Temporal sequence learning, memory systems, 50
Terminal buttons (boutons), defined, 9
Thalamocortical synapses, cortical map reorganization, 311–313
Thalamus, brain, 18
Thorndike’s law of effect, 22

Time, higher order functions of, signal processing, spectrum analysis, 87–89
Time-delay estimation, signal processing, 108–110
Tinnitus, 40–42
Tonotopic maps. See Brain maps; Cortical map reorganization
Topographic brain maps, novelty detection and learning, 34–38
Unsupervised learning, category of, 6
Visual cortex, described, 14
Visual system correlation, computational neural models, 199–200
Wake-sleep learning rule, neural learning, mathematical basis, 145
Wiener filter:
   kernel learning, 235–238
   signal processing, 91–95
