## Contents

*Introduction*  

**Chapter 1**  

**Group Policy Essentials**  

- Getting Ready to Use This Book  
- Getting Started with Group Policy  
  - Group Policy Entities and Policy Settings  
- Active Directory and Local Group Policy  
  - Understanding Local Group Policy  
  - Group Policy and Active Directory  
  - Linking Group Policy Objects  
  - Final Thoughts on Local GPOs  
- An Example of Group Policy Application  
- Examining the Resultant Set of Policy  
  - At the Site Level  
  - At the Domain Level  
  - At the OU Level  
  - Bringing It All Together  
- Group Policy, Active Directory, and the GPMC  
  - Implementing the GPMC on Your Management Station  
  - Creating a One-Stop-Shop MMC  
- Group Policy 101 and Active Directory  
  - Active Directory Users and Computers vs. GPMC  
  - Adjusting the View within the GPMC  
  - The GPMC-centric View  
- Our Own Group Policy Examples  
  - More about Linking and the Group Policy Objects Container  
  - Applying a Group Policy Object to the Site Level  
  - Applying Group Policy Objects to the Domain Level  
  - Applying Group Policy Objects to the OU Level  
  - Testing Your Delegation of Group Policy Management  
  - Understanding Group Policy Object Linking Delegation  
  - Granting OU Admins Access to Create New Group Policy Objects  
  - Creating and Linking Group Policy Objects at the OU Level  
  - Creating a New Group Policy Object Affecting Computers in an OU  
  - Moving Computers into the Human Resources Computers OU  
  - Verifying Your Cumulative Changes  
- Final Thoughts  

*COPYRIGHTED MATERIAL*
# Chapter 2 Managing Group Policy with the GPMC and via PowerShell

- Common Procedures with the GPMC and PowerShell
  - Raising or Lowering the Precedence of Multiple Group Policy Objects
  - Understanding GPMC’s Link Warning
  - Stopping Group Policy Objects from Applying
  - Block Inheritance
  - The Enforced Function
- Security Filtering and Delegation with the GPMC
  - Filtering the Scope of Group Policy Objects with Security
  - User Permissions on Group Policy Objects
  - Granting Group Policy Object Creation Rights in the Domain
  - Special Group Policy Operation Delegations
  - Who Can Create and Use WMI Filters?
- Performing RSOP Calculations with the GPMC
  - What’s-Going-On Calculations with Group Policy Results
  - What-If Calculations with Group Policy Modeling
- Searching and Commenting Group Policy Objects and Policy Settings
  - Searching for GPO Characteristics
  - Filtering Inside a GPO for Policy Settings
  - Comments for GPOs and Policy Settings
- Starter GPOs
  - Creating a Starter GPO
  - Editing a Starter GPO
  - Leveraging a Starter GPO
  - Delegating Control of Starter GPOs
  - Wrapping Up and Sending Starter GPOs
  - Should You Use Microsoft’s Pre-created Starter GPOs?
- Back Up and Restore for Group Policy
  - Backing Up Group Policy Objects
  - Restoring Group Policy Objects
  - Backing Up and Restoring Starter GPOs
  - Backing Up and Restoring WMI Filters
  - Backing Up and Restoring IPsec Filters
- Migrating Group Policy Objects between Domains
  - Basic Interdomain Copy and Import
  - Copy and Import with Migration Tables
- GPMC At-a-Glance Icon View
- Final Thoughts
### Chapter 3  Group Policy Processing Behavior Essentials  169

- Group Policy Processing Principles  170
- Don’t Get Lost  172
- Initial Policy Processing  172
- Background Refresh Policy Processing  174
- Security Background Refresh Processing  187
- Special Case: Moving a User or a Computer Object  193
- Windows 8, 8.1, and 10 Group Policy: Subtle Differences  194
- Policy Application via Remote Access, Slow Links, and after Hibernation  200
  - When and How Does Windows Check for Slow Links?  200
  - What Is Processed over a Slow Network Connection?  201
  - Always Get Group Policy (Even on the Road, through the Internet)  202
- Using Group Policy to Affect Group Policy  205
  - Affecting the User Settings of Group Policy  205
  - Affecting the Computer Settings of Group Policy  207
  - The Missing Group Policy Preferences Policy Settings  219
- Final Thoughts  221

### Chapter 4  Advanced Group Policy Processing  223

- Fine-Tuning When and Where Group Policy Applies  223
  - Using WMI Filters to Filter the Scope of a Group Policy Object (Itself)  224
  - Using PolicyPak Admin Templates Manager to Filter the Scope of a Group Policy Object’s Contents  230
- Group Policy Loopback Processing  231
  - Reviewing Normal Group Policy Processing  232
  - Group Policy Loopback—Merge Mode  233
  - Group Policy Loopback—Replace Mode  233
  - Loopback without Loopback (Switched Mode with PolicyPak Application Manager and PolicyPak Admin Templates Manager)  239
- Group Policy with Cross-Forest Trusts  242
  - What Happens When Logging onto Different Clients across a Cross-Forest Trust?  243
  - Disabling Loopback Processing When Using Cross-Forest Trusts  245
  - Understanding Cross-Forest Trust Permissions  245
- Final Thoughts  247
### Chapter 5
#### Group Policy Preferences 249

- Powers of the Group Policy Preferences 252
  - Computer Configuration ➔ Preferences 258
  - User Configuration ➔ Preferences 269
- Group Policy Preferences Concepts 278
  - Preference vs. Policy 279
  - The Overlap of Group Policy vs. Group Policy Preferences and Associated Issues 281
  - The Lines and Circles and the CRUD Action Modes 293
  - Common Tab 301
- Group Policy Preferences Tips, Tricks, and Troubleshooting 313
  - Quick Copy, Drag and Drop, Cut and Paste, and Sharing of Settings 313
  - Multiple Preference Items at a Level 315
  - Temporarily Disabling a Single Preference Item or Extension Root 317
  - Environment Variables 318
  - Managing Group Policy Preferences: Hiding Extensions from within the Editor 320
  - Troubleshooting: Reporting, Logging, and Tracing 321
- Giving Group Policy Preferences a “Boost” (Using PolicyPak Preferences Manager and PolicyPak Cloud) 329
  - Using PolicyPak Preferences Manager to Maintain Group Policy Preferences while Offline 330
  - Using PolicyPak Preferences Manager to Deliver Group Policy Preferences Using “Not Group Policy” 330
  - Delivering Group Policy Preferences over the Internet Using PolicyPak Cloud (to Domain-Joined and Non–Domain-Joined Machines) 331
- Final Thoughts 332

### Chapter 6
#### Managing Applications and Settings Using Group Policy 335

- Understanding Administrative Templates 336
  - Administrative Templates: Then and Now 336
  - Policy vs. Preference 337
- Exploring ADM vs. ADMX and ADML Files 342
  - Looking Back at ADM Files 342
  - Understanding the Updated GPMC’s ADMX and ADML Files 342
  - Comparing ADM vs. ADMX Files 344
ADMX and ADML Files: What They Do and the Problems They Solve 345
  Problem and Solution 1: Tackling SYSVOL Bloat 345
  Problem 2: How Do We Deal with Multiple Languages? 346
  Problem 3: How Do We Deal with “Write Overlaps”? 347
  Problem 4: How Do We Distribute Updated Definitions to All Our Administrators? 349
The Central Store 349
  The Windows ADMX/ADML Central Store 351
Creating and Editing GPOs in a Mixed Environment 355
  Scenario 1: Start by Creating and Editing a GPO Using the Older GPMC; Edit Using Another Older GPMC Management Station 355
  Scenario 2: Start by Creating and Editing a GPO with the Older GPMC; Edit Using the Updated GPMC 356
  Scenario 3: Start by Creating and Editing a GPO Using the Updated GPMC; Edit Using Another Updated GPMC Management Station 358
  Scenario 4: Start by Creating and Editing a GPO Using an Updated GPMC Management Station; Edit Using an Older GPMC Management Station 358
Using ADM and ADMX Templates from Other Sources 359
  Using ADM Templates with the Updated GPMC 359
  Using ADML Templates from Other Sources 361
ADMX Migrator and ADML Editor Tools 362
  ADMX Migrator 363
  ADML Creation and Editor Tools 365
PolicyPack Application Manager 365
  PolicyPack Concepts and Installation 367
  Top PolicyPack Application Manager Pak Examples 369
  Understanding PolicyPack Superpowers and What Happens When Computers Are Off the Network 373
Final Thoughts 376

Chapter 7 Troubleshooting Group Policy 379
Under the Hood of Group Policy 381
  Inside Local Group Policy 381
  Inside Active Directory Group Policy Objects 383
The Birth, Life, and Death of a GPO 385
  How Group Policy Objects Are “Born” 386
  How a GPO “Lives” 387
  Death of a GPO 415
Contents

How Client Systems Get Group Policy Objects 416
   The Steps to Group Policy Processing 416
   Client-Side Extensions 419
   Where Are Administrative Templates Registry Settings Stored? 427
Why Isn't Group Policy Applying? 429
   Reviewing the Basics 429
   Advanced Inspection 432
Client-Side Troubleshooting 441
   RSoP for Windows Clients 442
Advanced Group Policy Troubleshooting with the Event Viewer Logs 450
   Group Policy Processing Performance 462
Final Thoughts 463

Chapter 8  Implementing Security with Group Policy 465
The Two Default Group Policy Objects 466
   GPOs Linked at the Domain Level 467
   Group Policy Objects Linked to the Domain Controllers OU 471
Oops, the “Default Domain Policy” GPO and/or “Default Domain Controllers Policy” GPO Got Screwed Up! 473
The Strange Life of Password Policy 475
   What Happens When You Set Password Settings at an OU Level 475
   Fine-Grained Password Policy 477
Inside Basic and Advanced Auditing 482
   Basic Auditable Events Using Group Policy 482
   Auditing File Access 487
   Auditing Group Policy Object Changes 489
   Advanced Audit Policy Configuration 491
Restricted Groups 495
   Strictly Controlling Active Directory Groups 497
   Strictly Applying Group Nesting 499
   Which Groups Can Go into Which Other Groups via Restricted Groups? 500
Restrict Software Using AppLocker 500
   Inside Software Restriction Policies 501
   Software Restriction Policies’ “Philosophies” 502
   Software Restriction Policies’ Rules 503
   Restricting Software Using AppLocker 510
Contents

Controlling User Account Control with Group Policy 531
  Just Who Will See the UAC Prompts, Anyway? 534
  Understanding the Group Policy Controls for UAC 539
  UAC Policy Setting Suggestions 548
Wireless (802.3) and Wired Network (802.11) Policies 551
  802.11 Wireless Policy for Windows XP 552
  802.11 Wireless Policy and 802.3 Wired Policy for Modern Windows 553
Configuring Windows Firewall with Group Policy 554
  Manipulating the Windows Firewall (the Old Way) 557
  Windows Firewall with Advanced Security WFAS 558
  IPsec (Now in Windows Firewall with Advanced Security) 567
  How Windows Firewall Rules Are Ultimately Calculated 572
Final Thoughts 576

Chapter 9

Profiles: Local, Roaming, and Mandatory 579

Setting the Stage for Multiple Clients 579
What Is a User Profile? 583
  The NTUSER.DAT File 583
  Profile Folders for Type 1 Computers (Windows XP and Windows 2003 Server) 584
  Profile Folders for Type 2–5 Computers (Windows Vista and Later) 586
  The Default Local User Profile 591
  The Default Network User Profile 594
Roaming Profiles 599
  Are Roaming Profiles “Evil”? And What Are the Alternatives? 601
  Setting Up Roaming Profiles 604
  Testing Roaming Profiles 608
  Roaming and Nonroaming Folders 610
  Managing Roaming Profiles 614
  Manipulating Roaming Profiles with Computer Group Policy Settings 617
  Manipulating Roaming Profiles with User Group Policy Settings 630
Mandatory Profiles 635
  Establishing Mandatory Profiles for Windows XP 636
  Establishing Mandatory Profiles for Modern Windows 638
  Mandatory Profiles—Finishing Touches 639
  Forced Mandatory Profiles (Super-Mandatory) 640
Final Thoughts 642
## Chapter 10
The Managed Desktop, Part 1: Redirected Folders, Offline Files, and the Synchronization Manager 643

Redirected Folders 644
Available Folders to Redirect 644
Redirected Documents/My Documents 645
Redirecting the Start Menu and the Desktop 665
Redirecting the Application Data Folder 666
Group Policy Setting for Folder Redirection 667
Troubleshooting Redirected Folders 669

Offline Files and Synchronization 672
Making Offline Files Available 673
Inside Windows 10 File Synchronization 676
Handling Conflicts 684
Client Configuration of Offline Files 686

Using Folder Redirection and Offline Files over Slow Links 694
Synchronizing over Slow Links with Redirected My Documents 695
Synchronizing over Slow Links with Regular Shares 697
Teaching Windows 10 How to React to Slow Links 698
Using Group Policy to Configure Offline Files (User and Computer Node) 702
Troubleshooting Sync Center 710
Turning Off Folder Redirection’s Automatic Offline Caching for Desktops 712

Final Thoughts 720

## Chapter 11
The Managed Desktop, Part 2: Software Deployment via Group Policy 723

Group Policy Software Installation (GPSI) Overview 724
The Windows Installer Service 726
Understanding .MSI Packages 726
Utilizing an Existing .MSI Package 727
Assigning and Publishing Applications 732
Assigning Applications 732
Publishing Applications 733
Rules of Deployment 734
Package-Targeting Strategy 734

Advanced Published or Assigned 745
The General Tab 746
The Deployment Tab 746
The Upgrades Tab 750
The Categories Tab 752
The Modifications Tab 752
The Security Tab 754
Default Group Policy Software Installation Properties 755
  The General Tab 755
  The Advanced Tab 756
  The File Extensions Tab 757
  The Categories Tab 757
Removing Applications 757
  Users Can Manually Change or Remove Applications 758
  Automatically Removing Assigned or Published .MSI Applications 758
  Forcibly Removing Assigned or Published .MSI Applications 759
Using Group Policy Software Installation over Slow Links 761
MSI, the Windows Installer, and Group Policy 764
  Inside the MSIEXEC Tool 764
  Patching a Distribution Point 765
  Affecting Windows Installer with Group Policy 767
 Deploying Office 2010 and Later Using Group Policy (MSI Version) 771
  Steps to Office 2013 and 2016 Deployment Using Group Policy 772
  Result of Your Office Deployment Using Group Policy 782
Installing Office Using Click-to-Run 783
  Getting Office Click-to-Run 784
  Installing Office Click-to-Run by Hand 784
  Deploying Office Click-to-Run via Group Policy 786
System Center Configuration Manager vs. Group Policy (and Alternatives) 793
Final Thoughts 796

Chapter 12  Finishing Touches with Group Policy: Scripts, Internet Explorer, Hardware Control, Printer Deployment, Local Admin Password Control 797
Scripts: Logon, Logoff, Startup, and Shutdown 798
  Non-PowerShell-Based Scripts 798
  Deploying PowerShell Scripts to Windows 7 and Later Clients 801
Managing Internet Explorer with Group Policy 802
  Managing Internet Explorer with Group Policy Preferences 803
  Internet Explorer's Group Policy Settings 805
Understanding Internet Explorer 11’s Enterprise Mode 806
Managing Internet Explorer 11 Using PolicyPak Application Manager 808
Restricting Access to Hardware via Group Policy 808
  Group Policy Preferences Devices Extension 809
Restricting Driver Access with Policy Settings 814
Getting a Handle on Classes and IDs 815
Restricting or Allowing Your Hardware via Group Policy 817
Understanding the Remaining Policy Settings for Hardware Restrictions 819
Assigning Printers via Group Policy 821
  Zapping Down Printers to Users and Computers (a Refresher) 821
Implementing Rotating Local Passwords with LAPS 830
  What to Install from LAPS 831
Extending the Schema and Setting LAPS Permissions 832
Using a Group Policy Object to Manage LAPS 835
Using LAPS Management’s Tools: Fat Client and PowerShell 836
Final Thoughts for This Chapter and for the Book 838

Appendix A Scripting Group Policy Operations with Windows PowerShell 839
Using PowerShell to Do More with Group Policy 840
  Preparing for Your PowerShell Experience 841
Getting Started with PowerShell 842
Documenting Your Group Policy World with PowerShell 846
Setting GPO Permissions 867
Manipulating GPOs with PowerShell 870
Performing a Remote GPupdate (Invoking Gpupdate) 880
Replacing Microsoft’s GPMC Scripts with PowerShell Equivalents 881
Final Thoughts 883

Appendix B Group Policy and VDI 885
Why Is VDI Different? 886
Tuning Your Images for VDI 887
  Specific Functions to Turn Off for VDI Machines 888
  Group Policy Settings to Set and Avoid for Maximum VDI Performance 889
Group Policy Tweaks for Fast VDI Video 891
  Tweaking RDP Using Group Policy for VDI 891
  Tweaking RemoteFX using Group Policy for VDI 892
Managing and Locking Down Desktop UI Tweaks 893
Final Thoughts for VDI and Group Policy 894
Appendix C  Advanced Group Policy Management  897
The Challenge of Group Policy Change Management  898
Architecture and Installation of AGPM  899
  AGPM Architecture  899
  Installing AGPM  900
What Happens after AGPM Is Installed?  906
  GPMC Differences with AGPM Client  906
  What’s With All the Access Denied Errors?  908
  Does the World Change Right Away?  908
Understanding the AGPM Delegation Model  908
  AGPM Delegation Roles  909
AGPM Common Tasks  912
  Understanding and Working with AGPM’s Flow  914
  Controlling Your Currently Uncontrolled GPOs  915
  Creating a GPO and Immediately Controlling It  918
  Check Out a GPO  919
  Viewing Reports about a Controlled GPO  921
  Editing a Checked-Out Offline Copy of a GPO  921
  Performing a Check In of a Changed GPO  923
  Deploying a GPO into Production  924
  Making Additional Changes to a GPO and Labeling a GPO  926
  Using History and Differences to Roll Back a GPO  927
  Using “Import from Production” to Catch Up a GPO  931
  Uncontrolling, Restoring, and Destroying a GPO  932
  Searching for GPOs Using the Search Box  934
AGPM Tasks with Multiple Admins  935
  E-mail Preparations and Configurations for AGPM Requests  936
  Adding Someone to the AGPM System  939
  Requesting the Creation of New Controlled GPO  943
  Approving or Rejecting a Pending Request  944
  Editing the GPO Offline via Check Out/Check In  946
  Requesting Deployment of the GPO  946
  Analyzing a GPO (as a Reviewer)  948
Advanced Configuration and Troubleshooting of AGPM  950
  Production Delegation  950
  Auto-Deleting Old GPO Versions  951
  Export and Import of Controlled GPOs between Forests and/or Domains  951
  Troubleshooting AGPM Permissions  953
  Leveraging AGPM Templates  955
