Subject Index

A

ABAB experiment, 40
Abstinence education, 411–12, 411f
Accommodation, 21, 208–9
Active gene-environment association, 81
Adaptive behaviors, preparedness for social interaction and, 69
Adolescents standing trial as adults, 349–50
Adoption, 214–15
Adoption and Safe Families Act (ASFA), 420
Adoption studies, 77, 80, 370, 372
Adult Attachment Interview (AAI), 113–14, 113t, 118
Affect Knowledge Test, 153
African American children
aggressive behavior of, 364–66, 374
drug use and, 83
early childhood education for children in poverty and, 401
ethnic identity and, 166–71
parent-child interactions and, 51
physical appearance and peer status and, 240
prejudice against, 178–79
preverbal communication and, 181
racial integration in schools and, 273
smiling rates of, 131
suicide rates among, 150
teacher-student relationships of, 270
violence in, preventing, 391
Age cohort, 28, 43, 61
Aggression, 362–94. See also Bullying
abusive parents and, 373
adaptive/maladaptive functions, 26, 29, 91, 189, 237, 238, 351, 363, 364, 382
brain and, 371
child soldiers and, 375–76
coection model of, 373
combined biological and social influences on, 378–79, 379f
cultural determinants of, 377
developmental changes in, 17, 364–66, 365t, 393
deviancy training, 374
environmental triggers of, 380, 380f
gender differences in, 13, 366–68, 367f, 393
genetics and, 370, 370f, 380f
hormonal reasons for, 371–72
indirect aggression, 363, 364f, 382
individual differences, 27, 368–69, 393
neighbor influences on, 374–75
neurological basis of, 371
parents’ as providers of opportunities for, 373–74
parents’ influence on, 372–73
peer influences on, 374
prenatal conditions and, 372–73
sociocognitive factors in development of, 381–82
stability, 364, 368–69
temperament and, 370–71
types of, 363–64, 364f
violence in electronic media and, 377–78
Aggression, control of, 386–91
by catharsis (letting off steam), 387
by cognitive modification strategies, 387–88
multifaceted approach to, 389
parents as agents for, 388
schools as venue for intervention, 388
Aggression, determinants of
combined social and biological influences, 378–79, 379f
cultural determinants, 391
hormonal influences, 365f, 371–72
mass media influences, 372
neighborhood influences, 23, 366, 372, 374–79, 381, 394
neurological influences, 371
parental influences, 372–73
peer influences, 364, 365f, 372, 374
prenatal conditions, 372, 379, 393
sociocognitive factors, 381–82
stemperamental influences, 370–71
Aggression, theories of
biopsychological model, 370f
coection model, 373
social information processing model, 381, 382, 392
transactional model, 369, 378f, 384
Aggression, types of
direct aggression, 363, 382
hostile aggression, 363–65, 393
indirect aggression, 363, 383
instrumental aggression, 363, 365f, 393
physical aggression, 363, 364t
proactive aggression, 363
reactive aggression, 363
relational aggression, 363, 364t
social aggression, 363
verbal aggression, 363, 364t
Aggressive-rejected children, 237
Alper, Phillip, 291
Altruistic behavior, 351–57, 352f. See also Prosocial behavior
American Academy of Pediatrics, 276
American family, changing, 214–22
adoption, 214–15
divorce, 217–22
gay and lesbian parents, 215–16
parenting after thirty, 213–14
parenting alone, 216–17
remarriage, 221–22
reproductive technologies, new, 214
working mothers and, 212–13
working stress and children’s adjustment, 213
Amygdala, 69, 74–75, 75t, 307
Analysis of variance (ANOVA), 58
Androgynous, 323
Anger, 135–36
Anger recognition, 139
Anterior cingulate cortex (ACC), 74, 75t
Anterior insula (AI), 74, 73t
Anxious-ambivalent attachment, 105
564  Subject Index

Approach-avoidance behavior, 111
Approval-seeking prosocial reasoning, 353t
Asian American children, 159, 168, 172
Assimilation, 20
Assisted reproductive technique, 86
Associative play, 230, 231t
Attachment, 97–125
  to caregiver, 109–11
  consequences of (See Attachment, consequences of)
  cultural differences in, 108
  defined, 97
  development of, 102–3, 102t
  to father, 104, 109
  to grandparents, 103
  hormones necessary for secure attachment, 112
  infant characteristics and, 116
  infants’ attachment development, parents’ role in, 109–15
  in the making phase, 102t
  maternal bonding and, 100–1
  to mother, 103, 109
  mothers in prison and, 115–16
  to objects, 104
  in older children, 117–18
  parent’s input into (See Attachment, parents’ input into)
  representation, 113–14
  to siblings, 104
  stability of, 116–18
  theories of, 98–100
  types (See Attachment types)
Attachment, assessing, 119–23
  Attachment Q-Set (AQS), 107–9, 107t
California attachment procedure (CAP), 107
coding children’s behavior, 106
different cultures, 108
Strange Situation procedure, 108
Attachment, consequences of, 118–22
  in exploration and cognitive development, 118
  in later development, 120–22
  in self-esteem, 120
  in social development, 118–20, 120f
Attachment, parents’ input into, 109–16
  biological preparation for, 109
  caregiving and, 109–11
  children in child care and, 114–15
  continuity in, 113–14
  family and community contexts and, 111–13
  mothers in prison and, 115–16
Attachment Q-Set, 107–9, 107t
Attachment types, 104–8, 106f
Ainsworth’s classification of, 105
  assessing, other strategies for (See Attachment, assessing)
  brain and, 108–9
  insecure-ambivalent attachment (Type C), 105, 105t
  insecure-avoidant attachment (Type A), 105, 105t
  insecure-disorganized attachment (Type D), 105, 105t
  institutionalized children, 111
  relations between mother’s and children’s, 113t
  secure attachment (Type B), 105, 106t
Attention deficit/hyperactivity disorder (ADHD), 84, 88
Auditory preparedness for social interaction, 66–67
Authoritarian parenting, 194, 196t, 197, 208, 209
Authoritative parenting, 194, 196t, 196, 209, 219, 233, 340–41
Autism, 84–85, 160, 172–75, 307
Autism spectrum disorder (ASD), 84–85, 160, 172–75, 307
Autonomous adults, 113, 113t
Average children, based on sociometric evaluation, 236
Avoidance, 14, 90, 107, 111, 179, 246
Axon, 72

B
Babbling, 80, 132, 182
Baby and Child Care (Spock), 6, 52
Baltimore Study of Teenage Motherhood, 410
Becoming a Family project, 192
Beeper method, 49
Behavior genetics, 77–78
  adoption studies and, 77
  shared/nonshared environments and, 78
  twin studies and, 77
Biological foundations for social development, 65–96
  genetic, 76–87
  neurological, 69–75
  for social interaction, 66–69
  temperament, 87–94
Biological perspectives, 23–26
  ethological theory and, 24–25
  evolutionary developmental theory and, 25–26
  human behavior genetics and, 27
Biological preparedness, 66–69
  auditory (hearing) preparedness, 65–67
  biological rhythms, 66
  gustatory (taste) preparedness, 67–68
  olfactory (smell) preparedness, 67–68
  social rhythms, 66
  tactile (touch) preparedness, 67–68
  visual preparedness, 66, 67f
Biological rhythms, 66
Biopsychological model, 370f
Biracial and bicultural children and youth, 169
Bloods (gang), 259
Brain, 69–75
  aggression and, 370–71
  cerebral cortex and, 69, 70f
  experience-dependent processes and, 73
  experience-expectant processes and, 73
  growth and development of, 70–71, 73
  hemispheric specialization and, 71–72
  mirror neurons and, 73–75
  structures and, 72
  theory of mind and, 173
Brain imaging techniques. See Psycho physiological techniques
Brown, Brooks, 244
Bucharest Early Intervention Project, 39
Bullying, 382–84
  behavior of bullies and, 382
  conditions leading to, 386
  consequences of, 383, 386
  cyberfighting and cyberbullying and, 384–85
  Megan Pledge and, 385
  victimization, 382–83
Subject Index 565

Classical conditioning, 15, 16
Clear-cut attachment phase, 102t
Clinton, Bill, 420
Cliqués, 228, 240, 257, 365, 427
Coding: 54, 78, 105, 106, 129f, 246
Coevolution model of aggression, 373
Cognitive behavior therapy, 152, 350, 388
Cognitive development perspectives, 20–22
cognitive development theory and, Piaget’s, 20–21, 21t
social cognitive domain perspective and, 22
sociocultural theory and, Vygotsky’s, 22
Cognitive development theory, Piaget’s
attachment and, 99
cognitive developmental perspectives and, 21–22, 21t
Cognitive developmental theory of gender typing, 309–10
Cognitive factors in gender typing, 309–11
multischematic gender typing, 327
Cognitive learning perspectives, 17–19
cognitive social learning theory, 17
evaluating, 19
reciprocal determination and, 17–19, 18f
self-efficacy and, 19
Cognitive modification strategies, 387–88
Cognitive social learning theory, 17–19, 29, 311, 355
Cognitive theory of moral judgment, Kohlberg’s, 331–36, 332t, 333f
levels and stages in, 331–33, 332t, 333f
limitations of, 334–35
study of moral development revised and expanded from, 335–36
Cognitive theory of moral judgment, Piaget’s, 330–31
evaluation of, 331
stages of moral reasoning in, 330
Collective efficacy, 19, 264
Collective self, 157
Columbine massacre, 244
Communication, 181–85. \textit{See also Language}
babbling, 182
cooing, 182
critical listening skills and, 184
phonological processing and, 307–8
preverbal, 181
semantic development of, 182
speech adjustment and, 183–84
telegraphic speech and, 182–83
Comprehensive sex education, 411, 412, 424
Conscience
defined, 343
in Kohlberg’s theory of moral development, 332t
moral behavior and, development of, 343, 345, 347, 350, 351, 375
self-regulation and, 343
socialization and, 194
superego and, 12
temperament and, 90–91, 359
Constructs, 35, 55, 58, 158, 358
Contact maintenance, 106–7
Controversial children, based on sociometric evaluation, 236
Convention on the Rights of the Child (C.R.C.), 416–17
### 566 Subject Index

- Conventional level of moral development, 331–32, 332t, 333f
- Cooing, 182
- Cooperative learning, 167
- Cooperative play, 230, 231t
- Coparenting, 201
c-o- operative, 201, 220, 225
d-onald, 201
imbalanced, 201, 225
- Corporal punishment, 210, 416
cultural variations in use and effectiveness, 416
effectiveness, 416
negative effects, 416
prevalence of use, 417
- Corpus callosum, 71
- Cortisol, 56, 112
- Correlation, 35, 36, 58, 61, 81, 117, 290, 308, 354, 363, 433
- Critical period, 25, 100. See also Sensitive period
- Crowds, 259
- Cuddle hormone, 112
- Cyberbulling, 384–85
- Cyberfighting, 384–85
- D
Darfur, genocide in, 180
Data analyses, 58–59, 59f
analysis of variance (ANOVA), 58
correlation, 58
mediation, 58
path analysis, 58, 59f
Data collection methods, 47–58, 50f, 56f, 57f, 57t
direct observations, 53
eavesdropping techniques, 53
ethnography, 55
event sampling, 55
experience sampling method (ESM), 49, 50f, 61
focus groups, 51, 53, 55
interviews, 48, 49, 51, 53, 55
observer/interview bias, 53
puppet interviews, 48
questionnaires, 48, 49, 51, 53
reactivity issues, 53
self reports, 47–48, 53, 61
specimen record, 54–55, 62
structured diaries, 50
structured observations, 53–54, 62
surveys, 49, 55
time sampling, 55, 62
Debriefing, 60
Deception, 36, 60, 174, 346, 438
Delay of gratification, 90, 342
Dendrites, 72
Dependent variable, 36, 37, 39, 40
Depression. See Childhood depression
Desensitization, 16, 382
Deviance training, 374
Diagnostic and Statistical Manual of Mental Disorders (DSM-IV), 380
Diffusion, identity, 164t, 165
- Direct aggression, 363, 364t
- Direct observations, 53–54
naturalistic observations and, 53
structured observations and, 53–54
- Divorce, 217–22
- DNA
- autism and, 85
markers, 78
microarrays, 78
- Drive reduction theory, 15, 98–99
- Duchenne smiles, 131–32, 132f, 139
- Duplay smiles, 132, 132f
- E
Early Adolescent Temperament Questionnaire, 89t
Early Head Start, 399–400
Early starters, 368–70, 379
Earned secure attachment, 114
Eavesdropping techniques, 53
Ecological theory, 23, 24f
Ecological validity, 37, 38, 40, 54

Hedonistic reasoning, 332t, 352t, 352

Hemispheric lateralization, 71–72

Heritability factors, 77

Heterozygous, 79

Historical events, 8, 28

Holocaust, 180

Holophrases, 182

Homophily, 250–51

Homozygous, 79

Hormone replacement therapy, 305

Hormones
- aggression and, 371–72
- attachment and, 112
- biological preparation for parenthood and, 109
- defined, 56–58
- during pregnancy, fluctuations of
- social behavior and, 306
- testosterone, 109, 306, 371–72

Hostile aggression, 363, 364, 365t

Hostile attribution bias, 381, 387, 388

Human behavior genetics, 27, 76

Human Genome Project (HGP), 78–79

Human mirror neuron system, 74–76

Identity
- defined, 164
- ethnic, 166, 167t
- integration, 171
- outcomes, 164t
- rejection and, 241t
- religious, 170–71
- sexual orientation and, 171–72

Identity achievement, 164t, 165

Identity formation, 164–70. See also Ethnic identity
- in adulthood, 165
- identity outcomes and, 165, 164t
- influencing factors in, 165
- sexual orientation and, 171–72

Inflak, 7

Immanent justice, 330

Implicit Association Test (IAT), 179, 431

Imprinting, 100

In vitro fertilization (IVF), 202

Independent variable, 36, 37, 39, 40

Indirect aggression, 363, 364t, 382

Individual self, 157

Inferior frontal gyrus (IFG), 74, 75f

Information-processing perspectives, 19–20, 20f
- aggression and, development of, 381–82
- in gender typing, 309
- in reflective children, 239
- social information-processing model and, 238, 382
- social information-processing theory and, 19–20, 20f, 381

Informed consent, 59

Insecure-ambivalent attachment (Type C), 105, 106t

Insecure-avoidant attachment (Type A), 105, 106t

Insecure-disorganized attachment (Type D), 105, 106t

Insecure-resistant attachment, 106–7

Institutional review boards (IRBs), 59

Institutionalized children, attachment types in, 111t

Instrumental aggression, 363

Instrumental characteristics, 301

Intentions
- cognitive modification strategies and, 387–88
- early understanding of, 172
- other people’s, understanding, 25–26, 74, 176, 251
- in Piaget’s theory of moral development, 331

Internal working model, 113

Internalized reasoning, 352–53

Internalizing problems, 90–91, 343

Internet, 286–90
- access and use of, 286
- identity, 287
- mental health affected by, 289–90
- sex, effects of, 289
- sexting, 289, 291, 295
- social relationships affected by, 287–88

Interparietal sulcus (IPS), 74, 75f

Interventions
- defined, 38
- for boosting self-esteem, 161–63
- for childhood depression, 152
- for children in high-stress situations, 64
- for improving social perspective-taking ability, 173
- for “lost and found” children, 39
- for peer relations problems, 236
- for preventing youth violence, 391
- policy-based, 398t, 402, 420
- TV-based, 318

Interviews, 21, 47–49, 51, 53, 55, 58, 87, 113, 167, 331, 334, 419
