surface layer scaling 289–99
surface mixing cloud 130
surface, net radiation at 62–3
system signature of precipitation 187–8, 189
of storm 176
Taylor expansion 235
Television Infrared Operational Satellite (TIROS) Operational Vertical Sounder (TOVS) instruments 172
terrestrial radiation 48–65
net radiation at surface 62–3
Theissen method 200, 202–3, 204, 207
thermal conductivity of soil 69, 70
thermal diffusivity of soil 69, 71
thermozone 116
thermoelectric pyranometers 78–9, 79
thermohaline circulation 118
thermosphere 5
time-average of weather, climate as 1–2
time-domain reflectometer sensors 91
time rate of change in a fluid 232–4, 233
tipping bucket rain gauge 157, 161–2, 162
TOP model 370
topography, effect of, on convection and precipitations 383–5
TOVS precipitation estimate 172
Trade Winds 112
transformational distributions 193
transmissivity 51
Triangle method 200, 202, 203
Tropical Rainfall Measuring mission (TRMM) 173
tropical storms 119–20, 120
troposphere 5
turbulence, atmospheric advective and turbulent fluxes 225–9, 227–9
averaging of decomposed variables 217–19
kinematic flux 223–4, 225
linear correlation coefficient 221–3, 223
mean and fluctuating components 216–17, 217, 219
measures of strength of signature and spectrum of 213–16, 214, 215
turbulent flux 223
turbulent closure 279–80
local 280
local, first order 281–2, 282, 287–8
low order 280–1
nonlocal 280
turbulent eddies 85–7, 87, 214, 214, 223, 225–9
divergence 250
turbulent flux see turbulent eddies

weather prediction 98–100

Wein’s Law 50
wet bulb depression 23
wet bulb equation 23
wet bulb temperature 22, 23
wetting errors 157
