SUBJECT INDEX

Page references followed by fig indicate an illustrated figure; followed by t indicate a table.

A
Academic achievement: academic skills courses and, 78; career and economic impacts of, 460–461; challenge and relationship to, 73–74; educational attainment and persistence and, 378–380; honors programs, 71, 127; interactions and research with faculty, 76–77; involvement in academic activities, 74; library experiences and, 74; main findings of within-college effects on, 557, 557–559; main points on conditional effects of college and, 563t; study abroad and, 75–76; work-integrated learning and, 74–75. See also Cognitive and intellectual development; Precollege preparation/ability
Academic engagement: between-college effects on educational values and integration of social and, 404–410; career and economic impacts of, 461–463; curricular innovations supporting, 126; enrollment intensity indicator of, 409–410; first-year experiences, 126; integrated academic experiences, 125–126; leadership skills development and, 209–211; moral development and challenging, 347–348; normative academic integration, 404; psychological well-being and, 215–216; psychosocial change and, 205–206; structural academic integration, 404; student-institution fit and, 408–409; within-college effects main findings on, 549–552, 558t. See also GPA (grade point average); Programmatic interventions
Academic major: between-college effects on educational and occupational values and, 292, 403–404; between-college effects on race/ethnic attitudes and, 281–282; cognitive and intellectual development and, 120–122; conditional effects on career and economic impacts by gender and, 470; impact on career and economic outcomes, 453–459; long-term college effects on sociopolitical, civic, and community attitudes, 315–316; moral development and, 344; psychosocial change and, 203; sociopolitical, civic, and community attitudes and values and, 273–274; various meanings and implications of, 9; with-in college effects and, 67–68; within-college effects main findings on, 546–548, 558t. See also STEM (science, technology, engineering, and mathematics) disciplines
Academic skills courses, 78
Accommodation, description of, 27
ACT: Alumni Outcomes Survey, 459; Collegiate Assessment of Academic Proficiency (CAAP), 23, 24; World of Work Map, 459
ACT scores: as between-college effects (1990s) measure, 34; college selectivity with 100 point higher score of, 436; earnings by institutional selectivity and, 441, 443. See also Standardized tests
Active learning (inductive teaching and learning): description and research on, 51–53; STEM discipline applications of, 52; studies on good practices contributing to, 93; within-college effects on moral development and, 348

Aesthetic approaches: description of, 58; STEM integration of, 59

African American students: academic self-concept of, 224; benefits of classroom diversity, 91; between-college effects by institutional selectivity and type and background of, 87–88; between-college effects of women’s colleges on, 39–40; cognitive development of, 138–139, 154–155; comparing college effects of HBCUs and PWIs, 40; comparing internal rate of return (IRR) on education for Whites and, 435; during college effects on psychosocial change on personal well-being of, 181; general personal development of, 232; institutional commitment and percentage of, 113; leadership skills development of, 226; net effect differences by background characteristics of, 86; positive association between fitness center use and GRE gains, 82; post-college health and health behaviors of female, 515–516; psychological well-being of, 229; racial harassment impact on psychological well-being of, 230–231; racial/ethnic and cultural diversity attitudes of, 303–305; religious and spiritual attitudes of, 314; residences and self-reporting learning by, 80; sociopolitical attitudes of, 300–301. See also Race/ethnicity differences; Students of color

Age differences, conditional effects on career and economic impacts by, 472

Alcohol use: alcohol use disorder, 499–500; college binge drinking, 511–512

Allport’s contact hypothesis, 251

American Indian students. See Native American students

American Psychiatric Association, 499

American University Office of Institutional Research and Assessment, 11

Appalachian College Association, 513

Argument diagramming (AD), effect of teaching students, 93

Armed Forces Qualifying Test, 32

Art appreciation: between-college effects, 296–297; change during college, 260; conditional effects of college, 313–314

Arts-based approaches: STEM integration of, 58; within-college effects of, 58

Asian/Pacific Islander students: academic self-concept of, 224–225; benefits of classroom diversity on, 91; between-college effects by institutional selectivity and type and background of, 87–88; during college effects on psychosocial change on personal well-being of, 181; general personal development of, 232; leadership skills, 226; psychological well-being, 229, 230; racial/ethnic and cultural diversity attitudes, 303–305; religious and spiritual attitudes by, 311; sociopolitical attitudes of, 300–301. See also Race/ethnicity differences; Students of color

Assessment: instructional role of, 48–49, 60; Program for the International Assessment of Adult Competences (PIACC) work on, 30–31; within-college effects of different types of, 60; within-college effects on moral development informed by faculty, 351

Assessment and Learning in Knowledge Spaces (ALEKs), 50, 91–92

Assessment instruments: ACT’s Collegiate Assessment of Academic Proficiency (CAAP), 23, 24; Armed Forces Qualifying Test, 32; Assessment and Learning in Knowledge Spaces (ALEKs), 50, 91–92; College Basic Academics Subjects Examination (CBASE), 32; Collegiate Learning Assessment (CLA), 113, 114; Critical Thinking dispositions Inventory (CCTDI), 130; Defining Issues Test-1 (DIT1), 336; Defining Issues Test-2 (DIT2), 336; Educational Testing Services’ (ETS) Proficiency Profile, 23, 33, 37; Ennis-Weir Critical Thinking Essay Test, 130; GRE (Graduate Record Examination), 23–24, 34; LSAT (Law School Admissions Test), 34, 35; MCAT (Medical College Admissions Test), 24, 34; National Assessment of Adult Literacy (2003), 29–30; NTE (National Teacher Examination), 34; Psychological Critical Thinking, 124; Water-Glaser Critical Thinking Appraisal, 124

Association of American Colleges and Universities (AAC&U), 331

Astin’s theory of student involvement, 73

Astin’s Understanding College and Its Influence on Students framework, 2fig–3

Athletes. See Intercollegiate athletics and recreation

Athletic profile status, 143, 157

Attitudes toward LGBT people: between-college effects on, 268, 289–290; change during college, 258; conditional effects of college, 309; within-college effects on, 325. See also Lesbians, gays, and bisexuals (LGBs) students

Attributional retraining (AR), description of, 51

Australian Bureau of Statistics, 31

Autonomy: between-college effects on, 190; during college effects on, 180; long-term effects of college on, 234–235; psychosocial change and, 227; within-college effects on, 211–214; within-college effects on psychosocial change of, 211–214
SUBJECT INDEX 755

B
Beginning Postsecondary Students (BPS), 406, 413
Beginning Postsecondary Students Longitudinal Study, 265–266, 317
Bias reduction, 251–252
Binge drinking, 511–512
Bisexual students. See Lesbians, gays, and bisexuals (LGBs) students
Black students. See African American students
Body mass index (BMI), 497–498, 509, 517–518, 522
British National child Development survey, 515
C
Campus environment. See Institutional environment
Capital: definition of, 488; human, 488. See also Human capital theory
Career and economic theories: career decision-making self-efficacy (CDMSE), 450, 452; career development theories, 424–427; human capital theory, 423, 426; status attainment theories, 424, 426
Career development: academic experiences and involvement impact on, 461–463; impact of employment during college on, 465; institutional mission and, 444; social involvement and extracurricular activities impact on, 463–465; theories on, 424–427; within-college effects on, 448–449, 481
Carnegie Classification Systems: between-college effects (1990s) of institutions by, 34, 37–38, 96, 97; between-college effects and cognitive development as function of, 112; on distinction between two-year and four-year institutions, 37; earnings and institutional ranking in, 446; major-job congruence and institutional ranking in, 445–446. See also Institutional types
Case study: description of, 54; within-college effects of, 54
Categorization-processing-adaptation-generalization (CPAG) model, 252
Character Building Colleges (CBCs), 341
Chicano students. See Latino/as students
Chickering and Reisser’s student development theory, 161
Civic attitudes/values: between-college effects, 264–266; change during college, 254–256; long-term college effects on, 314–319; net effects of college, 261–263; within-college effects on, 273–281. See also Community-civic involvement
Curricular engagement: academic self-concept and role of, 206–207; cognitive and intellectual development role of, 133–137; implications of college effects for, 598–600; moral development and, 352–353; psychological well-being and, 215–216; psychosocial change on leadership skills and, 209–211. See also Extracurricular engagement
Cognitive and intellectual development: between-college effects, 111–115, 145–147; change during college, 109–110, 145, 524–525, 528; conditional effects, 137–143, 154–157; increasing number of studies on, 105–106; long-term effects of college, 144–145, 157, 565–566, 571; net effects of college, 110, 145, 530, 532; theoretical overview of, 106–109, 144–145; within-college effects, 115–137, 147–154. See also Academic achievement; Student learning
Cognitive development theory: on critical thinking, 108–109; on postformal reasoning, 106–108
Cognitive dissonance: relationship between moral reasoning and, 349; within-college effects on moral development and, 349
Cognitive theory: Piaget’s adaptive processes of, 26–28; social cognitive career theory (SCCT), 425–427, 450, 452
Cohen’s $d$, 16–19, 20
Collaborative learning: cognitive and intellectual development and role of, 132; definition of, 52; team-based learning (TBL), 90; within-college effects and, 52–53
College: complicated conceptual meaning of, 8; “education effect” debate over attending, 261–263; examining the changes in the ways students are influenced by, 6–8; how the technological movement has changed notion of, 8–9; multifaceted purposes of receiving an education at, 159. See also Higher education; Students
College Basic Academics Subjects Examination (CBASE), 32

College binge drinking, 511–512

College effects: guidelines on metrics used for, 16–20; introduction to between-college, 34–42, 96–98; introduction to change during college, 28–31, 95–96; introduction to conditional, 85–94, 101–102; introduction to long-term effects, 94–95, 102; introduction to net effects, 31–34, 96; introduction to within-college effects, 42–85, 98–101; theoretical overview of research on student change and, 26–28. See also Effect size metrics.

Higher education; specific type of college effect

College effects implications: for educational practice, 591–600; for policymakers, 575–583; for research, 583–591

College impact research: policymaking, 579–582; use of discussion, 590–591; use of literature, 585–586; use of methodology, 586–589; use of results, 589–590; use of theory, 583–585

College major. See Academic major

College Scorecard (proposed), 597

College Student Experiences Questionnaire (CSEQ): on attendance at cultural events, 83; on between-college effects and institutional type, 37, 38; on between-college effects and selectivity, 36; college effects measurements by, 24; on net effect differences by student background, 86; on net effects of college, 33; on positive association between fitness center and GRE gains, 82; quality-of-effort measures of, 73; on social and extracurricular engagement, 79; on sociopolitical change, 254; on technological-enhanced information dissemination and retrieval, 49

College Student Survey (CSS), 254

College students. See Students

Collegiate Learning Assessment (CLA), 113, 114

Community attitudes/values: between-college effects, 264–266; change during college, 254–256; long-term college effects on, 314–319; net effects of college, 261–263; within-college effects on, 273–281

Community-civic involvement: between-college effects on, 509–510; change during and net effects of college on post-college, 504–507; conditional effects of college on, 518–519; institutional mission impact on future, 510; within-college effects on, 512–514. See also Civic attitudes/values; Political activities; Volunteerism

Community College Survey of Student Engagement, 36–37

Community colleges. See Two-year institutions

Community services: long-term effects on sociopolitical, civic, and community attitudes and, 317–319; within-college effects on sociopolitical, civic, and community attitudes and values and, 278–279

Concept maps, 55–56

Contact hypothesis, 251

Cooperative Institutional Research Program (CIRP) survey, 39

Cooperative learning: definition of, 52; team-based learning (TBL), 90; within-college effects and, 52–53

Council for Aid to Education, 105

Council for Higher Education Accreditation (CHEA), 105–106

Courses: academic skills, 78; between-college effects on educational values and integration and delivery format of, 396–398; cognitive and intellectual development and curricular interventions and, 119–137; cognitive development and writing and reading in, 152–154; critical thinking, 122–124; MOOCs (massive open online classes), 581; morally explicit, 344–345; morally implied, 345–346; online, 125. See also Online learning

Coursework: cognitive development through reading and writing, 152–154; diversity, 124; within-college effects and, 69–71

Critical thinking: changes during college between one and four years, 109; cognitive and intellectual development of, 109; courses on, 122–124; Pascarella and Terenzini’s guiding definition of, 108; Psychological Critical Thinking instrument for, 124; Water-Glaser Critical Thinking Appraisal of, 124; within-college effects on moral development and, 350–351

Critical Thinking dispositions Inventory (CCTDI), 130

Cross-racial interactions (CRI), 307–308

Cultural diversity attitudes: change during college, 256–257; long-term effects on race/ethnic and, 319; race/ethnicity and, 301–305; within-college effects on, 281–288. See also Diversity engagement

Cultural events within-college effects, 83

Curricular interventions: academic major and, 344; college effects implications for, 595–596; morally explicit and implied courses, 344–346; within-college effects on moral development and, 343–346

CWSEI (Carl Wieman Science Education Initiative) [University of British Columbia], 63
D
Delta-p, 19–20;
Diagnostic and Statistical Manual of Mental Disorders, 499
Digital natives, 49–52
Dimension-specific theories: gender identity theories, 164–166; leadership identity theories, 169; lesbian, gay, and bisexual identity theories, 166–167; multiple identities, intersectionality, and critical lenses, 167–169; multiracial identity theories, 164; psychological well-being (PWB) and thriving concepts of, 170; racial-ethnic identity theories, 162–164; spirituality and faith development theories, 167
Dispositional theory of job attitudes, 425
Distracted student learning studies: active learning, 51–52; attributional retraining (AR), 51; findings on student learning impact of distractions, 49–52; learning for mastery, 50–51
Diverse peer interaction facilitation studies, 132
Diversity engagement: academic self-concept and, 206; between-college effects on educational and occupational values and, 294–295; between-college effects on race/ethnic attitudes and, 283–287; cognitive and intellectual development and events of, 134–135; conditional effects on racial/ethnic and cultural diversity attitudes and, 306–308; cross-racial interactions (CRI), 307; diverse peer interaction facilitation studies on, 132–133; diversity coursework supporting, 124–125; implications of college effects for, 597–598; long-term college effects on sociopolitical, civic, and community attitudes, 316–317; psychological well-being and, 215; psychosocial change on leadership skills and, 208–209; sociopolitical, civic, and community attitudes and values and, 275–278. See also Cultural diversity attitudes; Institutional diversity; Structural diversity
Division I public universities cross-sectional study (2011), 207
“Double religious minority” students, 231

E
Earnings: academic achievement impact on, 460–461; academic experiences and involvement impact on, 463; academic major, occupational status, and, 457–459; career and economic impacts by gender and, 470–471, 484; career and economic impacts by race/ethnicity and, 471–472, 485; career and economic impacts by socioeconomic status, 473–474, 485; Carnegie Classification System ranking of institution and, 446; gender differences in, 441–442; impact of employment during college on, 466; impact of private vs. public institutions on, 447; institutional mission and, 445; institutional selectivity and, 441–443; institutional transfer impact on, 466–467; private rate of return on college for, 434–436; social involvement and extracurricular activities impact on, 465; STEM majors’ advantage in, 458; studies on net effects of college on, 432–434; within-college effects on, 449–450, 482–483. See also Economic benefits; Employment outcomes
Economic benefits: evidence of higher education’s continued, 577–578; implications for policymakers, 578–579. See also Earnings
Economics of Higher Education: Background, Concepts, and Applications (Toutkoushian and Paulsen), 434
Education and the Family (Feinstein, Duckworth, and Sabates), 510
“Education effect” debate, 261–263
Education Longitudinal Study (ELS), 399–400
Educational and occupational values: between-college effects and institutional mission, 270–271; between-college effects on, 292–296; change during college, 259–260; conditional effects of college, 311–313
Educational attainment and persistence: between-college effects on, 363–378, 415–416; conditional effects of college on, 410–413, 418–419; implications of college effects for, 595; long-term effects of college on, 413–414, 419; student’s precollege preparation/ability relationship to, 361–363; within-college effects on, 378–410, 416–418
Educational practice: cocurricular engagement, 598–600; curricular innovations, 595–596; implications of college effects on, 591–600; persistence and retention, 595; promoting diversity experience, 597–598; resource allocation, 596–597. See also Online learning; Teaching
Educational Testing Services’ (ETS) Proficiency Profile, 23, 33, 37
Effect size metrics: Cohen’s d, 16–19, 20; delta-p, 19–20; guidelines on, 16–20; overview of guidelines for, 19–20; standardized regression coefficient, 19, 20; What Works Clearinghouse on, 18. See also Methodology; Student learning change measures
Employed students: career and economic impacts on, 465–466; cognitive and intellectual development and, 135; educational attainment and persistence by, 393–394; overview of within-college effects on, 82–83; sociopolitical, civic, and community attitudes and values of, 281
Employment: career and economic impacts of college on, 439–440; conditional effects on career and economic impacts by gender and, 470; impact of private vs. public institutions on, 440–447, 469; institutional mission and, 443–445; institutional selectivity and, 440–443
Employment outcomes: academic achievement impact on, 460; conditional college effects on, 483–484; overview of, 430–432; private rate of return, 434–436; within-college effects on, 449, 481–482. See also Earnings
Ennis-Weir Critical Thinking Essay Test, 130
Erikson’s identity development theory, 160
Ethnic identity. See Racial-ethnic identity
Ethnic self-labeling: between-college effects on, 185–186; during college effects on, 174–175
Experiential learning theory, 27–28
Experiential labs: description and applications of, 54; within-college effects and, 54–55
Experiential learning theory, 27–28
Extracurricular engagement: attendance at educational values and integration and characteristics of, 395–396; student cognitive development role of, 127–133. See also Teachers; Teaching
Faculties: academic challenge, effort, and engagement related to interactions and research by, 76–77; between-college effects by institutional environment and role of, 41–42; between-college effects on educational values and integration and characteristics of, 395–396; student cognitive development role of, 127–133. See also Teachers; Teaching
Faculty interactions: academic challenge, effort, and engagement related to, 76–77; between-college effects on educational and occupational values and, 293–294; between-college effects on race/ethnic attitudes and, 282–283; cognitive development and, 128–133; main points of within-college effects on, 553–555, 558; research mentorship and, 127–128; within-college effects on academic self-concept and peer and, 203–205; within-college effects on leadership skills development and, 208; within-college effects on moral development and student and, 346–352; within-college effects on psychological well-being and, 214–215; within-college effects on sociopolitical, civic, and community attitudes and values and, 274–275; within-college effects on educational attainment and persistence and, 394–398. See also Interpersonal relationships
Faculty mentors: cognitive development through research mentorship by, 127–128; Multi-Institutional Study of Leadership on, 208; within-college effects on leadership skills and role of, 208
Faculty-student ratio, 368–369
Feedback: cognitive and intellectual development and role of, 131–132; instruction and role of, 48–49; teacher behaviors related to giving, 61–62
Financial aid: enhancement of student commitment through act of applying for, 393; within-college effects on educational attainment and persistence, 390–393
First-generation students, 142, 157
First-year experiences, 126
First-year seminars, 384–386, 412, 417
Foundational theories: Chickering and Reisser’s student development theory, 161; Marcia’s distinct identity statuses and tasks, 160–161; rooted in Erik Erikson’s classic work, 160; self-authorship theories, 161–162, 168; symbolic interactionism principle of, 162
The four component model (4CM), 335–336
Four-year institutions: between-college effects of (1990s) of, 34, 35; between-college effects and cognitive development, 112; between-college effects of two-year versus, 534–535, 542; between-college effects on educational attainment and persistence in two-year versus, 364–367; Carnegie classification distinction between two-year and, 37; comparing college effects of two-year and, 36–37; effect of enrolling on voter participation and volunteerism, 261
Fraternity and sorority participation: academic self-concept and, 207; attitudes toward LGBT people by, 309; between-college effects on race/ethnic attitudes and, 287; cognitive and intellectual development and, 134, 135; college binge drinking and, 511–512; gender identity development and, 198; limited cross-racial interactions (CRI) opportunities during, 307; overview of within-in college effects and, 80; sociopolitical, civic, and community attitudes and values and, 280; study on psychological well-being and, 218. See also Student organizations
Gay students. See Lesbians, gays, and bisexuals (LGBs) students
Gender differences: academic self-concept and, 223–225; conditional effects on career and economic impacts by, 470–476, 484; conditional effects on cognitive development by, 141, 156; educational and occupational values by, 311–312; institutional selectivity and earnings by, 441–442; institutional selectivity and sex-atypical career orientations by, 441; interest in the arts by, 313–314; leadership skills development by, 225–227; main points on conditional effects of college and, 561–562, 563; occupational gender concentration and employment sector by, 454–455; post-college health and health behaviors by, 515; psychological well-being by, 227–229; race/ethnicity attitudes by, 302; religious attitudes by, 310; sociopolitical, civic, and community attitudes by, 298–300; subjective well-being and life satisfaction by, 514–518. See also Men; Women
Gender identity: theories on, 164–166; within-college effects on, 198–199

Gender-role attitudes: between-college effects on, 288–289; change during college, 257; conditional effects of college, 308–309

General personal development: between-college effects on psychosocial change and, 191–192; student change psychological change and, 231–232; student self-reported gains in, 191; within-college effects on psychosocial change and, 218–220

General Social Survey (1972–1998), 514

GMAT, 80

GPA (grade point average): benefits of academic experiences to, 551; benefits of first-year seminars to, 412; employment outcomes and, 460; as indicator of student-institution fit, 408–409; as mediating relationship between academic integration and retention, 415, 418; recommended research on dysfunctional career thinking and, 452; as social and academic integration predictor, 404–407. See also Academic engagement
