contingent praise, 62n3
Continuing education units (CEUs), 163–166
Coping cards: for depression, 99–100; for worry, 108
Core competencies: agenda setting as, 213–214; BABCP and, 28–29; basic, 27–28; in closed environments, 26; cognitive and behavioral, 28; content of, 26; criteria for, 3; defined, 26; delineating of, 18; demonstrating as, 214; discussion skills, 214; essential, 30–31; evaluation as, 214–215; existing frameworks for, 26–28; feedback as, 215; formulation of presentations, 215–216; generic therapeutic, 27; in graduate training, for CT/CBT, 139–140; under IAPT, 27, 139; improved measurements of, 18; listening as, 216; Miller’s Pyramid for, 19; in national health systems, 26–27; observation, 216; operationalization of, 5; prompting, 216–217; questioning, 217; recording sessions for, 72–73; SAGE measurements for, 209–218, 220–223; self-assessment tools as part of, 27; skill acquisition methods, 31–34; for supervision, 209–218; teaching, 217–218; teaching methods for, 31–34; training as, 218; in United Kingdom, 26–29. See also Competence measures
Counseling psychology, training for, 6
Credentialing, for CBT training, 163–165; through ACT, 164–165; through BABCP, 164–165

Scapegoating, 248
Schizophrenia, 145
Self-management, in CBT training and supervision: automatic thoughts, 251; BABCP guidelines for, 258; background stressors and, 250; behavioral reactions and, 252; belief systems and, 248, 250–251; for burnout, 243–244; CBT therapy in, 246–252; with chronic depression, 248; cognitive distortions and, 251; compassion fatigue, 244; for depression, rates of, 245; DTR for, 247; for emotional exhaustion, 243–244; emotional reactions and, 252; with emotional self-scanning, 247; inadequate self-care and, reasons for, 244–245; interventions for, 254–258; learning exercises for, 259–261; long-term implications for, 254–258; models for, 252–254; organizational factors in, 258; scapegoating and, 248; with SP/SR, 249; for stress, 245; suicide ideation and, 244; for therapist distress, 244–246, 250, 252; trigger situations and, 249–250; in United Kingdom, 255
Self-practice/self-reflection (SP/SR) method, 138–139; in self-management, 249; in supervision, 210
Self-reflection: CT/CBT training through, 15, 176–177; as skill, 34; in summative feedback, 88; for therapists seeking CBT training, 176–177
Shaming, feedback as, 88
Shaw, B. F., 2
Skating, 42
Skill acquisition: agenda setting, 5, 71; in CBT supervisor training, 237; coaching, 31; collaboration, 71; as core competency, 31–34; Dreyfus model, 92; empathy, 71; through experiential learning, 31; through feedback, 31, 86–87; open skills training, 32; through role-play, 32–34; self-reflection, 34; through Socratic questioning, 31; for therapists seeking CBT training, 173, 175–177; through working memory, 85
Social phobias, 106–107
Socratic questioning: for delusions, as therapy strategy, 117; for depression therapy, 101; skill acquisition through, 31
Sokol, Leslie, 73
SP/SR method. See Self-practice/self-reflection method
SRS. See Student Response Systems
Standardized patients, training with, 14
Store-and-forward approach, 121–122
Stress: background sources of, 250; reduction of, for hallucinations, 118; self-management strategies for, 245
Student Response Systems (SRS), 123
Study manuals, for therapists seeking CBT training, 177
Substance abuse: anti-anxiety techniques for, 114–115; cognitive model of relapse, 113–114; conceptualization of, 113–114; CT/ CBT training for, 113–116, 196; drug-related beliefs and, 114; permission-giving beliefs and, 115–116; role-play strategies for, 116; therapeutic strategies for, 114–116
Suicide ideation, 244
Summative feedback, 87–89; functions of, 88; minimizing threat with, 88–89; self-reflection as part of, 88
Supervision: best practices for, 15–16; competency evaluation for, 229; competency-based, 209–218; CT/ CBT training through, 9–10, 15, 17; didactic information and, 210; evidence-based practice, in CBT, 207–223; through experiential learning, 218–220; feedback and, 59; group, 236–237; individual, 236–237; Jabber application for, 122; learning exercises for, 220–223; management by, 212–213; micro-competencies and, 219–220; models, 18; models for, 210–211; SAGE measurements, 209–218, 220–223; with SR/SP exercises, 210; store-and-forward approach to, 121–122; structure of, 229; synchronous, 122; Teachscape for, 122; technological applications for, 121–122; Tegrity for, 122. See also Self-management, in CBT training and supervision
Supervision: Adherence and Guidance Evaluation (SAGE) measurements, 209–218, 220–223; nature of relationships under, 211
Supervisors, 18; collaborations with, 212; evidence-based practice for, in CBT, 207–223; facilitation skills for, 213; nature of relationships with, 211; relating for, 212. See also Cognitive behavior therapy supervisors, training for
Swivl, 60–61
Synchronous supervision, 122
TAGteach. See Teaching with Acoustical Guidance
Teachers’ Process Evaluation of Training and Supervision (PETS) method, 136–138
Teaching, as core competency, 217–218
Teaching with Acoustical Guidance (TAGteach), 59–60; feedback delivery in, 59
Teachscape, 122
Technology, for CT/CBT training: destruction of multimedia, 128; ethical contexts for, 125–128; under HIPPA, 125–128; under HITECH Act, 126–128; informed consent and, 129; for instruction methods, 122–125; legal contexts for, 125–128; professional association guidelines, 125–126; reliability issues, 129; for supervision, 121–122; Tegrity, 122; transmission quality and, 128; updates to, monitoring strategies for, 129–131
Tegrity, 122
Therapist distress. See Distress, among therapists
Therapists: advanced beginner, 19; case managers as, 14; competent, 19; developmental stages for, 19; distress among, 244–246, 250, 252; expert, 19; novice, 14, 19; nurses as, 14; occupational, 14; palliative care workers as, 14; postdoctoral fellowships for, 163; proficient, 19. See also Client-therapist relationships
Therapists, CBT training for: breadth of, 164; certification from, 163–166; CEUs, 163–166; clinical consultation as part of, 176; comprehensive nine- to twelve-month programs, 162–163; through continuing education, 161–162; costs of, 164–165; credentialing from, 165–166; CTS and, 167; CTS-R and, 167; demonstrations in, 175; design considerations for, 172–177; didactic methods in, 168, 174–175; effectiveness of, 166–170; evaluation of, 166, 173–174; evolution of, 160; expertise of trainers, 165; framework for, 173; through full-time postdoctoral fellowships, 163; handouts as part of, 177; intensive, 167–169; knowledge measurement in, 177; learning exercises in, 178–179; length of, 164; manuals as part of, 177; modeling in, 175; motivating factors for, 161; options for, 161–164; organization of, 164–165; patient outcome measurements in, 170; personal application as part of, 176–177; through PESI, 161; postgraduate diplomas, 163; review of studies, 170, 172; self-practice in, 176–177; self-rating skills, 167; self-reflection in, 176–177; short-term, 166–167; skill development as part of, 173; skill measurement in, 177; skills practice in, 175–176; for specific disorders, 168, 170; supervision in, 176; time commitment for, 164–165; training methods in, 165, 174–177; through workshops, 161–162
TouchCast, 124
Tourette’s Syndrome, 16
“Train and hope” strategy, 18, 187
Trainees: feedback issues for, 90–92; lifelong learning for, 92–94; online resources for, 90–91; problematic, 90–92; skill deficits in, 90
Trainers, 18; credentials of, 165; expertise of, 165
Training: for clinical psychology, 6; as core competency, 218; for counseling psychology, 6; didactic, 152–153, 210–211; gold standard of, 6; for resident psychiatrists, 6; for social work, 6; for supervisors, 18; for trainers, 18. See also Cognitive behavior therapy supervisors, training for; Graduate training; Psychiatry residency training; Therapists, CBT training for
Training, for CT/CBT: at AABT conferences, 4; by ABCT, 4, 7–8; active learning during, 187; agenda setting in, 5, 71; alternatives approaches for, 11, 20; for anxiety disorders, 102–109; application range of, 16–17; at BABCP conferences, 4, 7–8; behavioral activation in, 98–99; best practices for, 15, 198–203; case supervision in, 187; CBT processes compared to, 17; for certifications, 10, 12–13; classification of, 8–10, 12–13; for client-therapist relationships, 5; clinical consultations in, 192; through clinical practice, 15; common pitfalls in, 198–203; competence measures in, 71–72; for core skills, 5; credentialing for, 163–164; CTS in, 14, 167, 195–196; CTS-R in, 14; for delusions, 16; for depression, 97–102; developmental stages for, 19; for diplomas or degrees, 10–13; dosage and, 14; by EABCT, 4; effectiveness of, 13–15; in European Union, 5; evidence-based practice in, 13, 15–16, 193–197; within existing professional training, 6–8; through experiential learning, 15; for feedback, 5; follow-up as part of, 187; future directions for, 19–20; goal setting in, 5; gold standard of, 6; guided reading in, 192; for hallucinations, 16; handouts in, 192; intensive, 10–13; for irritable bowel system, 16; key components of, 189; length of, 186–187; for limited-exposure CBT, 8–9, 11; literature for, 5–6; for longer duration, 9; for mental health technicians, 185, 194–196; methods of, 189–190; models for, 18, 190; modes of, 20; in national health systems, 26–27; in New Zealand, 160; for nontraditional care providers, 185–193; with nontraditional methods, 11, 20; for personality disorders, 109–112; pharmacotherapy and, 2; postgraduate, 7–8; for psychotic mental illnesses, 116–118; range of professionals, 16; in real-life settings, 14; reflexivity in, 17; review of, 8–10, 12–13; role-play in, 190; through self-reflection, 15; with standardized patients, 14; for substance abuse, 113–116, 196; through supervision, 9–10, 15, 17; for Tourette’s Syndrome, 16; “train and hope” strategy, 18, 187; in United Kingdom, 7–8, 13, 160; in U.S., 3–5; by World Health Organization, 5. See also Cognitive behavior therapy supervisors, training for; Core competencies; Graduate training; Psychiatry residency training; Self-management, in CBT training and supervision; Technology, for CT/CBT training; Therapists, CBT training for Training efficiency, 68 Treatment manuals, 153
