Introduction ............................................................................. 1
What Is Alternative about Alternative Investments? ......................... 5
The Plan of This Book ................................................................ 11

PART ONE | ANALYTIC TOOLS

1 Risk and Return ................................................................. 17
2 Return Enhancement ......................................................... 37
3 Some Features of the Quantitative Toolkit ................................. 59
4 Risk Estimation ............................................................... 81

PART TWO | SOME EXAMPLES

5 Long/Short Equity ........................................................... 103
6 Direct Lending ................................................................. 123
7 Merger Arbitrage ............................................................. 141
8 High-Frequency Trading ..................................................... 161
9 Holding Private Assets for Their Cash Flows............................ 183
10 Fixed-Income Arbitrage ..................................................... 199
11 Event-Driven Investment .................................................... 217

PART THREE | POSITION MANAGEMENT

12 Investment Strategies in Practice ......................................... 237
13 Optionality ........................................................................ 253
14 Trade Capacity ........................................................ 271
15 Institutional Liquidity ............................................ 287
16 Tactical Allocation .................................................. 305
17 Portfolio Liquidity .................................................. 323
18 Alternative Investments and Information Theory .... 343

PART FOUR | PORTFOLIO CONSTRUCTION

19 Classification of Investments ................................. 361
20 Diversification among Strategies ............................. 381
21 Multi-Dimensional Risk  .......................................... 403
22 Filling Out the Allocation ....................................... 419
23 Time and Tide ........................................................ 433
24 Managing the Allocation Decision ........................... 451
25 Concluding Remarks .............................................. 469

Bibliography .................................................................. 477
Index ................................................................................. 487
Figures

1.1 The Dollar and Oil: 90-Day Trailing Coefficient of Correlation .......................................................... 28
1.2 Annualized Return from Doubling Capital over Different Holding Periods .................................................. 30
1.3 Fiat Savings Share Relative to Fiat Common ................................................................................... 32
2.1 Option Payoff Diagram: Buy Straddle .................................................................................. 56
3.1 Volatility and Compounding .............................................................................................. 61
3.2 Two Non-Correlated Series ............................................................................................ 63
3.3 Two Highly Correlated Series .......................................................................................... 64
3.4 Counter-Correlated Price Series ...................................................................................... 66
3.5 Spot Gold and the Russell®* 3000 Index: 90-Day Trailing Coefficient of Correlation .............. 68
3.6 Efficient Frontiers ........................................................................................................... 70
3.7 Efficient Frontiers: Higher Return Asset has Higher Standard Deviation ................................. 71
3.8 Normal and Kurtotic Distributions ................................................................................... 74
3.9 Normal and Skewed Distributions ................................................................................... 75
3.10 Standard & Poor’s 500 Index: Distribution of Returns ....................................................... 76
3.11 Standard & Poor’s 500 Index: 90-Day Trailing Kurtosis ..................................................... 78
3.12 Standard & Poor’s 500 Index: 90-Day Trailing Skewness ................................................... 78
4.1 Dow Jones Select REIT † and Russell 3000 Indices: 90-Day Trailing Coefficient of Correlation .................................................................................................................. 87
4.2 Barclays Capital U.S. Aggregate Bond Index: 90-Day Trailing Standard Deviation ......................... 90
4.3 Stocks, Bonds, and Commodities: 90-Day Trailing Coefficients of Correlation ......................... 97
5.1 Selected HFRI Indices ........................................................................................................ 104
5.2 HFRI Short-Bias Index versus the Broad Market ..................................................................... 107
