Acceptance and commitment therapy (ACT), 120, 124–125, 127, 220, 221
Addiction, 18–19. See also Substance use/abuse
Adrenaline. See Epinephrine or adrenaline
Adult Attachment Interview (AAI), 83–84
Aging:
  brain health importance during, 34–35, 36, 38, 39, 40, 42, 45–46
dementia associated with (see Dementia) diet and nutrition during, 40, 42, 45–46
  memory development based on, 65
  social support/relationships impacting effects of, 34–35
stress accelerating, 110
Ainsworth, Mary, 82
Alcohol abuse. See Substance use/abuse
Amygdala:
in autostress disorders, 93–96, 100–102, 103–106
  brain hemispheres of, 12, 118
in depression and depressive disorders, 205, 207, 215
diet and nutrition impacting, 43, 114
  emotions activating, 11, 94
  fight, flight, or freeze response through, 70, 73
in focalized anxiety and anxiety disorders, 129, 132–133, 135–136, 137–140, 145
in generalized anxiety and anxiety disorders, 114, 118, 121–123
  genetic variances related to, 94–95
  hippocampus relationship to, 72, 86
neuroplasticity in, 70
in OCD, 186, 188–190, 194, 196
  orbitofrontal cortex connection to, 13–14, 71, 79, 95–96, 114, 153, 188–189
  social/therapeutic brain networks including, 22, 36, 79
Anterior cingulate cortex (ACC):
  in depression and depressive disorders, 208, 210–211, 219
  in focalized anxiety and anxiety disorders, 138
  in generalized anxiety and anxiety disorders, 122, 124
  in OCD, 187
  in PTSD, 154, 157, 162
  social/therapeutic brain networks including, 22, 35, 79
  stress impacting, 105
Anterior prefrontal cortex, 15
Antianxiety medication, 118–119, 155, 158, 165, 171, 198
Antidepressant medication, ix, xi–xii, 202
Anxiety and anxiety disorders:
  acceptance and commitment therapy for, 120, 124–125, 127
  acceptance concept for, 127, 128, 146, 159, 180
  anxiety sensitivity as risk factor for, 144–145
  attachment relationship to, 83
  autostress disorders as, 91–111
  breathing retraining for, 114–117, 148
Anxiety and anxiety disorders (continued)
depression relationship to, 101, 104, 105, 106, 108, 144, 205–207
diet and nutrition as buffer against, 40–41, 42, 43, 44, 114, 153, 172
emotion and brain hemispheres impacting, 10–13
exercise as buffer against, 38–39, 144, 153, 157, 165
fight, flight, or freeze response in, 70, 73, 92, 99, 101, 146
focalized, 129–148
gender differences in, 143, 151, 188
gen-environment interaction in, 2–3
generalized, 113–128
hippocampus role in, 104–107, 161–163, 167, 169, 173–175, 188, 190, 194
historical approaches to, x
labeling affective states in, 125, 128, 138, 140
medication for, 118–119, 155, 158, 165, 171, 198
memory relationship to, 69, 70, 72–74, 76–87, 103, 105, 107, 150, 157–177, 188–189
neuroplasticity impacting, 4–10
neuroscience applications for, 1–31
obsessive-compulsive, 69, 106, 183–199
orbitofrontal cortex role in, 95–96, 114, 121–122, 124–126, 153–154, 186–190, 194
panic disorder as, 10, 106, 113, 129–130, 132–133, 140, 143–148
parasympathetic nervous system in, 97–100, 109, 113, 116–117
sleep relationship to, 57, 108, 153, 173–175, 176–177
sympathetic nervous system in, 97, 100, 109, 113, 116–117, 129, 145
Assessment:
of attachment, 83–84
of depression, 37
of explicit memory capacity, 159–165
of OCD, 185, 191
for PTSD, 151–152
Assessment instruments:
Adult Attachment Interview (AAI), 83–84
Beck Depression Inventory, 37
Galveston Orientation and Amnesia Test, 160
Subjective Units of Distress Scale (SUDS), 8, 172, 191
Westmead PTA Scale, 160
Yale-Brown Obsessive-Compulsive Scale (Y-BOCS), 185
Attachment:
Adult Attachment Interview on, 83–84
anxious/ambivalent, 82, 83–84
avoidant, 82, 83–84
disorganized, 82, 83–84
memory development and, 80–85
secure, 82–83
stress response impacted by, 97–98
theory of mind influenced by, 84–85
Attention:
default mode vs., 219–220
diet and nutrition impacting, 42
memory relationship to, 63, 64, 85
neuroplasticity and, 9–10
OCD treatment strengthening of, 188
prefrontal cortex role in, 14, 15, 63, 85
somatic therapy reorientation of, 175–177
stress impacting, 103
Attention-deficit hyperactivity disorder (ADHD), xiii, 15

Autism spectrum disorders, 84

Autonomic nervous system. See Parasympathetic nervous system; Sympathetic nervous system

Autostress disorders:
allostatic load in, 99–100, 102–108, 109–111
amygdala role in, 93–96, 100–102, 103–106
brain-based therapy for, 91–111
cortisol role in, 99, 100–101, 102–111
depression relationship to, 101, 104, 105, 106, 108
fight, flight, or freeze response in, 92, 99, 101
hippocampal function in, 104–107
orbitofrontal cortex role in, 95–96
overview of, 91
parasympathetic nervous system role in, 97–100, 109
prefrontal cortex role in, 92, 95–96, 100–102, 103–104, 105–106
psychoneuroimmunological interface in, 108–111
resiliency in, 100
social triggers and responses in, 97, 98
stress cortisol cascade in, 104, 105–106
stress defined for, 98–99
sympathetic nervous system role in, 97, 100, 109
top down and bottom up theories on, 91–102

Dia

Dorsolateral prefrontal cortex (DLPFC): education, 161

Education:

client psychoeducation as, xiv–xv, 1, 2–31, 152–153

Emotions:

brain hemispheres and, 10–13, 24, 25–26, 77, 96

emotional memory, 68–70, 72–73, 75, 77–80

facial expression of, 22, 25–27, 36, 78–80, 93, 98, 121

James-Lange theory of, 92

labeling of, 125, 128, 138, 140, 221

orbitofrontal cortex role in, 12, 13–14, 22

PTSD and equilibrium of, 152, 166–169

Schacter-Singer two-factor theory of, 140

secondary, 166

sleep relationship to, 58

social/therapeutic brain network activation of, 21–25, 33–36

transference of, 69–70

Epinephrine or adrenaline:

in focialized anxiety and anxiety disorders, 132, 140

memory impacted by, 70, 135

in OCD, 186, 198

sleep impacted by, 52, 57

stress response involving, 93, 98, 99, 101, 102

Executive function, 14–15, 42. See also

Attention; Cognition; Problem solving; Working memory

Exercise/physical activity:

for anxiety and anxiety disorders, 38–39, 144, 153, 157, 165

brain health via, 36–39

for depression and depressive disorders, 37–38, 209, 221, 222

neurogenesis impacted by, 4, 36–37

for PTSD, 153, 157, 165

sleep relationship to, 56

Exposure:

for focialized anxiety and anxiety disorders, 130, 134–137, 141–143, 145, 147–148

for generalized anxiety and anxiety disorders, 120, 122, 124–128

interoceptive, 147–148

to memory, 72–73, 87

neuroplasticity through, 6–9

for OCD, 187, 191, 192, 195–197

for panic disorders, 130, 145, 147–148

Subjective Units of Distress Scale on, 8, 172, 191

Eye Movement Desensitization and Reprocessing (EMDR), 175–177

labeling moods in, 221

medication for, ix, xi–xii, 202

memory in, 207, 208–209

mindfulness practices for, 219–220, 221

neurogenesis impacted by, 4

neuroplasticity impacting, 4–10

neuroscience applications for, 1–31

norepinephrine in, 204, 206, 207, 222

overgeneralization in, 209

overview of, 201

postpartum or maternal, 79–80, 202

prevalence of, 201

serotonin level relationship to, xii, 201–202, 204, 206, 207, 222

“sickness behavior” mimicking, 110, 203–204

sleep relationship to, 52, 221

social support as buffer against, 33–34, 205, 216–218, 221

stress relationship to, 101, 104, 105, 106, 108

TEAM mnemonic for, 223

Diagnostic and Statistical Manual of Mental Disorders, ix, xiii

Dialectical behavior therapy (DBT), 120

Diet. See Nutritional and dietary factors

Dopamine (DA):

addiction association with, 19

brain hemisphere activity of, 13

in depression and depressive disorders, 204, 206, 215–216, 222

exercise impacting, 57

habit behavior impacted by, 16–19

memory impacted by, 40

stress impacting, 108

Dorsolateral prefrontal cortex (DLPFC):

attention processing in, 63, 85

brain hemispheres of, 12

default mode network relationship to, 21

in depression and depressive disorders, 206, 211

in generalized anxiety and anxiety disorders, 126

memory activity in, 63, 65, 69, 161

in OCD, 187, 188, 190, 195

in PTSD, 161

skills of, 14–15

stress response role of, 106

Drug abuse. See Substance use/abuse

Drug treatment. See Medication

Education:

brain health promotion through, 39–40
Facial expression:
neuroscience of, 25–27
social/therapeutic brain networks including, 22, 36
Still Face paradigm of, 78–80, 121
stress response involving, 93, 98

cortisol receptors in, 4, 40
in depression and depressive disorders, 208–209, 222
neurogenesis in, 4, 37
neuroplasticity in, 9
in OCD, 188, 190, 194
in PTSD, 161–163, 167, 169, 173–175
sleep-induced function of, 51, 173–175
stress impacting, 104–107
Hypothalamus:
hypothalamic-pituitary-adrenal (HPA) axis, 70, 72, 101, 103, 104, 106, 107, 110, 132, 145, 156, 186, 203, 206
sleep-related role of, 53, 55
stress response role of, 99, 101, 107, 132, 186

Immune system:
depression relationship to, 203–205
diet and nutrition impacting, 42, 45, 47
exercise impacting, 58
inflammation in, 38, 42, 45, 47, 109–111, 156, 203–205
integrative approach to, xvi–xvii
PTSD relationship to, 156
sleep impacting, 52, 57
social support/relationships impacting, 34–35
stress impacting, 108–111
Insula, 22, 23, 35, 36, 152
Interpersonal psychotherapy, 217–218, 221

James, William, 92
Jung, Carl, 114
Kandel, Eric, 76

Laughter, benefits of, 26–27

Main, Mary, 82, 83
Man’s Search for Meaning (Frankl), 178
Medial prefrontal cortex (mPFC):
anxiety regulation in, 126, 128, 135–136, 138, 154
default mode network relationship to, 20
stress impacting, 105
Medication:
antianxiety, 118–119, 155, 158, 165, 171, 198
antidepressant, ix, xi–xii, 202
anxiety-like symptoms from, 131–132
beta blockers as, 155, 171
depression as side effect of, 203
efficacy studies on, xi–xii
historical approaches to use of, ix–xi
insomnia as side effect of, 53
integrative approach to, xiii
OCD, 198
PTSD, 155, 158, 165, 171
sleep-related, 50, 51, 59
Medium spiny (MS) neurons, 16–18, 212–213
Melatonin, 55–56, 59

Memory:
assessment of explicit memory capacity, 159–165
attention relationship to, 63, 64, 85
brain health impacting, 40, 42, 44, 49, 51–52
child abuse and deprivation effects on, 77–80, 82, 161
consolidating memories, 74–76, 87–88, 135, 157, 158, 169–175
dementia impacting (see Dementia)
depression relationship to, 207, 208–209
developing implicit, 76–85
developing new, 85–89
developing procedural, 68–70
diet and nutrition impacting, 42, 44, 49
emotional, 68–70, 72–73, 75, 77–80
episodic, 67
explicit or declarative, 64–68, 69, 71–72, 86–89, 107, 150, 157–177
exposure to, 72–73, 87
fight, flight, or freeze response to, 70, 73
habit behaviors as, 16, 68–69
hippocampus role in, 4, 9, 40, 51, 64–65, 69, 71–72, 74, 85–86, 159, 161, 167, 188, 208–209
implicit or nondeclarative, 64, 68–70, 72, 76–85, 86–88, 107, 150, 157–158, 165–170
integration of implicit and explicit, 150, 157–177
integrative approach to role of, xvi
long-term, 63, 64–68
malleability of, 66–67, 87
memory system development, 63–89
neurogenesis impacting, 4
neuroplasticity in acquiring new, 6, 9, 67, 70
OCD relationship to, 69, 188–189
parent-child attachment developing, 80–85
personality relationship to, 64
prefrontal cortex role in, 14, 15, 63, 65, 69, 74, 161, 167, 188
procedural, 16, 68–69, 189
PTSD relationship to, 73–74, 150, 157–177
retrieval of repressed, 65–67
semantic, 67
Memory (continued)
short-term, 63
sleep impacting, 51–52, 75, 173–175, 176–177
storytelling or narratives of, 88–89
stress impacting, 103, 105, 107
traumatic brain injury impairing, 159–161
working, 14, 15, 40, 42, 63–64, 65, 67, 103, 161
Mental health issues. See Psychological problems
Mindfulness practices, 117, 127–128, 219–220, 221. See also Relaxation practices
Mirror neuron system, 23, 24–25, 35
Nerve growth factor (NGF), 49
Neurons:
brain-derived neurotropic factor impacting, 3–4, 36, 49, 99, 202, 222
glial cell line-derived neurotrophic factor impacting, 49
medium spiny (MS), 16–18, 212–213
memory consolidation role of, 75–76
mirror, 23, 24–25, 35
neurogenesis of, 3–4, 36–37
neuroplasticity of, 4–10, 45–46, 48, 67, 70
neurotransmitters between (see Neurotransmitters)
spindle cell, 23–24
synapses between, 5, 7, 42
Neuroscience:
applications of, 1–31
brain function in (see Brain function)
brain structure in (see Brain structure)
default mode network in, 20–21
emotion and hemispheres in, 10–13, 24, 25–26
facial expression in, 22, 25–27
gene-environment interaction in, 2–3
habit behaviors in, 16–20
neurogenesis in, 3–4
neuroplasticity in, 4–10
psychotherapy based on (see Brain-based therapy)
social/therapeutic brain networks in, 21–25
teaching practical aspects of, 2–31
Neurotransmitters:
attachment style impacting, 83
brain hemisphere activity of, 13
depression relationship to, xii, 201–202, 204, 206, 207, 215–216, 222
diet and nutrition impacting, 42–43, 48, 114
dopamine as (see Dopamine)
epinephrine as (see Epinephrine or adrenaline)
exercise impacting, 37, 38
gamma-aminobutyric acid (GABA) as, 5, 38, 83, 118, 202
glutamate as, 5, 8, 19, 70, 104
habit behavior impacted by, 16–19
memory impacted by, 40, 70, 135
neuroplasticity and, 5, 8, 9–10
norepinephrine as (see Norepinephrine)
oxotin acting as, 40, 98, 151
serotonin as (see Serotonin)
sleep impacting, 52, 57, 174–175
stress response impacting, 93, 98, 99, 100, 101, 102–104, 108
Norepinephrine (NE):
brain hemisphere activity of, 13
in depression and depressive disorders, 204, 206, 207, 222
exercise impacting, 37
memory impacted by, 40, 70, 135
neuroplasticity and, 9–10
in OCD, 186, 198
PTSD relationship to, 155–157, 171–172, 174–175
sleep relationship to, 52, 57, 174–175
stress response involving, 100, 102–104
Nucleus accumbens, 16–17, 35, 215
Nutritional and dietary factors:
in anxiety and anxiety disorders, 40–41, 42, 43, 44, 114, 153, 172
for brain health, 40–49
in depression and depressive disorders, 42, 44, 47–49, 209
fat and fatty acids as, 46–49, 209
glucose as, 44–45, 54
hydration as, 49
for neurogenesis, 4
for neuroplasticity, 5
in PTSD, 153, 172
for sleep, 41, 54–55
tryptophan as, 43, 54–55, 114
Vitamin D as, 49
Obesity and weight, 38, 54
Obsessive-compulsive disorder (OCD):
ambiguity tolerance in, 188
amygdala role in, 186, 188–190, 194, 196
brain-based therapy for, 183–199
cognitive-behavioral therapy for, 187, 191, 192, 195–197, 199
doing technique for, 192, 194–195
doubt neutralization skills for, 189–190
exposure and response prevention for, 187, 191, 192, 195–197
gender differences in, 188
health obsessions in, 198–199
hippocampus in, 188, 190, 194
labeling behaviors in, 194
medication for, 198
memory in, 69, 188–189
observing technique in, 192–193
OCD circuit in, 185–197
orbitofrontal cortex role in, 186–190, 194
ORDER mnemonic for, 191–197
overview of, 183–185
paradoxical intention for, 190
positive self-talk for, 196
prefrontal cortex role in, 187, 188–190, 194, 195, 196
reminding technique for, 192, 193–194
stress response in, 106
striatum role in, 186, 187, 188, 189–190, 194
Occipital lobe, 10, 13
OCD. See Obsessive-compulsive disorder
Orbitofrontal cortex (OFC):
amygdala connection to, 13–14, 71, 79, 95–96, 114, 153, 188–189
in autostress disorders, 95–96
brain hemispheres of, 12
ingulate cortex of, 22, 35 (see also Anterior
cingulate cortex)
diet and nutrition impacting, 43, 114
emotions activating, 12, 13–14, 22
facial expressions activating, 36
in generalized anxiety and anxiety disorders, 114, 121–122, 124–126
in OCD, 186–190, 194
in PTSD, 153–154
serotonin relationship to, 43
skills of, 13–15
social/therapeutic brain networks including, 22, 79
ORDER mnemonic:
overview of, 191–192
observing, 192–193
reminding, 192, 193–194
doing, 192, 194–195
exposure, 192, 195–196
response prevention, 192, 196–197
Oxytocin, 40, 98, 151

Panic disorders. See also Anxiety and anxiety disorders
acceptance concept for, 146
amygdala role in, 129, 132–133, 145
anxiety sensitivity as risk factor for, 144–145
BEAT mnemonic for, 148
breathing retraining for, 148
conditions creating anxiety-like symptoms
leading to, 132
depression and other anxiety disorders with, 144
exercise for, 144
exposure for, 130, 145, 147–148
fight, flight, or freeze response in, 146
gender differences in, 143
generalized anxiety disorders vs., 113
norepinephrine in, 10, 132–133
physiological arousal in, 140, 143–148
prefrontal cortex role in, 129, 132–133, 145
stress response in, 106
sympathetic nervous system role in, 129, 145
Paradoxical intention, 190
Parasympathetic nervous system:
in autostress disorders, 97–100, 109
in generalized anxiety and anxiety disorders, 115, 116–117
vagal nerve system in, 97–98
Parents:
attachment to, 80–85, 97–98
depression among, 79–80, 202
good-enough parenting by, 81–82
Parietal lobe, 10, 24–25
Personality, 64
Pharmacological treatment. See Medication
Phobias, 129, 139, 141–143. See also Anxiety
and anxiety disorders
Physical activity. See Exercise/physical activity
Posttraumatic stress disorder (PTSD):
acceptance concept in, 159, 180
acute stress disorder prior to, 149, 150
amygdala role in, 153–157, 161, 163, 166–167, 169, 170–171, 182
anterior cingulate cortex role in, 154, 157, 162
assessment for, 151–152
brain-based therapy for, 149–182
cognitive-behavioral therapy for, 158, 165, 168, 172–173
cortisol in, 155–157, 161, 164
critical incident debriefing post-trauma, 156–157, 158
depression in, 108
diet and nutrition impacting, 153, 172
education on, 152–153
emotions in, 152, 166–169
exercise impacting, 153, 157, 165
Subject Index 263
Posttraumatic stress disorder (continued)
gender differences in, 151
goal setting in, 153–157
hippocampus role in, 161–163, 167, 169, 173–175
historical approaches to, x
medication for, 135, 158, 165, 171
memory system in, 73–74, 150, 157–177
norepinephrine in, 155–157, 171–172, 174–175
orbitofrontal cortex role in, 153–154
overview of, 149–150
physiological arousal in, 144
posttraumatic growth following, 150, 178–180
prefrontal cortex role in, 153–156, 161, 167
prevalence of, 151, 163
“priming” in, 181
SAFE mnemonic for, 180–182
sleep disturbances in, 153, 173–175, 176–177
somatic therapies for, 175–177
stabilization to minimize risk of, 149, 150–157
stress response in, 103, 104, 106, 107–108
support for trauma victims, 150–151
traumatic brain injury and, 159–161
Prefrontal cortex (PFC):
activation of, 13–15, 21
anterior, 15
attention processing in, 63, 85
brain hemispheres of, 11–13, 134
brain’s brain role of, 13–15
default mode network relationship to, 20–21, 219
diet and nutrition impacting, 43, 114
dorsolateral (see Dorsolateral prefrontal cortex)
emotions activating, 11, 12, 13–14, 22, 26
facial expressions activating, 26, 36
FEED mnemonic on activating, 21
habit behavior relationship to, 16–17
medial, 20, 105, 126, 128, 135–136, 138, 154
memory retrieval via, 14, 15, 63, 65, 69, 74, 161, 167, 188
norepinephrine impacting, 10
in OCD, 187, 188–190, 194, 195, 196
orbidal (see Orbitofrontal cortex)
in PTSD, 153–156, 161, 167
social/therapeutic brain networks including, 22, 35, 79
stress response in, 92, 95–96, 100–102, 103–104, 105–106
Problem solving, 14, 42, 218
Problem solving therapy, 218
Procedural memory, 16, 68–69, 189
Psychological problems:
ADHD as, xiii, 15
anxiety as (see Anxiety and anxiety disorders)
autism spectrum disorders as, 84
tautostress disorders as, 91–111
bipolar disorder as, xiii
clients experiencing (see Clients)
depression as (see Depression and depressive disorders)
OCD as, 69, 106, 183–199
psychoeducation about, xiv–xv, 1, 2–31, 152–153
psychotherapy addressing (see Psychotherapy)
Psychotherapy:
acceptance and commitment therapy as, 120, 124–125, 127, 220, 221
brain-based (see Brain-based therapy)
Cartesian Era of, viii–ix
cognitive-behavioral (see Cognitive-behavioral therapy)
dialectical behavior therapy as, 120
historical approaches to, viii–xiii
integrative approach to, vii–viii, x–xi, xii–xiv, 220–223
interpersonal, 217–218, 221
medication use with (see Medication)
Pax Medica era of, ix–xiii
psychological problems addressed in (see Psychological problems)
sel-control therapy as, 218
somatic therapies as, 175–177
therapeutic alliance in, xv, xvi, 21–25, 35, 69–70, 85
PTSD. See Posttraumatic stress disorder
REAL mnemonic, 128
Relaxation practices, 114–117, 128, 148. See also Mindfulness practices
Resiliency, 100, 150, 178–180
Rogers, Carl, 21
SAFE mnemonic, 180–182
SEEDS mnemonic:
