Index

Page numbers followed by f and t refer to figures and tables, respectively. Page numbers followed by n. refer to the footnote number.

Academy Awards, 171–175
Accent, as communication barrier, 428
Accuracy:
of consensus, 192–193
of crowd vs. experts, 215–219
and diversity of crowd, 194–198
domain-specific knowledge as condition of, 178–179
enhanced by research, 322f
in estimating intrinsic value, 320–326
of evidence, 384f, 385
impact of bias on, 220–221
and independence of crowd, 198–199
of individuals vs. consensus, 172–174, 173t
of initial impressions, 410
of model, and diversity of crowd, 182n.10
and precision, 11f
reduced with precision, 12f
risk reduced with, 12f, 323f, 325f, 326f
of wisdom of crowds, 200–212
Ackman, Bill, 15n.7, 41, 261, 280–283, 303, 340n.1, 420
Acronyms, using, 428n.18
Actual redemptions, 293
Actual return, 284f, 319
Actual risk, 300
Adequacy, of evidence, 384f, 385
Adoption, barriers to, 361–363, 395f
Advantage due to government policy, 93
Age bias, 415
Aggregation of information:
about individual behavior, 231
and incorporation, 176, 187, 188
in information cascades, 243
and limits to incorporation, 256
and market efficiency, 175
private, 190–191
and systematic biases, 227
Aggressive portfolio managers, 405
Akerlof, George, 180
All available information, 161–163, 163f
for informational and analytical advantage, 285–292
required to estimate intrinsic value, 157
in variant perspectives, 270–271
Alpha:
generating, 149
and market efficiency, 145, 263
as zero-sum game, 151–155
Ambady, Nalini, 410
Analysts:
capability/credibility of, 411–413, 412f
prime directive of, 405
roles of portfolio managers vs., 339
Analytical advantage, 10
  defined, 274
  and informational advantage, 285–292
  of research, 278–284
Anchor bias, 229
Annual report, in pitch pack, 398
Anticipated redemptions, 293
Appearance, physical, 415–421
Appendix, pitch, 403, 405
Apple, Inc.:
  earning estimates of, 215–216, 216f, 218f, 220
  liquidation value of, 74n.2
  price spread of, 257–259, 257f
Argument(s):
  attacks on, in Q&A period, 404
  connection of evidence and, 386–387
  constructing, 383–389
  follow-up questions about, 392
  presenting, in pitches, 381
  in stress-testing of pitch, 391
  in Toulmin model, 384
Argumentation, Toulmin model of, 383–389
Aristotle, 391
“The Arithmetic of Active Management” (Sharpe), 152
Asking questions:
  to achieve perfect pitch, 381, 381f
  identifying subjective criteria by, 365
Asness, Cliff, 238
Assets:
  cash flow generated by operating, 79–85
  cash flow generated by selling, 71–79, 71f
  discounted cash flow model and prices of, 247
Asset valuation, 25–42, 26f
  cash flow, 26–29
  factors influencing, 2f
  intrinsic value and method of, 234–235, 235f
  time value of money, 34–41
  uncertainty, 30–34
  value of an asset, 95, 224, 225f
Associated Capital, 258–259, 258f, 261
Astrology, financial, 181n.9
Asymmetric returns, 330
Asymmetry, information, 180–181
Attention, capturing and keeping
  portfolio managers’, 372–378, 395
Attractiveness, hairstyle and, 416–417
Audience, for pitch, 337–338
Availability bias, 229
Available information:
  dissemination of, 176, 177
  and market efficiency, 175
  systematic errors related to, 227
Average individual error:
  and diversity of crowd, 217
  in diversity prediction theorem, 195–197
  impact of bias on, 199, 220
Back for warrant:
  in stress-testing of pitch, 391
  in Toulmin model of argumentation, 387
Balance sheet, 82f
Balance sheet metrics, 402
Barron’s, 363
