CONTENTS

Contributors ix
Preface xi

1 Overview of the Various Types of Mass Spectrometers that are Used in Drug Discovery and Drug Development 1
   Gérard Hopfgartner

2 Utility of High-Resolution Mass Spectrometry for New Drug Discovery Applications 37
   William Bart Emary and Nanyan Rena Zhang

3 Quantitative Mass Spectrometry Considerations in a Regulated Environment 55
   Mohammed Jemal and Yuan-Qing Xia

4 Mass Spectrometry for Quantitative In Vitro ADME Assays 97
   Jun Zhang and Wilson Z. Shou

5 Metabolite Identification Using Mass Spectrometry in Drug Development 115
   Natalia Penner, Joanna Zgodz-Pols, and Chandra Prakash

6 MS Analysis of Biological Drugs, Proteins, and Peptides 149
   Yi Du, John Mehl, and Pavlo Pristatsky

7 Characterization of Impurities and Degradation Products in Small Molecule Pharmaceuticals and Biologics 191
   Hui Wei, Guodong Chen, and Adrienne A. Tymiak

8 Liquid Extraction Surface Analysis (LESA): A New Mass Spectrometry-Based Technique for Ambient Surface Profiling 221
   Daniel Eikel and Jack D. Henion
9  MS Applications in Support of Medicinal Chemistry Sciences  239
   Maarten Honing, Benno Ingelse, and Birendra N. Pramanik

10 Imaging Mass Spectrometry of Proteins and Peptides  277
    Michelle L. Reyzer and Richard M. Caprioli

11 Imaging Mass Spectrometry for Drugs and Metabolites  303
    Stacey R. Oppenheimer

12 Screening Reactive Metabolites: Role of Liquid
    Chromatography–High-Resolution Mass Spectrometry
    in Combination with “Intelligent” Data Mining Tools  339
    Shuguang Ma and Swapan K. Chowdhury

13 Mass Spectrometry of siRNA  357
    Mark T. Cancilla and W. Michael Flanagan

14 Mass Spectrometry for Metabolomics  387
    Petia Shipkova and Michael D. Reily

15 Quantitative Analysis of Peptides with Mass Spectrometry:
    Selected Reaction Monitoring or High-Resolution Full Scan?  403
    Lieve Dillen and Filip Cuyckens

Index  427
