# Contents

Introduction xix  

**Part I**  

**Raspberry Pi Basics**  

**Chapter 1**  

**Raspberry Pi Hardware**  
- Introduction to the Platform  3  
- Who Should Use the RPi  5  
- When to Use the RPi  5  
- When to Not Use the RPi  6  
- RPi Documentation  7  
- The RPi Hardware  8  
  - Raspberry Pi Versions  9  
  - The Raspberry Pi Hardware  10  
- Raspberry Pi Accessories  12  
  - Important Accessories  13  
  - Recommended Accessories  14  
  - Optional Accessories  16  
- HATs  19  
- How to Destroy Your RPi!  20  
- Summary  21  
- Support  21

**Chapter 2**  

**Raspberry Pi Software**  
- Linux on the Raspberry Pi  24  
  - Linux Distributions for the RPi  24  
  - Create a Linux SD Card Image for the RPi  25  
- Connecting to a Network  26  
  - Regular Ethernet  27  
  - Ethernet Crossover Cable  29  
- Communicating with the RPi  31

Chapter 5 Programming on the Raspberry Pi

Introduction 160
  Performance of Languages on the RPi 160
  Setting the RPi CPU Frequency 165
  A First Circuit for Physical Computing 166
Scripting Languages 168
  Scripting Language Options 168
  Bash 169
  Lua 171
  Perl 173
  Python 173
Dynamically Compiled Languages 176
  JavaScript and Node.js on the RPi 176
  Java on the RPi 178
C and C++ on the RPi 180
  C and C++ Language Overview 182
  LED Control in C 194
  The C of C++ 196
Overview of Object-Oriented Programming 199
  Object-Oriented LED Control in C++ 203
Interfacing to the Linux OS 206
  Glibc and Syscall 206
Improving the Performance of Python 208
  Cython 208
  Extending Python with C/C++ 211
Summary 215
Further Reading 216
Bibliography 216
# Part II Interfacing, Controlling, and Communicating

## Chapter 6 Interfacing to the Raspberry Pi Input/Outputs

### Introduction
- General-Purpose Input/Outputs
  - GPIO Digital Output
  - GPIO Digital Input
  - Internal Pull-Up and Pull-Down Resistors
  - Interfacing to Powered DC Circuits
- C++ Control of GPIOs Using sysfs
- More C++ Programming
- An Enhanced GPIO Class
- Memory-Based GPIO Control
  - GPIO Control Using devmem2
  - GPIO Control Using C and /dev/mem
  - Changing the Internal Resistor Configuration
- WiringPi
  - Installing wiringPi
  - The gpio Command
  - Programming with wiringPi
  - Toggling an LED Using wiringPi
  - Button Press—LED Response
  - Communicating to One-Wire Sensors
  - PWM and General-Purpose Clocks
- GPIOs and Permissions
  - Writing udev Rules
  - Permissions and wiringPi
- Summary

## Chapter 7 Cross-Compilation and the Eclipse IDE

### Setting Up a Cross-Compilation Toolchain
- The Linaro Toolchain for Raspbian
- Debian Cross-Toolchains

### Cross-Compilation Using Eclipse
- Installing Eclipse on Desktop Linux
- Configuring Eclipse for Cross-Compilation
- Remote System Explorer
- Integrating GitHub into Eclipse
- Remote Debugging
- Automatic Documentation (Doxygen)

### Building Linux
- Downloading the Kernel Source
- Building the Linux Kernel
- Deploying the Linux Kernel
- Building a Linux Distribution (Advanced)

### Summary

### Further Reading
Chapter 8  Interfacing to the Raspberry Pi Buses  309
Introduction to Bus Communication  310
I²C  310
  I²C Hardware  311
  An I²C Test Circuit  315
  Using Linux I2C-Tools  318
  I²C Communication in C  325
  Wrapping I²C Devices with C++ Classes  328
SPI  330
  SPI Hardware  330
  SPI on the RPi  332
  A First SPI Application (74HC595)  334
  Bidirectional SPI Communication in C/C++  339
  Multiple SPI Slave Devices on the RPi  346
UART  347
  The RPi UART  348
  UART Examples in C  352
  UART Applications - GPS  357
Logic-Level Translation  359
Summary  361
Further Reading  361

Chapter 9  Enhancing the Input/Output Interfaces on the RPi  363
Introduction  364
Analog-to-Digital Conversion  364
  SPI Analog-to-Digital Converters (ADCs)  365
  ADC Application: An Analog Light Meter  368
  Testing the SPI ADC Performance  370
  The C Library for BCM2835 (Advanced)  373
Digital-to-Analog Conversion  376
  An I²C Digital-to-Analog Converter  376
  An SPI Digital-to-Analog Converter  379
Adding PWM Outputs to the RPi  381
Extending the RPi GPIOs  387
  The MCP23017 and the I²C Bus  389
  The MCP23S17 and the SPI Bus  393
  A C++ Class for the MCP23x17 Devices  394
Adding UARTs to the RPi  397
Summary  403

Chapter 10  Interacting with the Physical Environment  405
Interfacing to Actuators  406
  DC Motors  407
  Stepper Motors  414
  Relays  418
Interfacing to Analog Sensors  420
  Linear Analog Sensors  422

Chapter 13 Wireless Communication and Control 535
Introduction to Wireless Communications 536
Bluetooth Communications 537
  Installing a Bluetooth Adapter 537
  Android App Development with Bluetooth 543
Wi-Fi Communications 544
  Installing a Wi-Fi Adapter 544
  The NodeMCU Wi-Fi Slave Processor 547
ZigBee Communications 559
  Introduction to XBee Devices 559
  XBee Configuration 561
  An XBee AT Mode Example 563
  An XBee API Mode Example 568
Near Field Communication 572
Summary 575

Chapter 14 Raspberry Pi with a Rich User Interface 577
Rich UI RPi Architectures 578
  The RPi as a General-Purpose Computer 579
  RPi with an LCD Touchscreen 582
  Virtual Network Computing (VNC) 583
  Fat-Client Applications 585
Rich UI Application Development 586
  Introduction to GTK+ on the RPi 586
  Introduction to Qt on the RPi 590
Qt Primer 592
  Qt Concepts 592
  Qt Development Tools 596
  A First Qt Creator Example 597
  A Qt Weather GUI Application 598
Remote UI Application Development 602
  Fat-Client Qt GUI Application 603
  Multithreaded Server Applications 606
  The Multithreaded Weather Server 609
Summary 612
Further Reading 613
### Chapter 15  Images, Video, and Audio 615
- Capturing Images and Video 616
  - The RPi Camera 616
  - USB Webcams 619
  - Video4Linux2 (V4L2) 621
- Streaming Video 627
- Image Processing and Computer Vision 628
  - Image Processing with OpenCV 628
  - Computer Vision with OpenCV 631
  - Boost 633
- Raspberry Pi Audio 634
  - Core Audio Software Tools 635
  - Audio Devices for the RPi 635
  - Text-to-Speech 643
- Summary 644
- Further Reading 645

### Chapter 16  Kernel Programming 647
- Introduction 648
  - Why Write Kernel Modules? 648
  - Loadable Kernel Module (LKM) Basics 649
- A First LKM Example 650
  - The LKM Makefile 652
  - Building the LKM on a Linux Desktop Machine 653
  - Building the LKM on the RPi 654
  - Testing the First LKM Example 657
- An Embedded LKM Example 659
  - Interrupt Service Routines (ISRs) 661
  - Performance 665
- Enhanced Button GPIO Driver LKM 665
  - The kobject Interface 666
- Enhanced LED GPIO Driver LKM 673
  - Kernel Threads 674
- Conclusions 675
- Summary 676
