INDEX

Page numbers in italics refer to figures and tables.

A
Access score, 232
Access to care: barriers to, 176; in the conceptual model of disparities in health care, 764, 765, 766; as a contributing factor to health disparities, 762; disparities in, 24, 55, 394, 557, 569, 671, 708, 717, 761; improved, and need for reducing the SES gradient along with, 407; language and, 226; Latino acculturation and, 231–232, 235–236; racial and socioeconomic status differences in, 400, 430; residential segregation and, 343, 430; socioeconomic status and, 377, 378
Accidental injuries, disparities in mortality from, 20. See also Occupational fatalities
Acculturation: area-specific research questions involving, 237–239; and assimilation, as concepts, background on, 216–218, 254–255; and bidimensional models, 218–220, 236, 254; contextual factors influencing, 222, 264; defining, 216, 254; definitions used in the study of, 218–222, 254; dissonant vs. consonant, 218; learning in the process of, levels of, 219–220; measures of, and scales, 220–222, 226, 234, 236–237; and multidimensional models, 236–237, 239, 254; proxy measures of, 221, 226, 234, 236; socioeconomic status and, 395–396; structural and cultural components of, 259–260, 281n4, 281n5; and unidimensional models, 218, 220, 236, 254, 264. See also Asian acculturation; Latino acculturation
Acculturation Rating Scale for Mexican Americans, 259
Acculturative stress, 222, 254–255, 257–258, 281n1
Action Communities (ACs), 432
Active coping responses: health outcomes related to, for Blacks, 89; predisposition to, 141; self-reported racism and, review of studies on, 121
Activity of daily living (ADL) limitations: estimated trajectories of, disparities in, and the life perspective, 361–364; self-reported, disparities in, and socioeconomic status, 337, 338, 421–422
Acute racism, coping responses to, review of studies on self-reported, 121
Acute stress/stressors: immune responses to, 91, 92; John Henryism and, 147; sources of, 83–84
Ad hoc racial classification, 57, 58, 323
Adaptive coping responses, 88, 90, 147, 150
Addiction, racism and, 394. See also Alcohol use/misuse; Drug use; Smoking/tobacco use
Adolescents. See Children/adolescents
Adverse events: computing risk-adjusted rates for, method of, 710–711; mortality and, in hospital quality of care study, 711–715, 716, 717; as a patient safety indicator, 709
Aesthetic environments, 458, 465, 471–473
Aetna, 741–742, 743, 744–745, 747, 748, 753, 754
Affirmative action, racism and, 110
African American Heart Failure Trial, 677
African Americans. See Blacks
Age: foreign-born vs. U.S.-born mothers and, 308, 309; and heterogeneity among Latinos, 215; of immigrant population, 3–4; increasing health inequality with, 357; maternal, and pregnancy outcomes, 311, 312; and mortality disparities, 440; obesity/BMI and, 26–27; and perceived racism, 85; population pyramids and, 4; and poverty, 381; as a proxy for
cumulative exposure to racism, 395; smoking and, 26; socioeconomic status and, 383; at time of immigration, 261, 262. See also Life course perspective; Sociodemographic factors
Agency for Health Care Policy and Research (AHCPR), 644, 697, 703
Agency for Healthcare Research and Quality (AHRQ), 16, 43, 44, 424, 708, 709, 710, 717, 742, 761
AIDS. See HIV/AIDS
Alaska Natives. See Native Americans
Alcohol use/misuse: acculturation and, 223, 227–228, 229, 396; and alcoholism, 485; and analgesic administration, study of, 644; decreasing, effect of, 400; discrimination as a stressor and, 506; disparities in, 429; and the HPA axis, 162; indicator of less, 731; integrated communities study of, vs. national studies, 424, 429; John Henryism and, 153; and liquor store distribution, 485, 486, 490; negative economic changes and, 402; during pregnancy, 194, 229, 314; residential segregation and, 342, 501; self-reported racism and, review of studies on, 115, 121, 122; as unhealthy behavior, 164, 170, 171, 172; and urbanization, 389–390. See also Substance use/misuse
Aleutian physicians, 653
Aligning Forces for Quality, 781
American Academy of Family Practice (AAFP), 650
American Anthropological Association, 54
American Cancer Society, 23, 728
American College of Cardiology (ACC), 543
American College of Physicians (ACP), 650, 695
American Heart Association (AHA), 543
American Indians. See Native Americans
American Medical Association, 695

American South, the, 164, 165, 167, 175, 178
Americans’ Changing Lives study, 162–164, 165–168
Analgesic availability at pharmacies: discussion of, 703–704; methods for studying, 697–700; overview of, 697; residential segregation and, 343, 701, 702, 703; results from study of, 700–702
Analgesic practice disparities: analgesic availability and, 703; discussion of, 641–645; introduction to, 637; methods of studying, 637–638; results from study of, 639–641
Anger, coping with, Blacks and, following perceived racism, 86, 88, 90
Anger Out scores, 88
ANOVA statistical testing, 592, 618
Anthem, 753, 755
Anthropological views of race, 7, 49, 50, 53, 54, 176, 177
Anxiety: and crime as a stressor, 504; and the HPA axis, 161, 162, 186; self-reported racism and, review of studies on, 114, 116, 120, 121
Asia, increased immigration from, 303
Asian physicians, 653
Asians and Pacific Islanders (API): access to care and uninsured rates of, 24; adverse event rates for, 711, 712, 713, 714–715, 716; and analgesic availability, 701, 702; breastfeeding and, 403; cancer and, 23, 263, 264; chronic disease and, 263, 264; depression and, 266, 269, 281n1; diabetes and, 263; growth in immigration of, 253; health profiles of, 6; heart disease and, 22, 263; heterogeneity of, 398; HIV/AIDS and, 25; homicide and, 22; and hospital quality of care study, 709, 711, 712, 713, 714–715, 716; hospitalization rate of, 24; immigration of, factors to consider in, 316; and immigration waves, 217; and the implicit physician bias study, 594; infant mortality and, 307, 310, 312, 313, 385; and lack of baseline data for subgroups, 399; liver cancer and, 23; low birth weight and, 306,
Bias, defining, as a factor in health care, 20. See also Discrimination
Biocultural, 220, 235, 264, 266, 268–269
Biocultural anthropology, 177
Biological variation: axis of, independent of one's genotype, 182; conflating, with inferred genetic contributions, 194; nature of, 36, 49, 50, 51–52, 53, 54. See also Genetic entries
Biopsychosocial model of perceived racism: conclusion and recommendations, 93–95; contextual basis of the, 82; described, 81–93; environmental stimuli and the, 82, 83–84; mediator variables in the, 86–93; moderator variables in the, 84–86; overview of, 79; summary of, 93
Birth outcomes: Latino acculturation and, 225, 226, 229–231, 238; poverty and, 377–378; socioeconomic status and, 189, 447. See also Birth weight; Infant mortality
Birth rates: demographic transition model and, 1, 2, 3; foreign-born vs. U.S.-born women's, 3, 4
Birth records, missing, 317
Birth weight: and Black CVD risk, 187–188, 192; environmental and genetic factors influencing, 180–182; heritability of, 181; immigrant, 306–307; income improvement and, 407; and multiracial status, 398–399; self-reported racism and, review of studies on, 116, 120; and violent crime, 505. See also Low birth weight (LBW)
Black institutions and organizations, evidence of racism in, 80
Black physicians, 594, 610, 653
Black political power, 405, 506, 507
Black presidential campaign, significance of a, 388
Blacks: access to care and uninsured rates of, 24; and activity limitations, 337, 338, 361–364, 421–422; adverse event rates for, 711, 712, 713, 714, 715–716; and aggressive cardiac treatment, physician perceptions of, 609; and the aging process in the life perspective, 366; alcohol use and, 171, 389–390, 402, 429, 485, 486, 490; and analgesic administration, study of, 637, 638, 639, 640, 641, 642, 643, 644, 645; and analgesic availability, 697, 701, 702; asthma and, 25; biopsychosocial effects of perceived racism on, 79, 81–95; blood pressure and, 121, 140, 141, 144, 145, 148, 187–188, 403; breast cancer and, 21, 23, 38, 446–447; breastfeeding and,
cancer and, 21, 23, 26, 331, 387, 400; chronic disease and, 355; and cirrhosis, 331; color line between Whites and, tracing the origin of, 35; colorectal cancer and, 26, 38; continued resistance to full equality of, evidence of, 80; and coping choices over the life course, 171; correct racial classification of, issue of, 54; cortisol response in, 154; and deaths due to causes amenable to medical intervention, 399–400; depression and, 92, 160, 163, 165, 167, 168; diabetes and, 21, 25, 26, 175, 331, 387, 428, 754; and disability, 355, 361, 362, 363, 364, 365; discrimination faced by U.S.-born vs. foreign-born Blacks, 316; disproportionate disease and mortality burden of, 175, 355; and drug testing of pregnant women, 37; and drug use, 171, 344, 391, 447–448; and effects of gender and race, 21, 22, 23, 26, 85, 159, 175, 331, 355, 364, 376, 385, 387, 388, 391, 400, 440, 446, 673, 677, 708, 711, 712, 713, 715; motor vehicle deaths and, 22; and multiracial children, 399, 496; and nativity of discrimination and, 111–112; and medical mistrust, 541, 546–547, 549, 551, 552, 557–558, 563–565, 565–567; mental health of, 105, 159, 160, 376–377, 391; and missing birth records, 317; morbidity and, 159; mortality rates of, 6, 20, 21, 22, 23, 26, 85, 159, 175, 331, 355, 364, 376, 385, 387, 388, 391, 400, 440, 446, 673, 677, 708, 711, 712, 713, 715; motor vehicle deaths and, 22; and multiracial children, 399, 496; and nativity composition of mothers, 306; obesity/BMI and, 23, 24, 161, 171, 175, 291, 292, 428, 455; and occupational health disparities, 525, 526, 527, 528, 531; occupations heavily occupied by, 524; paradox involving, 401; and passive coping responses to unfair treatment, health outcomes of, 89–90; and patient satisfaction, 547–551, 552, 566; and the patient-provider communication study, 569, 570, 573, 574, 575–576, 577–578, 579–580, 581, 582; and perceived racism within a medical setting, 545–546, 549, 551, 552; and persistent poverty for children, effect of, 392; and physician bias in treatment for heart disease, study of, 589–603; and the physician perceptions study, 609, 619–622, 624–625, 626, 628; poor health status reported by, 337–338; population figures for, 2, 440, 441; poverty rates for, 390, 443, 444; pregnancy outcomes and sociodemographics of foreign-born vs. U.S.-born, 308–309; and preterm births, 24, 307, 310, 313, 314, 316; projected population of, 2; prostate cancer and, 23, 27; psychological distress in, systemic racism in the workplace and, 120; and quality of care, 37–38, 761; racial taxonomy and, 36; racism among and racism toward, evidence of, 80–81; REACH program targeting, 432; and residential segregation, 331–346, 420, 422, 485–490, 497, 498, 501; safe and attractive environments and, 472; school segregation
and poverty among, 333–334; self-identifying vs. socially assigned as, 60, 61–62, 63, 64, 66, 68, 398; self-reported racism and, review of studies on, 105, 107, 108, 113, 118, 119, 120; sickle cell trait and, 51–52, 397; slavery and, 1, 390, 442; smoking and, 26, 171, 314, 315, 389–390, 400–401, 428–429, 771; social environment of, heightened risk related to, 443; and social/familial support during pregnancy, 314–315; socioeconomic status of, 84–85, 165, 332, 333, 335–337, 386–387, 391; stroke and, 21, 22, 26; suicide rate of, 22, 391; syphilis and, 37; trait-based classifications and, 51–52; and treatment disparities for heart disease, 541, 543, 589, 647; tuberculosis and, 400; undercounting health data for, 398; unemployment rate of, 526; unhealthy behaviors and, effects of life stressors on, and health consequences, study of, 159–172; and unwanted pregnancies, 316; and unwed mothers, 307; and urban form, 468, 469, 470; and violent crime, 344; and violent deaths in urban areas, 391; wealth of, 392; and the weathering hypothesis, 357; and weight-related beliefs in women, racial influences associated with, 291–297, 298–299; as the working poor, 524; worsening health status of, 387–388

Blood pressure: developmental risk factors and, 181–182; epigenetics and adult risk of, 186; intragroup racism-related stress and, 125; John Henryism and, 140, 141, 142, 143, 144, 145, 147, 148, 149, 403; perceived racism and, 86, 88, 89, 90, 92–93; poverty and, 378; self-reported racism and, 105, 116, 121.  Cranial remains, study of, 53–54
Credibility, crisis of, 44
Crime: analgesic availability and rate of, 702; residential segregation and, 343–344; as a stressor, health effects of, 504–505. See also Safe and attractive environment
Crossing the Quality Chasm (IOM report), 689
Cubans: and access to care, 232; and alcohol use, 227, 228; and drug use, 227; immigration of, factors to consider in, 316; infant mortality and, 312, 313, 316; low birth weight and, 312, 313, 316; and nativity composition of mothers, 306; and population health, 215; pregnancy outcomes and sociodemographics of foreign-born vs.
U.S.-born, 308–309; and preterm births, 313; smoking and, 315
Cultural competency: cultural interventions focused on, 776, 777; defined, 690; evaluating, key framework for, 692–693; health plans addressing, 742, 747, 753; importance of, 695; laws involving, 766; measures for evaluating, 693–694; need for improving, in health care services, 236, 567, 678; overview of, 689; providing training in, lessons on, 690–692; summary on, 695
Cultural incorporation, defining, 219
Cultural interventions, 766, 771, 774, 776–777, 779
Cultural leverage, defining, 776
Cultural maintenance, 218
Cultural participation, as a measure of acculturation, 257
Cultural resistance, defining, 219
Cultural shift, defining, 219
Cultural transmutation, defining, 219
Culturally and Linguistically Appropriate Services in Health Care, 236
Culture: and cultural beliefs, Asian acculturation and, 257, 259, 262; of health care organizations, considering and understanding, in health care research, 678–679; rough proxy for, variable acting as a, 323
Culture learning. See Acculturation
Cumulative dis/advantage (CDA) perspective: defined, 356; described, and how social disadvantage affects health, 358–360, 361–364; future directions for the, in research, 366–367; introduction to the, 356; overview of the, 356–357; similarities and distinctions between the weathering hypothesis and, 364–366
Current Population Survey, 527
Cystic fibrosis, 676

D
Data abstraction, structured forms for, and verification, 457–458
Data collection issues, 397–399, 742, 758
Data quality improvement, need for, 451
Data sets, limited, 419–420. See also U.S. Census data; Vital statistics, issue with
Data sharing, 742
Data translation, as a challenge, 755–756
Death rates. See Mortality
Democracy, confidence in science and, 44
Democrats, 41, 42
Demographic transition model, 1–4
Denial, 86, 90, 124, 403
Depression: and Asian acculturation, 266, 269, 281n1; and crime as a stressor, 504; disparities in prevalence of, 160; interventions targeting, 774; measures for, and assessment of, 163, 164, 165, 166, 167, 168, 170; persisting disparities involving, 761, 762; promising intervention strategies for, 778; self-reported racism and, review of studies on, 92, 114, 116, 120, 121; and tailored interventions, 680
Detecting phase, health disparities research and the, 668, 669–674
Detroit Area Study, 109
Developmental and epigenetic approach to CVD disparities, 177–197
Developmental origins of health and disease (DOHaD): increased pursuit of, 177–178, 180; literature findings, 181, 194
Diabetes: acculturation and, 396; Asian acculturation and, 263; breastfeeding and, 195; developmental risk factors leading to, 177, 178, 179, 180, 181, 182, 187–188; disparities in mortality from, 20, 21, 331, 345, 386, 387, 446; disparities in prevalence of, 25, 54, 175, 386, 427, 428, 494; and food environment, 466, 729; health plans addressing, 742, 746, 751, 754; and the HPA axis, 162; hypertension and, 26; integrated communities study of, vs. national studies, 424, 427, 428; interventions targeting, 680, 693, 772–774; Latino acculturation and, 226; New World Syndrome and, 54; persisting disparities involving, 761, 762; during pregnancy, 192, 226; promising intervention strategies for, 778; quality improvement culture and outcomes related to, 679; quality measures for treating, 745; REACH program targeting, 432, 433; self-reported racism and, review of studies on, 114
Diagnostic Interview Schedule, 163
Diet/dietary behavior: acculturation and, 396; and the built environment, 457, 458, 460, 463, 465, 466–467, 468, 474; cumulative effect of, 359; diabetes and, 54; and the HPA axis, 161–162; improving, effect of, 400; Latino acculturation and, 223, 225, 228–229, 235, 237; poverty and, 161, 229; residential segregation and, 342; self-reported racism and, review of studies on, 122; unhealthy, physical health and, 170, 171; weight-related
beliefs in women and, 291, 294–296, 297, 298. See also Food environment; Obesity/BMI; Prenatal nutrition/undernutrition

Difference, defining disparity as a, 12, 20, 43

Disability: disparities in, 355, 361, 362, 363, 364, 365; due to angina, gender disparity in, 647; measure of, 421. See also Activity of daily living (ADL) limitations

Discrimination: as behavioral racism, 80; and birth outcomes, 189; and the debate over social vs. genetic causes of disparities, 176; defining, 324; and defining vulnerable populations, 673–674; in employment, 80, 505, 528; factors symptomatic of, importance of, 194; in housing, 80, 83, 332, 337, 498, 505; and the ideology of free will, 87; and maternal stress, 178; measures of, 110, 111, 112; in medical care, both race and gender bias influencing, possibility of, 660–661; in medical care, racial bias and, 37–38, 343, 505–506, 541, 552, 557, 566, 589, 626–627; as part of personally mediated racism, 324–325; passive and active coping responses to, and health outcomes, 89; perceptions of, and racial differences in self-rated health, 338; as a predictor of psychological distress for Blacks and well-being, 93; self-reported racism and experiencing, studies assessing, 110, 111; social environment including a history of, 449; as a stressor, 505–506; structural forces continuing a history of, 502; subpopulations facing, 672, 674. See also Physician bias/discrimination; Physician racial bias study; Racism; Residential segregation

Disease management programs, 754, 755, 771–772

Disease/illness. See Chronic diseases and conditions; Morbidity

Disease-specific interventions, review of, 770–775

Disparities Report (AHRQ), 761

Disparity: defining, as a difference, 12, 20; vs. inequality, as terms, 17. See also Health care disparities; Health disparities

Dissimilarity index, 332–333

Dissonant acculturation, 218

Distal causes, differentiating between proximate causes and, 367

Distributive justice: concern for, 726, 732; defined, 723–724

Don’t know/Not sure (DK/NS) designation, self-identifying vs. socially assigned as, 62, 63

Drinking. See Alcohol use/misuse

Drug prevention programs, Latino acculturation and, 235

Drug testing, racism and, 37

Drug use: acculturation and, 223, 227, 229, 396; analgesic availability and fear of, 702; availability of cocaine and, 420, 490; decreasing, effect of, 400; and the HPA axis, 162; increased, 388; during pregnancy, 37, 229, 314; residential segregation and, 344, 420; social environment and, 447–448; as unhealthy behavior, 170, 171, 172; in urban areas, 390–391. See also Substance use/misuse

E

Early industrial stage, 2, 3

Early life conditions, and adult health, 179–182, 185–186, 194, 403–404

East Asians, and self-reported racism, review of studies on, 113

Ecological approaches, 493–494

Economic changes, effect of, on socioeconomic status, 378

Economic Report of the President (1998), 338

Economic status. See Socioeconomic status (SES)

Education: access to, disparities in, 333, 334; and Asian acculturation, 266; and breastfeeding, 231; foreign-born vs. U.S.-born mothers and, 307, 308, 309; gradient in, and analysis of mortality and morbidity indicators, 379; and heterogeneity among Latinos, 215; and homicide rates, 343, 344; income returns at equivalent levels of, disparities in, 335–337, 393, 444, 445; inequalities in, health disparities and, 159, 762; and infant mortality, 391; and John Henryism and, 141, 142; Latino acculturation and, 238; level of, disparities in, 335, 336; and homicide rates, 343, 344; maternal, and pregnancy outcomes, 311, 312; as a measure of socioeconomic position, review of, 380, 381; mortality and, 446–447; segregation in, 333–334. See also Higher education; Sociodemographic factors; Socioeconomic status (SES)

Elderly people: and dietary behavior, 229; need for further research on interventions for, 780, 781; self-reported racism and, review of studies on, 108. See also Life course perspective

Electronic medical record (EMR), nationwide, 753

Emergency Medical Treatment and Active Labor Act (EMTALA), 766
Eminent domain, 474
Emory University, 593

Partners HealthCare System, 593
Partnership factors: challenging, 733–734, 742, 757; facilitative, 732–733, 735, 742
Passive coping responses: health outcomes related to, for Blacks, 89–90; self-reported racism and, review of studies on, 121
Paternal stress, 186
Patient adherence, 627
Patient characteristics, assessment of, by physicians, 611–612, 613–615, 650, 655, 656–657, 659–660. See also Implicit Association Test (IAT), use of
Patient domain, in the conceptual model of disparities in health care, 764, 769
Patient engagement, factors facilitating and hindering, 754, 755
Patient environment, 763, 764–765, 769
Patient factors, consideration of, in health disparities research, 674–677
Patient preferences, considering and understanding, in health disparities research, 671, 675–676
Patient Protection and Affordable Care Act (PPACA), 430–431
Patient safety indicators (PSIs), 708, 709, 710, 713–714, 714–715, 715–716, 717
Patient satisfaction: conceptual framework for study of, 542; and cultural competency, 567, 689, 692, 693–694; discrimination in medical care and reported, 506; discussion of, 551–552; disparities in, 541, 566, 569; methods in study of, 542–545, 553; new contribution to study of, 542; overview of factors in, 542; potential impact of physician perceptions on, 627; referrals and, 551, 552; results from study of, 545–551
Patient-based interventions, developing, 693
Patient-centered care: focus on, benefits of, 582; indicator of, 569; as a measure of quality, 689; nurses and, 779; quality of, study results on communication and, 579, 580; scoring, 572
Patient-physician interaction/communication: and Asian acculturation, 259; considering and understanding, in health disparities research, 677–678; and cultural competency, 567, 693–694; discussion of, 580–582; further examination needed on, 582; future studies on, need for, in relation to implicit physician bias, 602; involving sicker patients, 628; measures of, 571–572; methods of studying, 570–574; overview of, 567; results from study of, 574–580. See also Physician bias/discrimination
Patient-provider racial concordance, 259, 552, 574
Pay-for-performance programs, 777–778, 781
Payors, in the conceptual model of disparities in health care, 764, 765, 766, 768
Peer review, balanced, importance of, 44
Perceived Ethnic Discrimination Questionnaire, 112
Perceived racism: defined, 86; within a medical setting, patient satisfaction and, study of, 542, 545–546, 549, 550, 551, 552; as a predictor of birth outcomes, 194; as a stressor for Blacks, biopsychosocial model on, 79, 81–95
Perceived Racism Scale, 112
Perceived stress, hypertension and, 142–143
Performance incentive programs, 777–778
Personal domain, in the conceptual model of disparities in health care, 763, 764, 769
Personal responsibility, vision stressing centrality of, 42
Personality: John Henryism and, 152; racial and socioeconomic status differences in, 402–403
Personally mediated racism: allegory illustrating, 326–328; cultural interventions addressing, 776; defined and described, 324–325
Pharmaceutical availability, residential segregation and, 343, 420, 501, 502. See also Analgesic availability at pharmacies
Phenotypic “memory” mechanisms, 182–185
Photo Morpher Software, 591
Physical activity/exercise: and the built environment, 457, 458, 459, 460, 461, 462, 465, 468, 469–471, 472, 473, 474, 475; increasing, effect of, 400; interventions targeting, 771; Latino acculturation and, 223; measures related to, identifying studies with, 457; obesity/BMI and, 291; residential segregation and, 341–342; shift away from, diabetes and, 54; and weight-related beliefs in Black women, 296–297
Physical and cognitive functioning, age patterns and disparities in, 357, 361–364, 365, 366
Physical environment: effects of, in segregated communities, 341, 345–346, 402, 420; as part of the social environment, 443
Physical health: acculturative stress and, 255; and Asian acculturation, studies measuring, 257, 259–260, 261, 265, 275, 279–280; chronic conditions as a measure of, 163,
164, 165; contradictory disparities in mental health and, 159, 160; effects of stress and unhealthy behaviors on, 161–162, 164; as the manifestation of life experiences, 359; racism and, 394; self-reported racism and, review of studies on, 114, 115, 116, 122, 123; studies assessing, built environment and, 463; unhealthy behaviors and, 162. See also specific physical conditions

Physiological stress response. See Psychological and physiological stress responses

Politics, intrusion of, into science, race and, 41–44

Polygenic position, 49

Population figures: changes in, 1, 2, 3, 303, 440, 441; increase in, due to Immigration Act of 1965, 303; poverty, 444, 524; projected, racial diversity of, 2, 440; pyramid, foreign-born vs. U.S.-born, 4; by race and Hispanic origin, 441; total, racial and ethnic minorities constituting larger percentages of, 5

Population health, common measures of, 215

Population-based epidemiologic surveys, noncoverage of subgroups in, issue of, 399

Postindustrial stage, 2, 3

Poverty: and birth outcomes, 189, 377–378; and black-white migration, 389; concentrated, long-term exposure to, effects of, 335; as a contributing factor to health disparities, 762; cumulative effect of, 359–360; and dietary behavior, 161, 229; disparities in, 335, 336, 338, 387, 390, 443–444; fast food and, 467; feminization of, 344; measure of, issue with, 380; and overrepresentation of women, 383; persistent, defined, 381; population figures for, 444, 524; regional factor in, 333; and residential segregation, 333–334, 339, 500; as a stressor, 160; and urban form, 469; and the working poor, 524. See also Socioeconomic status (SES)

Power relationships: institutional, 36, 38; as part of the social environment, 443; and social class/status, 404–405, 672; socioeconomic status and, 404–406. See also Black political power

Practice-enabling strategies, developing, 693

Preferred provider organization (PPO), 743

Pregnancy: alcohol use during, 194, 229, 314; diabetes during, 192, 226; disparities in mortality from, 20; drug use during, 37, 227, 229, 314; hypertension during, 192; policy changes supporting, need for, 195; smoking during, 194, 223, 228, 229, 230, 231, 314, 315; support during, 314–315; testing women for drugs during, racism and, 37; unwanted, 315–316. See also Teen pregnancy

Pregnancy adverse outcomes study: discussion in, 316–317; introduction to, 303–304; methods in, 304–305; results of, 305–316

Prejudice: attitudinal racism and ethnic, 80; defining, 324; and the ideology of free will, 87; in medical care, 37; as part of
personally mediated racism, 324–325; socioeconomic status reinforcing, 391.  
See also Discrimination; Racism

Premodern stage, 2, 3

Prenatal care: access to, issue of, 189, 195; efforts to increase, impact of racism on, example of, 37; foreign-born vs. U.S.-born mothers and, 308, 309; immigrants and, 307; lack of, impacts of, 312, 377–378; Latino acculturation and, 230, 236; and pregnancy outcomes study, 311

Prenatal nutrition/undernutrition: policy changes addressing, need for, 195; and risk of developing disease, 177, 178, 179, 180, 181–182, 185–186, 403

Prenatal stress: blame for, issue of, 194; and risk of developing disease, 177, 182, 193. See also Maternal stress

Preterm births: defining, 305; disparities in, 21, 24, 387–388; foreign-born vs. U.S.-born mothers and, 306, 307, 308, 309, 310, 312, 313, 314, 316, 317; hypertension and, 192; Latino acculturation and, 225, 229, 231; maternal stress and, 189

Preventive services/screenings: acculturation and, 395; and Asian acculturation, 259, 264; importance of, 399, 400; Latino acculturation and, 225, 226, 231, 232–233, 236; organizational factors contributing to disparities in, 678. See also Access to care; Health care utilization

Primary data collection, uniform approaches to, health plans working on, 758

Problem-focused coping vs. emotion-focused coping, 121

Procedural justice: achieving, 736; concern for, 726, 732; defined, 725

Projection, 90

Prostate cancer: acculturation and, 396; disparities in mortality from, 23; prevalence of, disparity in, 27

Provider domain, in the conceptual model of disparities in health care, 763–764, 769

Provider engagement, factors facilitating and hindering, 753
