Index

Indexer: Dr Laurence Errington

Illustrations are comprehensively referred to from the text. Therefore, significant items in illustrations (figures and tables) have only been given a page reference in the absence of their concomitant mention in the text referring to that illustration.

abdominocentesis, cardiac tumor palliation 556–8
ablation, tumor (intracorporeal) 623–8
arrhythmias 531–40
deVICES 17–18
large airway masses 103–4
lasers see laser ablation
oral tumors 111, 114–15
radiofrequency see radiofrequency ablation
sinonasal tumors 52, 57–9
abscesses, hepatic 208
access pericardial 514–15
pleural, port 91–9
vascular see vasculature
accessory atrioventricular pathways 533–6
accessory pancreatic duct 248, 249
acetylsalicylic acid (aspirin) 465, 466
acid–base evaluation, gastric foreign body 145
Adams staging system for canine nasal tumors, modified 30, 52
adenocarcinoma, colorectal 155, 179, 181, 185
adjuvant chemotherapy 30
adulticides with heartworms 546
airways 41–90, 100–7
large, obstruction 73–82, 110–17
lower 83–90
upper 43–82
alcohol (ethanol) ablation of tumors 626
Alfieri (edge-to-edge) mitral valve repair 549–51
alpha-adrenergic blockers
benign ureteral obstruction interventions 319
cardiac tumor palliation 557
aminocaproic acid, idiopathic renal hemorrhia 307
amitriptyline, benign ureteral obstruction interventions 319
Amplatz Canine Duct Occluder 13–14, 564–73, 615
Amplatz guide wires 7
Amplatz™ atrial septal occluder (ASO) 610, 611, 612, 614, 615, 617–19, 620
Amplatz™ duct occluder II (ADOII) 615
Amplatz™ heart occluders (AHO) 512, 610, 615–17
Amplatz™ muscular ventricular septal defect occluder (mVSDO) 614
Amplatz™ patent foramen ovale occluder (PFO) 615
Amplatz™ sizing balloon II 612, 615, 617
Amplatz™ TorqVue™ delivery systems 616
Amplatz™ TorqVue™ LP7 (low profile) delivery systems 616
analgesia/pain control 635–47
ablation of tumors 624
background and indications 635
biliary procedures (incl. stenting) 253
bladder tumor intra-arterial chemotherapy 390
cardiac tumor palliation 557
embolization with bone pain (from tumors ) 630
with hemorrhage 45, 458
with hepatic arteriovenous malformations/fistulas 231
with hepatic tumors/metastases 240
with oral tumors 116
with portosystemic shunts 216
with sinonasal tumors 57
image-guided interventions 640–6
imaging modalities 636–40
instrumentation/equipment 636–40, 647
patient preparation 635–6
risks/complications/expected outcomes 636
special considerations/alternative uses/complication examples 646–7
techniques 636–40
anesthesia (local and/or general) 557
balloon valvuloplasty aortic 590
pulmonary 580
feeding tube placement 188
atrial or ventricular septal defect occlusion 617
nasopharyngeal stenosis stenting 68 see also local anesthetics
angiography balloon valvuloplasty atioventricular 600, 601, 602
pulmonary 580–1
catheters 8–9, 506
central venous obstruction 488, 489, 491
Budd–Chiari syndrome 491, 492, 493
cranial vena cava syndrome 494, 495
CT see computed tomography
digital subtraction see digital subtraction angiography
MR see magnetic resonance
patent ductus arteriosus and its occlusion 567–9, 571
angioplasty balloon (percutaneous transluminal) 20, 65
catheters 9–10
angiotensin-converting enzyme inhibitors idiopathic renal hemorrhia 302
mitral/tricuspid stenosis 597
annuloplasty, indirect transcatheter mitral 548–9
annulus, pulmonary, diameter
and balloon selection 578–9
and double balloon technique 585
antegrade ureteral stenting 331
antegrade urethral catheterization, percutaneous 419–22
antibiotics (periprocedural)
  aortic balloon valvuloplasty 590, 593
  biliary procedures (incl.
    stenting) 253
bladder tumor intra-arterial
  chemotherapy 390
bronchial stenting 89
cardiac tumor palliation 557
feeding tube placement 188
gastrointestinal obstructions 180–1
esophageal strictures 140
gastrointestinal polyectomy 159
hemorrhage embolization 458
hepatic arteriovenous malformation/
  fistula embolization 231
hepatic tumors/metastases 240
  nasal embolization 44
  portosystemic shunt
  embolization 216
ureteral obstructions
  benign 317–19
malignant 348
antiocoagulants
  in cardiac tumor palliation 557
  in thrombosis 463–5, 477
  central venous thrombosis 470
  pulmonary thromboembolism 466–7
anticonvulsant/antiseizure agents
hepatic arteriovenous malformation/
  fistula embolization 231
hepatic arteriovenous
  malformations 231
portosystemic shunt
  embolization 215, 216
antiinflammatories
bladder tumor intra-arterial
  chemotherapy 390
hepatic tumors/metastases 240
antiplatelet agents (in thrombosis) 465, 477
  central venous thrombosis 470
antiseizure agents see anticonvulsant
agents
antitussives (cough suppressants)
  bronchial collapse 84
  tracheal collapse 73
anxiolytics, tracheal collapse 73
aortic valve
  regurgitation complicating balloon
    valvuloplasty 589
  stenosis 588–94
  argon gas cryoablation of sinonasal
    tumors 58
  argon gas plasma coagulation of large
    airway lesions 103
  arrhythmias 531–40
  ablation 531–40
  in endovascular treatment of venous
    obstruction 489
  see also bradyarrhythmias; tachycardias
  arrhythmogenic right ventricular
  cardiomyopathy 539
arterial system
  access via see transarterial access
  chemotherapy administration via see
    intra-arterial chemotherapy
  foreign bodies 450
  hemorrhage from, identifying 460
  hepatic 209–10
  anatomy 203, 209–10
  imaging 201
  ligation 441–2
  nutrient artery with hepatic
    arteriovenous malformations/
    fistulas 229
  thrombosis 464–5, 473, 474
  arteriovenous malformations and
    fistulas (peripheral) 479–87
  hepatic 227–37, 480
  articular structures/joints, pain
    management 638–9, 640–2, 646
  ascites with hepatic arteriovenous
    malformations/fistulas 229
  aspirin (acetylsalicylic acid) 465, 466
  assistant, gastric foreign body
    removal 150
atenolol
  aortic balloon valvuloplasty 588,
    590, 593
  pulmonary balloon
    valvuloplasty 577, 580
atrial
  dilation accompanying valvular
    stenosis 596
  flutter 537–9
  cavotricuspid isthmus (CTI)-
    dependent 531–2, 537–8
pacing
  in atrial standstill 520
  right septal 525–6
  in sinus node dysfunction/sick
    sinus syndrome 519
  septal defects 610–20
  tachycardia 531, 532, 534, 536–7
  three (cor triatriatum) 604–9
  see also transatrial stenting of vena
    cava
atrioventricular pathways,
  accessory 535–6
atrioventricular septum see septum
  atrioventricular valves 595–603
dysplasia 595, 597
stenosis and balloon
  valvuloplasty 595–603
auricular appendage lead, right 524–5
balloon
  26
  angioplasty see angioplasty balloon
  cutting see cutting balloon
  pulmonary valvuloplasty,
    selection 578–9
balloon catheters 9–10
  for dilation see balloon dilation
    catheters
  for occlusion 9
  for pericardiectomy 514, 516–17
balloon dilation (and dilation
  balloons) 9–10, 26
aortic valve stenosis 589
  bronchi 87
  cor trigemini (CT)
    dexter (CDt) 606
    sinister (CDs) 608, 609
esophagus 130, 131, 132–3, 133, 134,
  135–8
  failure 139
  mitral/tricuspid stenosis 596, 597,
    598, 600, 601, 602
  nasopharyngeal stenosis 63–4, 65,
    67, 68
  pericardial 515–16
  pulmonary valve stenosis 582–4
  trachea 104–5
balloon dilation catheters 9–10, 26
aortic valve stenosis 592, 593
  esophageal strictures 133, 134, 139
  mitral/tricuspid stenosis 599, 600, 602
  nasopharyngeal stenosis 67
  pulmonary valve stenosis 579–80,
    581, 582, 583, 584
balloon-expandable metal stents
  (BEMS) 11–12
endoscopy 20
  nasopharynx 64, 66, 67, 68–9, 69
  urethra 375, 377
balloon occlusion 9
ureter 303, 304
balloon pericardiectomy 513–17
balloon valvuloplasty
  aortic 588–94
  atrioventricular 595–603
  pulmonary 575–87
baskets
  foreign body retrieval 24–5
  intravascular 452–3
  gastrointestinal polyps 157
  heartworm extraction 543–4
  stone-retrieval 24–5
  bladder and urethra 360, 361, 362,
    363, 364–5, 366, 370
Bentson guidewire 6, 7
Berenstein catheter
INDEX

Budd–Chiari syndrome 491, 492, 493
cardiac tumor palliation 561
cranial vena cava syndrome 494, 495
nasal/sinus tumors 6, 55
oral tumors 114
transarterial embolization 630
tube feeding
esophagojejunal tube 195
nasojejunal tube 195
percutaneous radiologic gastrostomy 194
beta-adrenoceptor blockers
balloon valvuloplasty
aortic 588, 593
pulmonary 577, 580, 584
cardiac tumor palliation 557
bile ducts
anatomy 206, 248–9
common (CBD) 206, 248–9, 252
stenting 24, 184, 247, 253
enlarged 208
biliary system
anatomy 206
drainage 256–60
imaging 201–8
stents 24, 184, 247–55
biodegradable gastrointestinal stents, esophagus 132, 133
biologically effective dose 33
biopsy, cardiac tumor 561
biventricular pacing in AV block 519
bladder 272–5
abnormalities 273–5
contrast studies (cystography) 272–5
endoscopic polypectomy and laser ablation of benign lesions 383–8
see also cystoscopy
endoscopy causing rupture 287
stones 360–72
urothelial carcinomas see urothelial carcinomas
vascular abnormalities see vascular abnormalities
bleeding see hemorrhage
blood pressures see pressures; pulmonary hypertension
blood vessels see vasculature
bone marrow toxicity of chemotherapeutic agents 37
bone tumors
ablation 624, 625
transarterial embolization/
chemoembolization 629–30, 633
bougienage, esophageal strictures 130, 133, 140
bovine cross-linked collagen as urethral bulking agent 413
brachial artery ligation 442
brachiocephalic trunk and oral tumor treatment 112, 114
bradycardias and bradycardia
bradyarrhythmias 518, 519, 520, 521
bronchi 100–7
collapse 83–9
stenosis 83–9, 105
bronchodilators
bronchial collapse 84
tracheal collapse 73
bronchoscope 15
bronchial collapse 87
tracheobronchial obstruction 101
Budd–Chiari syndrome 488
bulking agent injections, urethral 25–6, 410–14
calcium hydroxyapatite as urethral bulking agent 414
calcium oxalate uroliths 290, 291–2, 310, 314, 366
calciu see stones
cancer see tumors
canine patients (dogs)
arterial or venous ligation in 441–2
bladder stones 360–72
tumors 389–97
cardiac conditions and procedures
aortic stenosis and balloon valvuloplasty 588–94
mitral regurgitation 547–55
pacing in AV block 51
patent ductus arteriosus 11–12, 564–72
pulmonary valve stenosis and balloon valvuloplasty 575–87
pancreatitis model 248
renal hematuria (idiopathic) 301–7
sedation 639
thrombosis-associated conditions 465
tumor staging 30
nasosinal 50, 52
ureteral obstruction (benign) 315, 316–42
complications with stents 323
urethral approach via percutaneous perineal route 415–18
urethral stones 360–72
uroendoscopy 280–5
urogenital malformations 427
Veterinary Cooperative Oncology Group – common terminology criteria for adverse events 36
Carafate see sucralfate
carboplatin 31
bladder tumor intra-arterial chemotherapy 391
doxorubicin and 32
carcinoma, see specific sites and histological types 388
carcinoma in situ (CIS), bladder 383, 384
cardiac… see heart
cardiomyopathy
arrhythmogenic right ventricular 539
dilated, mitral regurgitation 547
carotid arteries (CA)
access/use 441
aortic balloon valvuloplasty 590–1
bladder tumors 393–4
common CA access 443
embozilization/
chemoembolization 631
oral tumors 112, 113
sinonasal tumors 53, 56
ligation 441–2
cat see feline patients
catheter(s)
angiographic 8–9, 506
balloon see balloon catheters
Berenstein see Berenstein catheter chemotherapy administration 35
Cobra, portosystemic shunt embolization 220, 221
drainage see drainage
in ductus arteriosus occlusion 567–73
as intravascular foreign body 450
in intravascular foreign body removal 451–2
urinary, in ultrasound-guided endoscopic laser ablation of transitional cell carcinoma, complications relating to 399
catheter-based/catheter-directed/transcatheter techniques
atrial or ventricular septal defect closure 610–20
mitral valve therapies 547–55
patent ductus arteriosus coil occlusion 572
radiofrequency ablation see radiofrequency ablation thrombolysis 467, 467–8, 471
see also balloon catheters
catheterization
epidural 645–6
percutaneous antegrade urethral 419–22
percutaneous venous 441
caudal vena cava (CdVC) 209–10, 439
in cranial vena cava syndrome 494
obstruction
in Budd–Chiari syndrome 491–3
cardiac tumor 556, 557, 558, 561
structural abnormalities 511
cautery (incl. electrocautery) 18
bladder lesions 385
esophageal strictures 139–40
large airway obstruction 101, 102, 102–3
ureteroscopy for see ureteroscopy
cystography 265, 272–5
see also urethrocytogram
cystolithotomy, percutaneous (PCCL) 313, 340, 360, 361, 366–70
for endoscopic polypectomy and laser ablation of benign bladder lesions 385, 388
equipment 363
procedure 366–70
prognosis 370–1
risks and complications 362
cystoscopy
bladder lesions (benign), laser ablation and polypectomy 383–8
bladder stones
basket retrieval 360, 361, 362, 363, 364–5
laser lithotripsy 365–6
equipment (cystoscope) 15, 16, 363
in percutaneous perineal approach to urethra 415
renal hematuria (idiopathic) 301, 303, 304, 305, 306
ureteral ectopia, laser ablation 351–9
ureteral obstruction
benign 311, 340
malignant 345
urethra
bulking agent injections 411
in percutaneous antegrade urethral catheterization 418
in percutaneous perineal approach in dogs 415, 416, 418
urethral stones
basket retrieval 360, 361, 362, 363, 364–5
laser lithotripsy 365–6
cystostomy tube, percutaneous 423–6
cystourethral junction, ultrasound-guided endoscopic laser ablation of transitional cell carcinoma involving 405
dalteparin 466, 469, 473, 476
degenerative mitral regurgitation 547, 548
desmitis 642, 643
digital fluoroscopy (digital radiography) 3–4
bladder tumor intra-arterial chemotherapy 391
bronchial collapse and stenting 83, 87
tracheal collapse and stenting 75
digital subtraction angiography (DSA) 3–4
cardiac tumor palliation 558, 561
epistaxis 45–6
hepatic arteriovenous malformation/fistula embolization 233
dilated cardiomyopathy, mitral regurgitation 547
dilation balloons see balloon dilation
diode laser ablation 17
bladder lesions (benign) 385, 387
ultrasound-guided endoscopic (UGELAB) 373, 398–409
ectopic ureters 354, 355
idiopathic renal hematuria 305
Dirofilaria immitis (heartworm) extraction 541–6
diuretics
benign ureteral obstruction interventions 319
cardiac tumor palliation 556, 557
cor triatrium dexter 607
hepatic arteriovenous malformation/fistula embolization 231
mitral/tricuspid stenosis 597
diverticula
bladder 275
kidney 268
ureteral 271
dogs see canine patients
Doppler imaging, pulmonary balloon valvuloplasty 576

dose considerations in chemotherapy 33
double-balloon technique
atrioventricular valvuloplasty 598, 599, 600, 601
pericardiectomy 514, 515–16
pulmonary valvuloplasty 585
double chamber
right or left atrium 604–9
right ventricle 585–6
double-contrast cystogram 265, 272
filling defect 274
intramural thickening 274
mucosal irregularity 273
double pigtail ureteral stent 12, 22–4,
305, 310, 314, 316, 317, 346, 434
doxorubicin 31
carboplatin and 32
extravasation 35
drainage (and drainage catheters) 10–11
gallbladder 256–60
pericardial effusions 513–17
renal pelvis 309–15
thoracic see pleural space
urethral 419, 421–2
drug-eluting beads (DEBs) with tumors/metastases 532
liver 238–9, 244
drug management see medical management
dual-chamber pacing
in AV block 518–19
lead positions 526
in sinus node dysfunction/sick sinus syndrome 519–20
dual-phase CT
arteriovenous malformations/
fistulas 480
epistaxis 44
liver 202, 203, 229
disorders 206–7, 207
ductus arteriosus, patent, dogs 11–12,
564–72
duodenoscopy in biliary procedures 249
duodenum
foreign body 150, 151
stents 184
duplications (congenital), caudal vena cava 511
dynamic CT angiography of liver 202, 203
echocardiography (incl. transthoracic)
aortic valve stenosis and its management 588, 591, 592, 593
arrhythmia ablation 530
atrioventricular valve stenosis and its management 595, 596, 597, 598,
600, 602
cardiac tumor palliation 556, 558, 559
cor triatrium (CT)
dexter (CTd) 605, 606
sinister (CTS) 607, 608, 609
heartworm extraction 541, 542, 543, 544, 546
mitral valve repair 550, 554
patent ductus arteriosus 565, 566,
567, 571
pericardiectomy (balloon) 516
pulmonary artery thrombus 475
pulmonary valve stenosis and its management 575, 576, 577, 578,
581, 584, 585
septal defects 610, 612, 613, 616, 618,
619, 620
ectopic ureters 263–6, 269–71, 351–9
endoscopy 286
injectable urethral bulking agents 413
deedge-to-edge mitral valve repair 549–51
effusions
pericardial, drainage 513–17
pleural, drainage see pleural space
electrocautery see cautery
electrophysiological measurements (incl. ECG) in arrhythmia ablation 534–5
equipment 532
electroporation with tumors,
irreversible 626
electrostimulation location (neuro-
electrostimulation; neuro-
location) 637, 639–40, 643–4, 644
embolism (pathological embolization) atrial septal occluder 614
gas, in cisternography 272
glue, in cisterna chyli and thoracic duct embolization 498–9
patent ductus arteriosus occlusion device 565
pulmonary thromboembolism 475–7
trapping devices for 468–9
embolization (technique) 629–34
arteriovenous malformations/ fistulas 480, 480–7
hepatic 229–36
non-target 231–2, 236, 481, 487
cisterna chyli and thoracic duct 497–502
coils see coils
hemorrhage 456–63
nasal 43–50, 457
maxillary artery (and branches) 43, 46, 47, 53–6, 112
prostatic artery 394–6
renal artery 306–7, 307
transarterial see transarterial access
tumors 629–34
with chemotherapy see chemoembolization
hepatic 238–46
nasal/sinus 51–2, 53–7, 59
oral 111, 112–14, 116
see also post-embolization syndrome
emesis see antiemetics; vomiting
empyema (pyothorax) 91, 98, 122
endocardial mapping 532, 534, 536, 537
endoscopic feeding tube
endoscopic nasojejunal tube (endNJT) 190, 192, 195
percutaneous see percutaneous endoscopic gastrojejunostomy;
percutaneous gastrostomy
endoscopic laser, vestibulovaginal remnants
endoscopic laser ablation
lower urinary tract (bladder and urethra)
benign lesions 383–8
vascular lesions, ultrasound-guided (UGELAB) 373, 398–409
vestibulovaginal remnants 427–31
endoscopic mucosal resection see mucosal resection
endoscopic nephrolithotomy see nephrolithotomy
endoscopic retrograde cholangiopancreatography 247–55
endoscopic retrograde ureteral stenting 331–2
endoscopy 15–28
large airway obstruction 101, 101–2
tools/equipment/devices 15–28
esophageal foreign body
retrieval 121
esophageal strictures 132–3
gastric foreign body retrieval 147, 148
gastrointestinal polypectomy 157
nutritional support techniques 190
urinary tract 288
urinary tract lower see uroendoscopy
upper, in pyonephrosis 311
see also percutaneous endoscopic gastrostomy and specific endoscopes
endotracheal tube (ET)
feeding tube placement 188
large airway obstruction 101
tracheal stenting 76, 78, 79
enoxaparin 466
enteral nutrition 187
epicardial mapping 532, 534, 535
epicardial ventricular tachycardia 533, 534
epidural analgesia 637–8, 644–6
epistaxis 43–50, 457
equipment/instruments/tools (incl. chapter end notes) 3–28
ablation of tumors 624–6, 627
bladder tumors 399–401, 409
analgesia 636–40, 647
arteriovenous malformation/fistula embolization 481, 487
hepatic 232, 236–7
biliary stenting/spincterotomy/ERCP 249–50, 254
bladder
benign lesions 384–7, 388
intra-arterial chemotherapy of tumors 391, 396
percutaneous cystotomy tube 423–4, 426
stone removal 363, 371
ultrasound-guided endoscopic laser ablation of transitional cell carcinoma 399–401, 409
cardiomechanical conditions and procedures
arrhythmia ablation 532–4
balloon aortic valvuloplasty 589–90
balloon atrioventricular valvuloplasty 598, 599, 600, 601, 602
balloon pericardioplasty 514
balloon pulmonary valvuloplasty 578–80, 586
patent ductus arteriosus occlusion 567
radiographic anatomy and guidance 505–6
septal defect closure 611–12, 615–17
tumor palliation 558, 563
cholecystectomy 257
cisterna chyli and thoracic duct embolization 499
endoscopy see endoscopy
esophageal obstruction
foreign body retrieval 120, 128–9
strictures 132–3, 143
feeding tube placement 189, 197
