# BRIEF CONTENTS

## PART I  An Introduction: Basic Issues and Processes  1

- **Chapter 1**  An Overview of Psychology and Health  1
- **Chapter 2**  The Body’s Physical Systems  30

## PART II  Stress, Illness, and Coping  57

- **Chapter 3**  Stress—Its Meaning, Impact, and Sources  57
- **Chapter 4**  Stress, Biopsychosocial Factors, and Illness  82
- **Chapter 5**  Coping With and Reducing Stress  112

## PART III  Lifestyles to Enhance Health and Prevent Illness  135

- **Chapter 6**  Health-Related Behavior and Health Promotion  135
- **Chapter 7**  Substance Use and Abuse  167
- **Chapter 8**  Nutrition, Weight Control and Diet, Exercise, and Safety  200

## PART IV  Becoming Ill and Getting Medical Treatment  232

- **Chapter 9**  Using Health Services  232
- **Chapter 10**  In the Hospital: The Setting, Procedures, and Effects on Patients  260

## PART V  Physical Symptoms: Pain and Discomfort  288

- **Chapter 11**  The Nature and Symptoms of Pain  288
- **Chapter 12**  Managing and Controlling Clinical Pain  314

## PART VI  Chronic and Life-Threatening Health Problems  336

- **Chapter 13**  Serious and Disabling Chronic Illnesses: Causes, Management, and Coping  336
- **Chapter 14**  Heart Disease, Stroke, Cancer, and AIDS: Causes, Management, and Coping  365

## PART VII  Looking to the Future  394

- **Chapter 15**  What’s Ahead for Health Psychology?  394
CONTENTS

PART I An Introduction: Basic Issues and Processes 1

Chapter 1 An Overview of Psychology and Health 1
What is Health? 2
An Illness/Wellness Continuum 2
Illness Today and in the Past 2
Viewpoints from History: Physiology, Disease Processes, and the Mind 5
Early Cultures 5
Ancient Greece and Rome 5
The Middle Ages 6
The Renaissance and After 6
Seeing a Need: Psychology’s Role in Health 7
Problems in the Health Care System 7
“The Person” in Health and Illness 8
Assess Yourself: What’s Your Lifestyle Like? 8
How the Role of Psychology Emerged 10
Health Psychology: The Profession 12
Clinical Methods and Issues: Behaviorism’s Legacy: Progress in Health Psychology’s Goals 12
Current Perspectives on Health and Illness 13
The Biopsychosocial Perspective 13
Life-Span and Gender Perspectives 16
Related Scientific Fields: Foundations and Connections for Health Psychology 17
Related Fields 17
Highlight: Related Nonpsychology Careers 18
Health and Psychology across Cultures 20
Research Methods 21
Experiments 21
Correlational Studies 23
Quasi-Experimental Studies 24
Genetics Research 26
Which Research Method Is Best? 28

Chapter 2 The Body’s Physical Systems 30
Module 1: The Nervous System 31
How the Nervous System Works 31
The Central Nervous System 33
Clinical Methods and Issues: Biofeedback Treatment for Paralysis 36
The Peripheral Nervous System 36
Module 2: The Endocrine System 38
The Endocrine and Nervous Systems Working Together 38
Adrenal Glands 39
Other Glands 39
Highlight: Our Physiological Individuality 40
Module 3: The Digestive System 41
Food’s Journey through Digestive Organs 41
Using Nutrients in Metabolism 43
Assess Yourself: How Many Calories Do You Burn While Resting? 44
Module 4: The Respiratory System 44
The Respiratory Tract 44
Respiratory Function and Disorders 45
Module 5: The Cardiovascular System 46
The Heart and Blood Vessels 47
Blood Pressure 48
Blood Composition 49
Cardiovascular Disorders 50
Module 6: The Immune System 50
Antigens 51
The Organs of the Immune System 51
Soldiers of the Immune System 52
Defending the Body with an Immune Response 53
Highlight: When Immune Functions Are Absent 54
Less-Than-Optimal Defenses 55

PART II Stress, Illness, and Coping 57

Chapter 3 Stress—Its Meaning, Impact, and Sources 57
Experiencing Stress in Our Lives 58
What Is Stress? 58
Appraising Events as Stressful 59
Clinical Methods and Issues: Posttraumatic Stress Disorder (PTSD) 61
Dimensions of Stress 61
Biopsychosocial Aspects of Stress 62
Biological Aspects of Stress 62
Psychosocial Aspects of Stress 65
Sources of Stress throughout Life 67
Sources within the Person 67
Sources in the Family 68
Sources in the Community and Society 71
Highlight: Gender Differences in Caregiving? 71
Highlight: Does Environmental Stress Affect Reactivity to New Stressors? 74
Measuring Stress 74
Physiological Arousal 74
Life Events 75
Daily Hassles  77
Chronic Stressors in Specific Domains  78

**Can Stress Be Good for You?**  78
   - Assess Yourself: Hassles in Your Life  78

Chapter 4  Stress, Biopsychosocial Factors, and Illness  82

**Psychosocial Modifiers of Stress**  83
   - Social Support  83
   - A Sense of Personal Control  89
   - Personality Factors in Stress  93
   - Type A Behavior and Beyond  95

**How Stress Affects Health**  98
   - Stress, Behavior, and Illness  98
   - Stress, Physiology, and Illness  99
   - Psychoneuroimmunology  101
      - Highlight: Stress and Wound Healing  104

**Psychophysiological Disorders**  104
   - Digestive System Diseases  104
   - Asthma  105
   - Recurrent Headache  105
   - Other Disorders  106

**Stress and Cardiovascular Disorders**  106
   - Hypertension  106
   - Coronary Heart Disease  108
      - Highlight: Does Acculturation Increase Blood Pressure?  109

**Stress and Cancer**  109

Chapter 5  Coping with and Reducing Stress  112

**Coping with Stress**  113
   - What Is Coping?  113
   - Functions and Methods of Coping  113
      - Assess Yourself: Your Focuses in Coping  114

**Reducing the Potential for Stress**  118
   - Enhancing Social Support  118
      - Highlight: Do Religiousness and Spirituality Reduce Stress and Enhance Health?  119
   - Managing Interpersonal Problems  120
      - Highlight: The Amish Way of Social Support in Bereavement  120
   - Improving One’s Personal Control  121
   - Organizing One’s World Better  121
   - Exercising: Links to Stress and Health  121
   - Preparing for Stressful Events  122

**Reducing Stress Reactions: Stress Management**  123
   - Medication  123
   - Behavioral and Cognitive Methods  123

   - Clinical Methods and Issues: The Case of “Bear”  127
   - Clinical Methods and Issues: Treating Insomnia  129
   - Massage, Meditation, and Hypnosis  129
      - Highlight: Can Interventions Curb Adverse Childhood Experiences?  131

Using Stress Management to Reduce Coronary Risk  131
   - Modifying Type A Behavior  131
   - Treating Hypertension  132

PART III  Lifestyles to Enhance Health and Prevent Illness  135

Chapter 6  Health-Related Behavior and Health Promotion  135

**Health and Behavior**  136
   - Lifestyles, Risk Factors, and Health  136
      - Highlight: Which Health Behaviors Are Beneficial against Breast Cancer?  138
   - Interdisciplinary Perspectives on Preventing Illness  139
   - Problems in Promoting Wellness  140

**What Determines People’s Health-Related Behavior?**  142
   - General Factors in Health-Related Behavior  142
   - The Role of Beliefs and Intentions  144
   - The Role of Less Rational Processes  149

**Developmental, Gender, and Sociocultural Factors in Health**  150
   - Development and Health  150
   - Gender and Health  153
   - Sociocultural Factors and Health  153

**Programs for Health Promotion**  155
   - Methods for Promoting Health  155
      - Clinical Methods and Issues: Dialogues to Help People Stop Smoking  157
   - Promoting Health in Schools and Religious Organizations  159
   - Worksite and Community-Based Wellness Programs  160
   - Electronic Interventions for Health Promotion  160
   - Prevention with Specific Targets: Focusing on AIDS  161
      - Assess Yourself: Your Knowledge about HIV/AIDS  162

Chapter 7  Substance Use and Abuse  167

**Substance Abuse**  168
   - Addiction and Dependence  168
   - Processes Leading to Dependence  168

**Smoking Tobacco**  170
   - Who Smokes, and How Much?  171
   - Why People Smoke  172
## Contents

- **Highlight**: Do Curiosity and Susceptibility “Kill the Cat”?  173
- **Smoking and Health**  175  
  - **Highlight**: Does Someone Else’s Smoking Affect Your Health?  177
- **Alcohol Use and Abuse**  178  
  - Who Drinks, and How Much?  179  
  - Assess Yourself: What’s True about Drinking?  179
  - Why People Use and Abuse Alcohol  181  
  - Assess Yourself: Do You Abuse Alcohol?  182
  - Drinking and Health  183  
  - **Highlight**: Drinking—Games People Play  183
- **Drug Use and Abuse**  184  
  - **Highlight**: Types and Effects of Drugs  185
  - Who Uses Drugs, and Why?  185
  - Drug Use and Health  187
- **Reducing Substance Use and Abuse**  187  
  - Preventing Substance Use  187
  - Quitting a Substance without Therapy  189
  - Treatment Methods to Stop Substance Use and Abuse  192  
  - **Highlight**: Where Should Treatment Occur, and What Should Be the Goals and Criteria for Success?  193
  - **Clinical Methods and Issues**: Behavioral Methods for Treating Substance Abuse  195
  - Dealing with the Relapse Problem  196

### Chapter 8 Nutrition, Weight Control and Diet, Exercise, and Safety  200
- **Nutrition**  201  
  - Components of Food  201
  - What People Eat  202
  - Nutrition and Health  204
- **Weight Control and Diet**  207  
  - Desirable and Undesirable Weights  207
  - Becoming Overly Fat  209  
  - **Highlight**: Do “Fat-Bugs” Lead to Overweight?  211
  - Dieting and Treatments to Lose Weight  214  
  - **Highlight**: Which “Carbs” to Avoid  215
  - **Clinical Methods and Issues**: Problem-Solving Training to Control Weight  217
  - Anorexia and Bulimia  219  
  - Assess Yourself: Your Weight Control Patterns  220
- **Exercise**  222  
  - The Health Effects of Physical Activity  222  
  - **Highlight**: Types and Amounts of Healthful Exercise  223
  - Reasons for Not Exercising  225
  - Promoting Exercise Behavior  226
- **Safety**  228

### Accidents  228
- Environmental Hazards  229

### PART IV Becoming Ill and Getting Medical Treatment  232

#### Chapter 9 Using Health Services  232
- **Types of Health Services**  233  
  - Specialized Functions of Practitioners  233
  - Office-Based and Inpatient Treatment  233
  - The American Health Care System  234
  - Health Care Systems in Other Countries  235
- **Perceiving and Interpreting Symptoms**  236  
  - Perceiving Symptoms  236  
  - **Highlight**: Symptoms by Suggestion?  238
  - Interpreting and Responding to Symptoms  238
- **Using and Misusing Health Services**  240  
  - Who Uses Health Services?  240
  - Why People Use, Don’t Use, and Delay Using Health Services  241
  - Using Complementary and Alternative Medicine  244  
  - **Highlight**: A New Meaning for “Diehard” Sports Fan  244
  - Problematic Health Service Usage  245
- **The Patient–Practitioner Relationship**  246  
  - Patient Preferences for Participation in Medical Care  246
  - The Practitioner’s Behavior and Style  247  
  - **Highlight**: Fighting for Your Life  247
  - The Patient’s Behavior and Style  249  
  - Assess Yourself: Do You Know the Meanings of Medical Terms?  249
- **Compliance: Adhering to Medical Advice**  250  
  - Extent of the Nonadherence Problem  251
  - Why Patients Do and Do Not Adhere to Medical Advice  252
  - Patient–Practitioner Interactions  254
  - Increasing Patient Adherence  255  
  - **Clinical Methods and Issues**: Simple Methods to Promote Adherence  257
- **Focusing on Prevention**  258

#### Chapter 10 In the Hospital: The Setting, Procedures, and Effects on Patients  260
- **The Hospital—Its History, Setting, and Procedures**  261  
  - How the Hospital Evolved  261
  - The Organization and Functioning of Hospitals  262
  - Assess Yourself: Who’s Who in Physician Care  263
  - Roles, Goals, and Communication  263
  - The Impact of the “Bottom Line”  264
- **Being Hospitalized**  265
  - Relations with the Hospital Staff  266
Sick-Role Behavior in the Hospital 267
Emotional Adjustment in the Hospital 268
Coping Processes in Hospital Patients 269
Preparing Patients for Stressful Medical Procedures 270
Highlight: Lamaze Training as a Method of Psychological Preparation for a Medical Procedure 273
When the Hospitalized Patient is a Child 274
Clinical Methods and Issues: Preparing Children for Impending Hospitalization 276
How Health Psychologists Assist Hospitalized Patients 277
Initial Steps in Helping 278
Tests for Psychological Assessment of Medical Patients 278
Promoting Patients’ Health and Adjustment 279
When the Illness is Terminal 280
The Patient’s Age 280
Psychosocial Adjustments to Terminal Illness 281
Assess Yourself: Your Living Will Choices 283
Medical and Psychological Care of Dying Patients 284
A Place to Die—Hospital, Home, or Hospice? 284
Clinical Methods and Issues: Saying Good-bye 285

PART V Physical Symptoms: Pain and Discomfort 288

Chapter 11 The Nature and Symptoms of Pain 288
What is Pain? 289
The Qualities and Dimensions of Pain 289
Perceiving Pain 291
Highlight: Acute Pain in Burn Patients 292
Theories of Pain 295
Early Theories of Pain 295
Highlight: Inducing Pain in Laboratory Research 295
The Gate-Control Theory of Pain 297
Biopsychosocial Aspects of Pain 298
Neurochemical Transmission and Inhibition of Pain 299
Personal and Social Experiences and Pain 300
Highlight: Placebos and Pain 301
Emotions, Coping Processes, and Pain 303
Clinical Methods and Issues: Assessing Difficulty Coping with Pain 304
Assessing People’s Pain 305
Self-Report Methods 305
Assess Yourself: Describing Your Pain 308
Behavioral Assessment Approaches 309
Psychophysiological Measures 310
Pain in Children 310
Pain and Children’s Sensory and Cognitive Development 311
Assessing Pain in Children 311

Chapter 12 Managing and Controlling Clinical Pain 314
Clinical Pain 315
Acute Clinical Pain 315
Chronic Clinical Pain 315
Medical Treatments for Pain 316
Surgical Methods for Treating Pain 317
Chemical Methods for Treating Pain 317
Highlight: Types of Pain-Relieving Chemicals 318
Behavioral and Cognitive Methods for Treating Pain 320
The Operant Approach 320
Fear Reduction, Relaxation, and Biofeedback 321
Cognitive Methods 324
Clinical Methods and Issues: Guiding a Client to Pain Redefinition 326
Hypnosis and Interpersonal Therapy 327
Assess Yourself: Would Behavioral or Cognitive Methods Help Your Pain? 328
Hypnosis as a Treatment for Pain 328
Interpersonal Therapy for Pain 329
Stimulation and Physical Therapies for Pain 330
Stimulation Therapies 330
Physical Therapy 331
Pain Clinics 332
Multidisciplinary Programs 332
Highlight: Physical Activity and Back Pain 333
Evaluating the Success of Pain Clinics 334

PART VI Chronic and Life-Threatening Health Problems 336

Chapter 13 Serious and Disabling Chronic Illnesses: Causes, Management, and Coping 336
Adjusting to a Chronic Illness 337
Initial Reactions to Having a Chronic Condition 337
Influences on Coping with a Health Crisis 337
The Coping Process 340
Impacts of Different Chronic Conditions 341
Asthma 342
Epilepsy 344
Highlight: What to Do for a Seizure 344
Nervous System Injuries 345
Diabetes 348
Assess Yourself: Do You Have Diabetes? 349
Highlight: Self-Managing Diabetes 351
Arthritis 353
Alzheimer’s Disease 356
Psychosocial Interventions for People with Chronic Conditions 358
Educational, Social Support, and Behavioral Methods 359
Relaxation and Biofeedback 360
Contents

Clinical Methods and Issues: Treating Asthma with Biofeedback and Relaxation 361
Cognitive Methods 361
Interpersonal and Family Therapy 362
Collaborative or Integrated Care Approaches 362

Chapter 14 Heart Disease, Stroke, Cancer, and AIDS: Causes, Management, and Coping 365

Coping with and Adapting to High-Mortality Illness 366
Adapting While the Prospects Seem Good 366
Adapting in a Recurrence or Relapse 367

Heart Disease 368
Who Is at Risk of Heart Disease, and Why? 368
Highlight: Anatomy of a Heart Attack 369
Assess Yourself: Are You at Risk for Heart Disease? 370
Medical Treatment and Rehabilitation of Cardiac Patients 371
The Psychosocial Impact of Heart Disease 372
Psychosocial Interventions for Heart Disease 374

Stroke 375
Causes, Effects, and Rehabilitation of Stroke 375
Psychosocial Aspects of Stroke 377
Clinical Methods and Issues: Stroke Rehabilitation for Visual Neglect 377

Cancer 378
The Prevalence and Types of Cancer 378
The Sites, Effects, and Causes of Cancer 379
Diagnosing and Treating Cancer 380
The Psychosocial Impact of Cancer 383
Psychosocial Interventions for Cancer 385
Childhood Cancer 386
Highlight: Can Psychosocial Interventions Improve Cancer Survival? 386

AIDS 387
Risk Factors, Effects, and Treatment of AIDS 387
The Psychosocial Impact of AIDS 388
Psychosocial Interventions for AIDS 390

The Survivors: And Life Goes On 391

Physical and Psychosocial Impact 391
Psychosocial Interventions for Bereavement 392
Reaching a Positive Adaptation 392

PART VII Looking to the Future 394

Chapter 15 What’s Ahead for Health Psychology? 394

Goals for Health Psychology 395
Enhancing Illness Prevention and Treatment 395
Improving Efforts for Helping Patients Cope 396
Identifying Evidence-Based Interventions and Cost–Benefit Ratios 396
Expanding Psychologists’ Roles in Medical Settings 397
Careers and Training in Health Psychology 398
Clinical Methods and Issues: Psychologists in the Primary Care Team 399
Career Opportunities 399
Training Programs 399

Issues and Controversies for the Future 400
Environment, Health, and Psychology 400
Quality of Life 400
Ethical Decisions in Medical Care 401

Future Focuses in Health Psychology 402
Life-Span Health and Illness 402
Assess Yourself: Some Ethical Dilemmas: What Do You Think? 403

Sociocultural Factors in Health 404
Gender Differences and Women’s Health Issues 405

Factors Affecting Health Psychology’s Future 405

Glossary 407
