follow-up for, 195, 197, 199
lingual spurs, 168, 170
lip competence in, 187, 189
molars uprighted in, 170, 172
NiTi archwires in, 191, 194
open-bite correction in, 181, 183
palatal spurs, 168, 170
root resorption in, 181, 182
stable results with, 170, 174, 176, 178, 181, 185, 187, 191, 192, 195, 199
surgical-orthodontic correction for, 191, 194
tongue crib for, 164, 168, 170, 194, 195
treatment mechanics of, 176, 176
Malocclusions, Class II (continued)

vertical intermaxillary elastics in, 194, 195
preadjusted appliances for, 92, 99, 99
stable results for, 78, 79, 80, 102, 106
tongue crib for, 76, 77, 78
treatment for open bite in, 73–74

Malocclusions, Class II subdivision right

bite blocks with palatal crib for, 90, 92
Class II elastics for, 92, 94
clinical presentation, 90, 91
elastic chains for, 92, 94
and eruption of permanent teeth, 90, 93
fixed preadjusted appliances for, 92, 94
stable results for, 90, 92, 93, 94, 95

Malocclusions, Class II subdivision left

clinical presentation of, 112, 115, 117, 117
final open-bite tongue crib treatment for, 115
fixed appliances for, 117, 120
fixed palatal crib for, 115, 116
maxillary plate with expander for, 117, 119
tongue crib for, 117, 119, 120

Malocclusions, Class II subdivision right

bi-helix associated with tongue crib for, 112, 112
clinical presentation of, 84, 86, 102, 107, 108, 111
and eruption of permanent teeth, 84, 85
final open-bite tongue crib for, 112, 114
final results for, 108, 110
fixed palatal crib for, 84, 87, 88, 108, 108

fixed preadjusted appliances for, 84, 89
removable crib for, 108, 109
stable results for, 84, 90
tongue crib in, 112, 113

Malocclusions, Class III

canine-to-canine bonded retainer in, 124, 125
clinical presentation, 121, 121
fixed palatal crib for, 122, 122
Hawley plate for, 124, 125

beneficial effects associated with, 363
cephalometric data, 373, 378, 383
clinical presentation, 368, 369, 375, 379

closure of open bite in, 368
with conventional mechanics, 366–367
dentoskeletal effects of molar intrusion for, 361–366, 362–365
final records for, 368, 371
fixed tongue crib in, 368, 370
in growing patients, 363–365, 364–366
in growing vs. nongrowing patients, 364–365
implant replacement in, 368, 371
interdisciplinary approach to, 349
maxillary molar intrusion in, 356–357
orthodontic-surgical protocol for, 367
by posterior teeth intrusion, 377
superimposition of changes in, 372, 377
superimpositions of changes in, 377, 382
treatment mechanics for, 370, 375, 380
treatment sequence for, 370, 375

Open-bite extraction treatment, 231–233, 232, 233
for Class I malocclusions
canine-to-canine mandibular retainer, 248, 248
canine-to-canine retainer in, 296, 297
cephalometric data, 237, 243, 250
Class II elastics in, 291, 296, 297
elastic chains in, 291, 296
final mechanics, 244, 247
final records, 240, 241
final results, 234, 235, 236, 248, 249
Open-bite extraction treatment (continued)
follow-up of, 234, 238
Hawley plate in, 296, 297
overbite corrected, 240, 242
palatal tongue crib in, 291, 296
premolar extractions, 244
premolar extractions in, 233–234
stable results, 240, 244, 245
treatment mechanics, 240, 240,
244, 247
treatment mechanics of, 234, 234
for Class II malocclusions, 262,
262
canine-to-canine retainer
in, 252, 253, 263, 266
cephalometric data, 255
with Class II elastics, 263,
265
clinical presentation, 249, 251,
252, 258, 261, 264, 283, 287
decrease in face height in, 263,
267
elastic chains for, 263, 265
final records for, 254, 260
and growth changes, 254, 261,
261
Hawley plate for, 263, 266
Hyrax expander for, 254, 259
molar mesialization to
extraction spaces in, 252,
254
Nitinol archwires in, 261, 265,
283, 288
premolar extractions, 249, 252
retraction of anterior teeth
in, 254, 259
satisfactory results with, 283,
288
stable results with, 254, 261,
263
treatment mechanics in, 283,
288
treatment stability with, 252,
256
for Class II malocclusions,
bilateral
cephalometric data, 293
Class II elastics in, 285, 290
clinical presentation, 283–285,
289
final records of, 290, 292
final treatment
mechanics, 290, 291
follow-up for, 290, 292, 294
molars extracted, 285, 290
tongue crib in, 285, 290
for Class II subdivision left
malocclusions
archwires in, 280, 283
cephalometric data, 286
changes contributing to
correction, 280, 285
clinical presentation, 278, 282
final results for, 280, 284
initial treatment mechanics
for, 278, 282
Nitinol archwires in, 278, 282
premolar extractions in, 280,
282
for Class II subdivision right
malocclusions
adequate anterior overbite
for, 271, 272
anterior retraction in, 267, 271
archwires for, 296, 299
cephalometric data, 268, 274,
279, 302
changes contributing to
correction of, 273, 278
Class II elastics for, 299, 299
clinical presentation, 267, 270,
273, 275, 296, 298
elastic chains for, 296, 299
follow-up for, 299, 303
Hyrax appliance for, 267, 271
implants in, 273, 276
leveling and alignment
for, 273, 276
mandibular molar distal angulation in, 271, 273
mini-implants in, 273, 276
occlusion established in, 299, 300
premolar extracted in, 267, 271
stable results for, 278, 280
superimpositions of changes in, 299, 301
stability of, 231

Open-bite nonextraction treatment, for Class III malocclusions, 197–214, 200–203, 204, 205–210, 211, 212–214. See also Nonextraction open-bite treatment
Open-bite patients, orthodontic-surgical treatment of, 403

Open-bite relapse clinically significant, 434
dental models of, 229, 230
factors contributing to, 222–223, 223
and growth changes, 331
and long-term vertical dental changes, 434
minimizing, 315
and occlusal adjustment, 325, 326–328, 330
and posttreatment time, 314–315
with TADs, 382

Open-bite treatment approaches to, 23
clinical history for, 35
in deciduous dentition, 25–30, 26–29
with extraction
clinical cases, 141, 141–142
reversing and accentuating curve of Spee, 141
before five years of age, 27–28, 28
in permanent dentition, 130
in mixed dentition, 30, 30–37, 32–37
palatal crib in, 28, 29, 30
and root resorption, 331, 334–337, 337, 338, 339
timing of, 34–35

Open coil spring, in Class III skeletal malocclusion, 208, 214

Oral habits, deleterious, 4–5
Oral perception, 2
Oromaxillofacial surgery, 403–404
Orthodontic mechanics, and facial esthetics, 350
Orthodontic preparation, in skeletal open-bite treatment, 404
Orthodontics in children, 27
growth patterns in, 16–17, 17
and orthognathic surgery, 404
prognosis in, 1
and psychoanalytic theory, 27–28
stability in, 23
Orthodontic-surgical preparation, 404–406
Orthodontic-surgical protocols, 367
Orthodontic-surgical treatment, combined, 406
advancement genioplasty in, 432
bracket rebonding in, 414
cephalometric data, 419, 422, 428, 433
for Class II malocclusion, 429
for Class III subdivision left malocclusion, 423
clinical presentation, 416, 419, 423, 429
clockwise rotation of maxilla in, 431
final extraoral photographs, 425
final records for, 415
finishing procedures for, 414
Orthodontic-surgical treatment, combined (continued)
follow-up, 417, 426, 431
indications for, 350, 405–406
intermediary splint, 411
maxillary advancement in, 420, 421, 421
maxillary deficiency in, 417, 425
orthodontic preparation for, 408–410, 410
orthodontic presurgical preparation, 429
orthodontic treatment in, 408, 409
orthognathic surgery, 411
plaster model, 411
posttreatment photographs, 430
presurgical impression for, 411
presurgical orthodontic preparation, 424
presurgical records, 411
retention, 414–415
sagittal maxillomandibular relationship in, 432
for skeletal anterior open bite, 403–404
stability of, 420, 426, 433–435
superimpositions of changes in, 418, 421, 427, 432
treatment planning for, 406–408
Orthodontic treatment, for skeletal open bite, 349
Orthognathic surgery, 350, 367, 411–414, 413
in open-bite treatment, 403
and orthodontics, 404
Osteotomy
in combined orthodontic-surgical approach, 412
LeFort I, 407
multisegmented LeFort I, 412–414, 413
one-piece maxillary, 412
Overbite
measurement of, 24, 24–25, 25, 26
nonextraction treatment for anterior, 214, 216
statistics for postretention, 218, 220
posttreatment, 218, 220
pretreatment, 218, 220
studies on decrease of, 218, 220, 221, 222
t-test for postretention, 218, 221
posttreatment, 218, 220, 221
pretreatment, 218, 220
Overbite change, in posttreatment period, 306–307
Overbite correction, and root resorption, 336, 337, 338
Overcorrection, and vertical elastics, 135–137, 136
Overjet change, and root resorption, 336–337, 337, 339
Overjet correction, in orthognathic surgery, 407

Pacifiers
in child development, 4, 27
as mechanical obstacle, 4, 5, 6
open-bite malocclusion caused by, 4, 5, 6
orthodontic, 7

Pacifier sucking, 3

Palatal crib, 31, 32
acrylic contacting surfaces of, 31, 34
with adequate vs. inadequate length, 31, 33
for Class I malocclusion, 39, 39
for Class II malocclusion, 80, 82, 83, 92, 97
for Class II subdivision left malocclusion, 115, 116
in Class II subdivision right malocclusion, 108, 108
for Class III malocclusion, 122, 122
construction of, 31
in open-bite treatment, 28, 29, 30
and patient compliance, 31
undesirable side effects of, 31, 34
Palatal tongue crib
for Class II malocclusion, 100, 102
fixed, 28, 29
in open-bite extraction
treatment, 291, 296
removable, 28, 29
Patient compliance
with Class II elastics, 177, 181
with open-bite correction with
skeletal anchorage, 367
with palatal crib, 31
with vertical elastics, 134–135
Plaster casts, in combined
orthodontic-surgical
treatment, 411
Posterior bite blocks, in Class I
malocclusions, 234, 235
Posterior condylar growth, in
skeletal anterior open
bite, 405
Posterior molar height (PMH), 321,
