Contents

Preface ix
Introduction xi

NONDESTRUCTIVE EVALUATION OF CERAMICS SYSTEMS

Damage Sensitivity and Acoustic Emission of SiC/SiC Composite During Tensile Test and Static Fatigue at Intermediate Temperature after Impact Damage
M. Picard, E. Maillet, P. Reynaud, N. Godin, M. R'Mili, G. Fantozzi, J. Lamon 3

Determination of Acoustic Emission Sources Energy and Application towards Lifetime Prediction of Ceramic Matrix Composites
E. Maillet, N. Godin, M. R'Mili, P. Reynaud, J. Lamon, and G. Fantozzi 15

Nondestructive Evaluation of Thermal Barrier Coatings by Optical and Thermal Imaging Methods
J. G. Sun 27

Visualization of Internal Defects in Ceramic Products by using a UT Probe Array
Yoshihiro Nishimura and Takayuki Suzuki, Katsumi Fukuda, and Naoya Saito 35

Evaluation of Ceramic Materials and Joints using UT and X-Ray
Yoshihiro Nishimura, Takayuki Suzuki, Naoki Kondo, and Hideki Kita 47

Investigation of Non-Destructive Evaluation Methods Applied to Oxide/Oxide Fiber Reinforced Ceramic Matrix Composite
Richard E. Johnston, Martin R. Bache, Mathew Amos, Dimotheos Liatpis, Robert Lancaster, Richard Lewis, Paul Andrews, and Ian Edmonds 57
WEAR, CHIPPING, AND FATIGUE OF CERAMICS AND COMPOSITES

Edge Chip Fracture Resistance of Dental Materials 71
Janet B. Quinn, George D. Quinn, and Kathleen M. Hoffman

High Pressure Seawater Impingement Resistance of Low Silica 85
Aluminum Oxides
Tim Dyer, Ralph Quiazon, and Mike Rodgers

Wear Behavior of Ceramic/Metal Composites 93
M. K. Aghajanian, B. P. Givens, M. C. Watkins, A. L. McCormick,
and W. M. Waggoner

Use of Ceramic Sliding Systems in a Prototype Gasoline Pump with 101
Operating Pressures of up to 80 MPa
C. Pfister, H. Kubach, U. Spicher, M. Riva, and M. J. Hoffmann

Machinability Studies of Al/SiC/B4C Metal Matrix Hybrid Composites 115
using PCD 1600 Grade Insert
Akshay Maheshwari, E.N. Ashwin Kumar, and Anuttam Teja

Fretting Fatigue Failure of Engineering Ceramics 125
C. Wörm and K.-H. Lang

MICROSTRUCTURE AND MECHANICAL PROPERTIES OF
MONOLITHIC AND COMPOSITE SYSTEMS

Low CTE and High Stiffness Diamond Reinforced SiC Based 135
Composites with Machineable Surfaces for Mirrors and
Structures
M. A. Akbas, D. Mastrobattisto, B. Vance, P. Jurgainis, S. So, P. Chhillar
and M. K. Aghajanian

Tailoring Microstructures in Mullite for Toughness Enhancement 143
D. Glymond, M. Vick, M.-J. Pan, F. Giuliani, and L. J. Vandepitte

Microstructures of La-Doped Low Thermal Expansion Cordierite 153
Ceramics
Hirotu Unno, Sholchi Toh, Jun Sugawara, Kansaku Hattori, Selichiro Uehara,
and Syo Matsumura

Strategies to Optimize the Strength and Fracture Resistance of 163
Ceramic Laminates
Raul Bermejo, Zdenek Chlup, Lucie Sestakova, Oldrich Sevec, and Robert Danzer

Investigation of Critical Fiber Length in Phenol Matrix Based Short 175
Fiber CFRP by Double Overlap Joints
Daniel Heim, Swen Zaremba, and Klaus Drechsler
Mechanical and Microstructural Characterization of C/C-SiC Manufactured Via Triaxial and Biaxial Braided Fiber Preforms
Fabian Breede, Martin Frieß, Raouf Jemmali, Dietmar Koch, Heinz Voggenreiter, Virginia Frenzel, and Klaus Drechsler

Influence of Fiber Fabric Density and Matrix Fillers as well as Fiber Coating on the Properties of OXIPOL Materials
Sandrine Hoening, Enrico Klatt, Martin Frieß, Cedric Martin, Ibrahim Naji, and Dietmar Koch

Weave and Fiber Volume Effects in a PiP CMC Material System
G. Cijard, E. Prevost, U. Santhosh, R. Naik, and D. C. Jamon

Innovative Clay-Cellulosic Biosourced Composite: Formulation and Processing
Gisèle L. Lecomte-Nana, Olivier Barré, Céatherine Nonoy, Gilles Lecomte, and Thierry Terrail

Processing and Testing Re2Si2O7 Matrix Composites

Reaction Bonded Si/SiB6: Effect of Carbon Additions on Composition and Properties
S. Salamone, M. K. Aghajanian, and O. Spriggs, and S. E. Horner

Kinetics of Passive Oxidation of Hi-NICALON-S SiC Fibers in Wet Air: Relationships between SiO2 Scale Thickness, Crystallization, and Fiber Strength
R. S. Hay, G. E. Fair, A. Hart, S. Poticary, and R. Bouffioix

Study on the Stiffness of Comeld Composites Joints
Hongjian Zhang, Weidong Wen, and Haitao Cui

High-Temperature Interlaminar Tension Test Method Development for Ceramic Matrix Composites
Todd Z. Engel

Tensile Fracture Mechanism of Silicon Impregnated C/C Composite
Akio Ohtani and Ken Goto

Effects of Target Supports on Foreign Object Damage in an Oxide/Oxide CMC
D. Calvin. Faucett, Jennifer Wright, Matthew Ayre, and Sung R. Choi

Experimental and Numerical Study on Application of a CMC Nozzle for High Temperature Gas Turbine
Kozo Nita, Yoji Okita, and Chiyuki Nakamata
