DAVID SIBBET is president and founder of The Grove Consultants International, a firm leading strategy, visioning, creativity, future-forces, leadership development, and large-scale system change processes worldwide since 1977. He was involved with the growth of Apple Computer in the 1980s, facilitated the change management team at National Semiconductor during its turnaround in 1990, and worked at HP and then Agilent Technologies for many years, leading strategic visioning sessions for groups and divisions, helping develop leadership programs, and designing Grove Storymaps® for special kickoffs and change projects. He and The Grove facilitated the community visioning processes and planning fairs connected with the conversion of the Presidio in San Francisco to a national park. As a founding director of Headlands Center for the Arts and tenant in the Thoreau Center for Sustainability he has long experience as a park partner.

In addition to corporate and government work, David has sustained a diverse involvement with foundations, nonprofits, schools, and professional associations. Over the years David has helped design and lead many board/staff retreats, strategy sessions, and cross-organizational projects working on social change.

David is the author and designer of many of The Grove’s extensive line of process consulting tools and guides, including the Grove’s Visual Planning Systems™, the Drexler/Sibbet/Forrester Team Performance System™, the Sibbet/LeSaget Sustainable Organization Model™, the Grove’s Strategic Visioning Process™ and related graphic templates, and The Grove’s Facilitation Series. In 2007 the Organizational Development Network awarded David and the Grove their Membership Award for creative contributions to the field of organization development.

David holds a master’s degree in journalism from Northwestern University and a BA in English from Occidental College. He was awarded a Coro Fellowship in Public Affairs in 1965 to study metropolitan public affairs in Los Angeles. For eight years in the 1970s he was executive director and director of training for the Coro Foundation, designing experience-based education programs for young leaders. He began his own organizational consulting firm in 1977. David is a longtime affiliate with the Institute for the Future in Menlo Park, a member of the Global Business Network in San Francisco, a longtime member for both the Organizational Development Network and the International Association of Facilitators, and a member of Heartland Circle’s Thought Leader Network. He is president of the Argonne Community Garden and currently on the board of Coro. David lives in San Francisco with his poet/teacher spouse, Susan.
