1 Why Industrial Environmental Management? 1
1.1 Introduction 1
1.1.1 ISO in Brief 2
1.1.2 ISO and the Environment 2
1.1.3 Benefits 2
1.2 Environmental Management in Industries 3
1.2.1 Environmental Challenges 3
1.3 Waste as Pollution 4
1.4 Defining Pollution Prevention 4
1.4.1 Resource Efficiency 5
1.5 The ZDZE Paradigm 5
1.6 Zero Discharge Industries 5
1.7 Sustainability, Industrial Ecology, and Zero Discharge (Emissions) 6
1.8 Why Zero Discharge Is Critical to Sustainability 8
1.9 The New Role of Process Engineers and Engineering Firms 9
1.10 Zero Discharge (Emissions) Methodology 10
1.10.1 Analyze Throughput 10
1.10.2 Inventory Inputs and Outputs 10
1.10.3 Build Industrial Clusters 10
1.10.4 Develop Conversion Technologies 11
1.10.5 Designer Wastes 11
1.10.6 Reinvent Regulatory Policies 11
1.11 Making the Transition 12
1.11.1 Recycling of Materials and Reuse of Products 12
1.11.2 Dematerilization 13
1.11.3 Investment Recovery 14
1.11.4 New Technologies and Materials 14
1.11.5 New Mindset 15
1.11.6 In the Full ZD (Emission) Paradigm 16
1.12 Constraints and Challenges 17
1.12.1 The Challenges in Industrial Environmental Management 18
1.12.2 Codes of Ethics in Engineering 18
1.13 The Structure of the Book 18
1.13.1 What Is in the Book? 18
Problems 21
References 22
2.12.8 Canada 45
2.12.9 China 45
2.12.10 Ecuador 45
2.12.11 Egypt 46
2.12.12 Germany 46
2.12.13 India 46
2.13 The Legal and Regulatory Framework for Environmental Protection in India 47
2.13.1 Introduction 47
2.13.2 Legislation for Environmental Protection in India 47
2.13.3 General 48
2.13.4 Hazardous Wastes 50
2.13.5 International Agreements on Environmental Issues 51
2.13.6 An Assessment of the Legal and Regulatory Framework for Environmental Protection in India 52
2.13.7 Emerging Environmental Challenges 53
2.14 United States Environmental Law 55
2.14.1 Scope 55
2.14.2 History 55
2.14.3 Legal Sources 55
2.14.4 Federal Regulation 55
2.14.5 Judicial Decisions 56
2.14.6 Common Law 56
2.14.7 Administration 56
2.14.8 Enforcement 56
2.14.9 Education and Training 56
2.14.10 Vietnam 57
2.15 ISO 9000 and 14000 57
2.15.1 Green Accounting Practices and Other Quality Manufacturing and Business Management Paradigms 57
2.16 Current Environmental Regulatory Development in the United States: From End-of-Pipe Laws and Regulations to Pollution Prevention 60
2.16.1 Introduction 60
2.17 Greenhouse Gases 60
2.17.1 Nine Prominent Federal Environmental Statutes 61
Examples (Multiple Choice) 64
Problems 65
References 65

3 Industrial Pollution Sources, Its Characterization, Estimation, and Treatment 71
3.1 Introduction 71
3.2 Wastewater Sources 71
3.2.1 Point Source 71
3.2.2 Nonpoint Source 71
3.3 Wastewater Characteristics 71
3.3.1 Physical Characteristics 72
3.3.2 Total Suspended Solids 72
3.3.3 Color 72
3.3.4 Odor 72
3.3.5 Temperature 72
3.4 Chemical Characteristics 73
3.4.1 Inorganic Chemicals 73
3.4.2 Organic Chemicals 73
3.4.3 Volatile Organic Compounds 73
3.4.4 Heavy Metal Discharges 73
3.4.5 Some Inorganic Pollutants of Concern 74
Industrial Wastewater, Air Pollution, and Solid and Hazardous Wastes: Monitoring, Permitting, Sample Collections and Analyses, QA/QC, Compliance with State Regulations and Federal Standards

4

4.1 Introduction 115

4.2 Industrial Process Water 115

4.3 Common Elements, Radicals, and Chemicals in Water Analysis 115

4.4 Purposes and Objectives for Inspecting and Sampling 116

4.4.1 Analytical Methods 118

4.4.2 State Waste Discharge Permit 119

4.4.3 NPDES Wastewater Discharge Permit 119

4.4.4 General Wastewater Discharge Permit 120

4.5 Sampling and QA/QC Plan 120

4.5.1 QA/QC Procedures 121

4.5.2 QA Procedures for Sampling 121

4.5.3 QC Procedures for Sampling 122

4.5.4 Laboratory QA/QC 123

4.5.5 Sampling Location 124

4.5.6 Type of Sample 124

4.5.7 Continuous Monitoring 126

4.5.8 Sample Preservation and Holding Times 127

4.5.9 Sample Documentation 127

4.5.10 General Documentation Procedures 127

4.5.11 COC Procedures 128

4.5.12 Sample Identification and Labeling 129

4.5.13 Sample Packaging and Shipping 129

4.6 Whole Effluent Toxicity Testing 130

4.6.1 Introduction 130

4.6.2 The WET Testing 130

4.6.3 Toxicity Testing and Evaluation of Toxicity Test Results 130

4.6.4 Toxic Units 131

4.6.5 Application of Toxicity Test Results 132

4.6.6 Protection Against Acute Toxicity 132

4.6.7 Protection Against Chronic Toxicity 132

4.7 Flow Measurements 133

4.7.1 Open Channel Flow 133

4.7.2 Closed Channel Flow 137

4.7.3 Pitot Tube 138

4.7.4 Electromagnetic Flow Meter 139

4.8 The Point of Compliance with the Water Quality Standards 139

4.8.1 Mixing Zones 139

4.20.1 Solid Waste Treatment: Some Perspectives on Recycling  173
4.20.2 Why Recycle?  173
4.20.3 What Is Recycling  173
4.20.4 A Brief Overview of Recycling in the United States and United Kingdom  174
4.20.5 Recycling Today  174
4.20.6 Recycling as a Route to Sustainable Productivity and Growth  175
4.20.7 Resource Conservation and Recovery Act  175
4.20.8 Few RCRA Provisions: Cradle-to-Grave Requirements  177
4.20.9 TSDFs Permits  178
4.21 Hazardous Waste Landfill (Sequestering, Isolation, etc.)  180
4.21.1 Final Disposal of Hazardous Waste  180
4.22 Industrial Waste Generation Rates  181
4.22.1 Generator Requirements and Responsibilities  181
4.22.2 Environmental Audits  181
4.23 Comprehensive Environmental Response, Compensation, and Liability Act and Superfund  182
4.23.1 History  182
4.23.2 Provisions  182
4.23.3 Procedures  183
4.23.4 Implementation  184
4.23.5 Hazard Ranking System  184
4.23.6 Environmental Discrimination  184
4.23.7 Case Studies in African American Communities  184
4.23.8 Case Studies in Native American Communities  185
4.24 Industrial Waste Management in India: Shifting Gears  185
4.24.1 Integrated Solid Waste Management  185
4.24.2 Hazardous Waste Handling and Management Rule  186
4.24.3 Biomedical Waste Rule  186
4.24.4 E-Waste Rule  186
4.24.5 Plastic Nonhazardous Waste Rule  186
5 Assessment and Management of Health and Environmental Risks: Industrial and Manufacturing Process Safety  193
5.1 Health Risk Assessment  193
5.1.1 Air Pollution  193
5.1.2 Problem Formulation  194
5.1.3 Exposure Assessment  195
5.1.4 Toxicity Assessment  199
5.1.5 Risk Characterization  200
5.2 Assessing the Risks of Some Common Pollutants  201
5.2.1 NOx, Hydrocarbons, and VOCs: Ground-Level Ozone  202
5.2.2 Carbon Monoxide  203
5.2.3 Lead and Mercury  204
5.2.4 Particulate Matter  205
5.2.5 SO2, NOx, and Acid Deposition  206
5.2.6 Air Toxics  207
5.3 Ecological Risk Assessment  207
5.3.1 Technical Aspects of Ecological Problem Formulation  208
5.3.2 Ecological Exposure Assessment  211
5.3.3 Ecological Effects Assessment  213
5.3.4 Additional Components of Ecological Risk Assessments  214
5.3.5 Tropospheric Ozone Pollution and Its Effects on Plants  215
5.3.6 Air Toxics  215
5.4 Additional Components of Ecological Risk Assessments  214
5.4.1 Tropospheric Ozone Pollution and Its Effects on Plants  215
5.3.6 Toxicity Testing 216
5.4 Risk Management 217
5.4.1 Valuation of Ecological Resources 218
5.4.2 Modeling Risk Management 220
5.4.3 Other Considerations for Risk Characterization 220
5.4.4 Conceptual Bases for De Minimis Risks 221
5.4.5 Ecological Risk Assessment of Chemicals 221
5.5 Communicating Information on Environmental and Health Risks 227
5.5.1 From Concern to Outrage: Determinants of Public Response 228
5.5.2 Sustainable Strategies for Environmental and Health Risk Communication 228
5.5.3 Case Study: Environmental and Health Risk Communication Neglected Until After an Accident 230
5.5.4 Lessons Learned 231
5.6 Environmental Information Access on the Internet 231
5.6.1 Internet Sources 232
5.6.2 Implications and Limitations of Using the Internet 233
5.7 Health and Occupational Safety 234
5.7.1 Occupational Safety and Health Administration 234
5.8 Industrial Process Safety System Guidelines 235
5.8.1 Types of Safety Systems 236
5.9 Industrial Hygiene 236
5.9.1 Toxicology 236
5.9.2 TLVs and Exposure Limits 237
5.10 Atmospheric Hazards 237
5.10.1 Oxygen Deficient Atmosphere 237
5.10.2 Toxic Atmosphere 237
5.10.3 Chronic Industrial Exposure 238
5.10.4 Accidental Chlorine Gas Release: Case Study 238
5.10.5 Determination of Toxic Endpoint Distance 239
5.10.6 Determination of Exposed Population to this Scenario 239
5.10.7 Chronic Industrial Exposure: TWA and TLV 239
5.11 Safety Equipment 241
5.11.1 Personal Protective Equipment 241
5.11.2 Personal Protective Clothing 242
5.12 Communication Devices 243
5.12.1 Air Monitoring Devices 243
5.12.2 Ventilation Devices 244
5.12.3 Safety Harness and Retrieval System 244
5.12.4 Respirators 245
5.12.5 Confined Space Entry 245
5.12.6 Safety Training 246
5.13 Noise 246
5.13.1 Occupational Noise Exposure 246
5.13.2 Basics of Occupational Noise and Hearing Protection 247
5.13.3 Noise: Physical Principles 247
5.13.4 Noise Exposure and Noise Protection 248
5.13.5 Noise Control 248
5.14 Radiation 249
5.14.1 Definition 249
5.14.2 Different Sources of Radiation 249
5.14.3 External Exposure and Internal Exposure 249
5.14.4 Radionuclide Decay 250
5.14.5 Radiation Dose 250
5.14.6 Biological Effects of Ionizing Radiation 250
5.14.7 Radiation Protection Principles 251
5.15 Effects of Global Warming: Climate Change – The World’s Health 253
5.15.1 The Greenhouse Effect 253
5.15.2 Greenhouse Gases 254
5.15.3 Are the Effects of Global Warming Really Concerns for Our Future? 255
5.15.4 More Frequent and Severe Weather 255
5.15.5 Higher Death Rates 256
5.15.6 Dirtier Air 256
5.15.7 Higher Wildlife Extinction Rates 256
5.15.8 More Acidic Oceans 256
5.15.9 Higher Sea Levels 256
5.15.10 Effects of Global Warming on Humans 256
5.16 Key Vulnerabilities 257
5.16.1 Health 257
5.16.2 Extreme Weather Events 257
5.16.3 Environment 257
5.16.4 Temperature 257
5.16.5 Water 257
5.16.6 Social Effects of Extreme Weather 257
5.17 Energy Sector 258
5.17.1 Oil, Coal, and Natural Gas 258
5.17.2 Nuclear 258
5.17.3 Hydroelectricity 258
5.17.4 Transport 258
5.17.5 Problems 259
5.17.6 References 260

9.2.2 EIP Development 412
9.2.3 EIPs – The Ebara Process: Mini Case Study 9.1 in Japan 412
9.2.4 Mini-Case Study 9.2: Seshasayee Paper and Board Ltd. in India 414
9.2.5 Mini-Case Study 9.3: Materials and Energy Flow in an EIP in North Texas, USA 415
9.2.6 Mini-Case Study 9.4: EIP Including Numerous Symbiotic Factories for Manufacturing Very Large Scale Photovoltaic System 415
9.3 Water–Energy Nexus 417
9.3.1 Technology Roadmaps and R&D 420
9.3.2 Circular Economy 421
9.3.3 Rethink the Business Model 424
9.3.4 Biomimicry 425
9.4 CE Indicators in Relation to Eco-Innovation 426
9.4.1 Development of the Concept of the CE 426
9.5 Process Intensification and Integration Potential in Manufacturing 427
9.5.1 What Is PI? 427
9.5.2 Case Study 9.5: Elimination of Dioxin and Furans by Alternative Chemical PI 428
9.5.3 Mini-Case Study 9.2: Multi-Pollutants Capture and Recovery of SO₃, NOₓ, and Mercury in Coal-Fired Power Plant 428
9.6 Manufacturing Process Integration 432
9.6.1 Process Integration Technique Has Few Possible Applications 432
9.7 New Sustainable Chemicals and Energy from Black Liquor Gasification Using Process Integration and Intensification 433
9.7.1 Introduction 433
9.7.2 Black Liquor Gasification (BLG): Introduction 435
9.8.1 The Pulp and Paper Industry 436
9.8.2 Black Liquor Gasification Combined Cycle Power/Recovery 437
9.8.3 Biorefinery 437
9.8.4 Liquid Fuels Synthesis 439
9.8.5 Dimethyl Ether 439
9.8.6 Pressurized Chemrec BLG 440
9.8.7 Catalytic Hydrothermal Gasification of Black Liquor 440
9.8.8 Fischer-Tropsch Liquids 441
9.8.9 Mixed Alcohols 441
9.8.10 “WTW” Environmental Impact of Black Liquor Gasification 441
9.8.11 Water and Solid Waste 443
9.8.12 Mill-Related Air Emissions 443
9.8.13 Tomlinson Boiler Air Emissions 443
9.8.14 Economic Development Opportunities 444
9.8.15 Cost-Benefit Analysis 445
9.9 Conclusions 445
9.9.1 Summary 447
9.9.2 Problems 447
9.9.3 References 448

### 10 Quality Industrial Environmental Management: Sustainable Engineering in Manufacturing

10.1 Introduction: Industry and the Global Environmental Issues 453
10.1.1 Industry Role and Trends 453
10.1.2 Code of Ethics for Engineers 454
10.1.3 Sustainable Engineering Design Principles 455
10.1.4 Design for Environmental Practices 459
10.1.5 Why Do Firms Want to Design for the Environment? 460
10.1.6 How Does a Business Design for the Environment? 460
10.1.7 Design for Environment 460
10.1.8 Design for Regulatory Compliance 461
10.1.9 Design for Testability 461
10.1.10 Design and Test for Service and Maintenance 461
10.1.11 Design for Manufacturing 461
10.1.12 Design for Assembly 461
10.1.13 Design for Disassembly 462
10.1.14 Design for Sustainable Manufacturing 462
10.1.15 Design for Sustainability 462
10.2 Integrating LCA in Sustainable Product Design and Development 463
10.3 Green Chemistry: The Twelve Principles of Green Chemistry 464
10.3.1 The Principles of Green Chemistry 465
10.4 The Hannover Principles 467
10.4.1 Leadership in Energy and Environmental Design (LEED) 467
10.5 Sustainable Industries and Business 468
10.5.1 Eco-Efficiency 469
10.5.2 Sustainable Supply Chain Systems 469
10.5.3 Sustainable Green Economy 469
10.6 Six Essential Characteristics 470
10.7 Social Services 471
10.8 Environmental Regulatory Law: Command and Control Market Based, and Reflexive 471
10.9 Business Ethics 472
10.9.1 The Two Traditional Issues Involved with Ethics 472
10.10 International Issues 473
10.11 Ethical Sustainability 473
10.12 Social Sustainability 474
10.13 Conclusions 475
10.13.1 Business 475
10.13.2 Corporate Sustainability 476
10.14 Strategy for Corporate Sustainability 476
10.14.1 Business Case for Sustainability 476
10.14.2 Transparency 476
10.14.3 Stakeholder Engagement 476
Problems 477
References 477

Appendix A Conversion Factors 481
Appendix B International Environmental Law 483
Appendix C Air Pollutant Emission Factors: Stationary Point and Area Sources 487
Appendix D Frequently Asked Questions and Answers: Water Quality Model, Dispersion Model and Permits 493
Appendix E Industrial Hygiene Outlines 511
Appendix F Environmental Cost-Benefit 513
Appendix G Resource Recovery: Waste-To-Energy Facility, City of Spokane, Washington, USA 515
Appendix H The Hannover Principles 519
Appendix I Environmental Goals and Business Goals Are Not Two Distinct Goal Sets 521
Appendix J Sample Codes of Ethics and Guidelines 523
Index 527
