One-off events, probability of. See Belief-type probability
Operational risk
  capital charges and, 525–526
  loss events vs., 517, 519
  managing and mitigating, 513–514, 527
  market risk/credit risk vs., 515
  measuring and modeling losses, 523–526
  overview, 183–184, 514–519
  sources and types, 519–523
Operations/middle office (risk management group), 89
Opportunity, capitalizing on, 6, 8, 16, 530
Options, embedded, 70–71, 111
Orange County, CA trading loss (1994), 104, 110–111, 114, 127
“Order of Magnitude Physics” (Sanhoy, Phinney, and Goldreich), 138–139
OTC (over-the-counter) transactions, 106, 115, 181, 379, 509
Other mapping/binning, 210, 215–216
Overconfidence, problem of, 62–65, 172

P&L (profit and loss) distribution
  ambiguity of, 140, 142–143
  and asset liquidity risk, 494–496
  asset/risk factor mapping, 210–216
  as basis for financial risk management, 7, 139–141, 178, 223–224
  constructivist vs. market approach, 382–383
  and costs of liquidation, 483, 484–488
  and credit risk, 377–378
day-by-day P&L, 482–483
  location and scale (dispersion), 188
  and operational risk, 515, 519–523
  and risk factor distribution, 144–146, 216–219, 244
  sources of variability, 8, 16–21, 207
  and static credit risk modeling, 410
time scaling, 149–150, 200–202
  volatility and VaR and, 143–149, 199–200
  when comparing securities or assets, 155–156
Paradoxes, and ambiguity, 58–62
Parametric approach/parametric distribution
  asset-to-risk-factor mapping, 271
  historical and Monte Carlo approaches vs., 224–225
  modeling, 220–221
  overview, 154, 216–217
P&L distribution estimates, 273–274
Parametric approach (Continued)
  risk factor distribution, 272–273, 307–310
  second derivatives, 262–267
  tail events, 291–296
  volatility and VaR, 205–206, 223, 278–281
Partitioning, 327, 361–362
Past/future asymmetry, 36–37
Pentagon Papers, 60
Physical measure/actuarial approach to risk pricing, 459–460
Poisson distribution, 444, 479
Poisson mixture models, 446–449, 455–456
Poisson random variable, 430–432
Popper, Karl, 47–48
