**ACRES** 269

- Activated dynamical scaling 172, 173
- Activated scaling 175
- Adaptive FE algorithm 261
- Adaptive meshes 229, 297
- Adaptive model refinement techniques 323
- Adaptive refinement methods 292, 329
- Adaptive remeshing 305
- Adiabatic approximation 111
- Adiabatic correction fluctuation-dissipation (ACFD) formula 139
- Adiabatic local density approximation (ALDA) 111
- Alkali halides 430
- All-atom representation 432

**AMBER** 24, 270, 394, 436, 438, 445, 480, 482

- Anion polarizability 226
- Anion solvation 226
- Anisotropic space-time scaling 183

**APBS** 269, 270

- Approximate functionals 100
- Approximate trajectories 385, 391
- Approximated nonreflective BC 334
- Approximations 12, 100, 111
- Artificial boundary 292
- Asymptotically corrected (AC) functionals 123
- Atomic orbital basis sets 64, 65

**ACRES** 269

- Activated dynamical scaling 172, 173
- Activated scaling 175

- Alkali halides 430
- All-atom representation 432
Basis set completeness error (BSCE) 78
Basis set convergence 112
Basis set extension correction 10
Basis set superposition error (BSSE) 6, 16, 50, 66, 77, 227
Basis set truncation 12
Benzene dimer 3, 72, 79
Berry phase term 180
Bifurcated hydrogen bonds 73
Bilayer Heisenberg quantum antiferromagnet 187, 204
Binder cumulant 190
Biochemistry 92
Bjerrum length 264
Bloch’s theorem 316
BLYP 101
Born-von Karman boundary conditions 316
Boundary condition (BC) 233, 290, 295, 309, 334
Boys-Bernardi CP correction 51, 77
BP86 118
Bridging scale/multigrid methods 323, 327
Brittle fracture 297
Brownian dynamics 268
Brownian motion 251
B-Z DNA transition 400
Cancellation of errors 14
CASPT2 118, 119
Cauchy-Born rule 299, 313, 316, 322, 326, 340
CC2 119
CCSD 3
CCSD(T) 3, 11, 24
CECAM workshop 255
Channels 224
Characteristic correlation time 462
Charge density 230
Charge fluctuations 442
Charge sloshing 258
Charge transfer 137
 Charges from electrostatic potential grid (CHELPG) 434
CHARMM 24, 270, 380, 434, 480, 481
Charmm PB 270
Chebyshev-filtered subspace 261
Chebyshev-filtered subspace acceleration 256
Chemical accuracy 62
Chemical bond 45
Chemical potential 97
Chirality 93
Circular dichroism (CD) 92
CIS 119
Classical Hamiltonian 179
Classical Monte Carlo 184, 204
Classical phase transitions 176
Classical statistical mechanics 179
Cluster-induced geometrical perturbations 49
Clusters 39, 40, 93
Coarse graining 432
Coarse-grained molecular dynamics (CGMD) 330
Coarse-grained models 474
Coil-helix transition 400
Combustion 103
Complete basis set (CBS) limit 5, 21, 62, 65
Compressibility 442
Computational chemistry 223
Computational cost 11
Computing phase equilibria 454
Conductivity 445, 446
Configuration interaction (CI) 61, 94
Configuration-bias Monte Carlo (CBMC) methods 264
Conformational changes 385, 387
Conjugated polymers 137
CONQUEST 260, 262
Continuous fractional component Monte Carlo (CFC MC) 451
Continuous phase transition 169, 176
Continuum dielectric 248
Continuum displacement field 298, 300
Continuum elasticity 290
Continuum finite-element region 292
Continuum mechanics 287
Contracted Gaussian-type orbitals 114
Contraction coefficients 102
Convergence 228, 243, 294
Convergence problems 451
Cooperative effects 54
Cooperativity 54
Correlation consistent basis sets 65, 68
Correlation energy 63
Correlation function 172
Correlation length 171, 172, 186
Correlation time 173, 462
Cost-to-performance ratio 117
Coulomb distance cutoffs 370
Coulomb hole 21
Coulomb potential 370
Coulomb/exchange (JK)-fitting 17
Coulombic interactions 433
Counterpoise (CP) correction 5, 6, 50, 66
Coupled atomistic and discrete dislocation (CADD) methods 304
Coupled Local/Nonlocal QC 302
Coupled-cluster (CC) theory 3, 42, 47, 63, 77
Coupling of length scales (CLS) 292, 317, 344
CP-corrected potential energy surface 78
CPMD 478
Crack formation 289
Crack propagation 296, 318, 329
Critical behavior 169
Critical exponent values 170, 172
Critical isotherm 172
Critical opalescence 172
Critical point 168, 171
Critical regions 291
Critical slowing down 173, 183, 238
Crystal densities 439
Crystal packing 1
Current densities 104, 136
Current density operator 105
Cutoff distance 296
Cyclic (HF)_n clusters 58
Cytochrome c 401
Damping region BC 334
Data analysis 25, 483
Debye screening length 249
Debye-Hückel length 249
Deconfined quantum criticality 181
Defect corrections 240, 250
Defect dynamics 324
Definitions of critical exponents 172
Degenerate ground states 96
Delocalized pi stacking 73
DelPhi 270
Densities 101
Density 96
Density fitting (DF) approximations 15, 75
Density functional theory (DFT) 22, 40, 42, 75, 227
Density matrix 112, 246, 256
Density matrix renormalization group (DMRG) 211
DFT plus dispersion (DFT-D) 23, 77
DFT-MG solvers 245
DFT-SAPT 24
Diacetylene dimer 73
Dialkylimidazolium cations 438
Diffuse basis function 66, 116
Diffuse functions 117
Diffusion equation 251
Diffusion of defects 297
Diffusive behavior 458
Diffusive flux 387
Diluted bilayer quantum antiferromagnet 191
Diluted Heisenberg magnets 205
Dirty bosons in two dimensions 196
Discrete path sampling (DPS) 388
Dislocation nucleation 297
Dislocations 305, 308
Disordered phase 171
Disordered systems 183
Dispersion correction 23
Dispersion forces 42, 44, 76
Displacement field 300
Dissipation 191
Dissipative transverse-field Ising chain 189
Dissociation energies 48
Distance cutoffs 370
Distorted monomers 52
Diverging correlation length 172
Diverging length scale 173
DL_POLY 432, 443, 449, 474, 481
DL_POLY2 481
DL_POLY3 481
DNA bases 93
Domain decomposition methods 292, 317, 322
Double excitations 136
Double-pole approximation (DPA) 126
Double-zeta basis sets 114
Drug binding 1
Dynamic heterogeneity 456
Dynamic mean-field theory 213
Dynamic properties 429
Dynamical 172
Dynamical electron correlation 23
Dynamics of fluids 290
Eckart constraints 395
Edge-to-edge decomposition (EED) 320
Effective fragment potential (EFP) 42, 63
Eigenfunctions 256
Eigenvalue problems 244
Eigenfunction orthonormality 245
Einstein equation 458
Electric circular dichroism 93
Electric current autocorrelation function 467
Electric current 462
Electrical conductivities 461
Electron correlation 3, 13
Electron scattering 135
Electron transport 143
Electronic near degeneracies 5
Electronic structure 255
Electron-phonon interactions 1453
Electrostatic forces 225, 381
### Subject Index

**Electrostatic potential** 230, 428  
**Electrostatics** 262  
**Elliptic equations** 231  
**Elmer** 261  
**Embedded atom method (EAM)** 294, 338  
**Energy current** 462  
**Ensemble average** 444, 454  
**Ensembles of paths** 386  
**Enthalpy of vaporization** 433, 434, 440  
**Equations of motion** 318, 385, 427  
**Equilibration** 442  
**Equilibrium atomic positions** 293  
**Ergodic behavior** 458  
**Error** 232, 238, 253  
**Error of locality** 124  
**Errors in kernel** 125  
**Errors in potential** 125  
**Errors in standard TDDFT** 136  
**Eutectic mixture** 421  
**Ewald method** 264  
**Ewald summation** 379  
**Exact diagonalization** 212  
**Exact exchange (EXX)** 100, 121  
**Exact nonreflective BC** 334  
**Exact trajectories** 391  
**Excess chemical potentials** 432, 446, 450  
**Exchange-correlation (XC) energy** 99  
**Exchange-correlation functional** 92, 94  
**Exchange-dispersion** 27  
**Exchange-induction** 27  
**Excitation frequencies** 109  
**Excited states** 91, 118  
**Exciton spectrum** 137  
**Explicitly correlated R12 and F12 methods** 21  
**Extensions of the QC method** 304  
**External field** 171  
**External force** 322  
**External potential** 96, 106  
**F12 methods** 21, 22, 68  
**Failure of Landau theory** 170  
**Failure of TDDFT** 138  
**Far ultraviolet** 116  
**FAS-MG method** 244  
**Fast Fourier transform (FFT)** 228  
**Fast multipole** 379  
**Fast summation methods** 379  
**FE evolution** 329  
**FEMTECK** 261, 262, 269  
**Feynman’s path integral** 185  
**Finite differences** 228, 232  
**Finite element combined with atomistic (FEAt) modeling** 295  
**Finite system size** 173  
**Finite-difference representations** 232  
**Finite-element (FE) method** 228, 233, 288, 294, 298  
**Finite-size effects** 173  
**Finite-size scaling** 173, 174  
**Finite-temperature equilibrium methods** 311  
**First-order response** 107  
**First-principles MD** 478  
**Fixed-node quantum Monte Carlo method** 210  
**Fluctuation-dissipation theorem (FDT)** 140  
**Folding dynamics** 400  
**Force field** 428, 483  
**Fracture** 318  
**Fragment molecular orbital (FMO) method** 42  
**Free energy perturbation theory** 449  
**Free volume** 449  
**Frozen core approximation** 47, 69, 259  
**Full approximations scheme (FAS) multigrid** 238  
**Full CC limit** 63  
**Full configuration interaction (FCI) limit** 62, 63  
**Full multigrid (FMG)** 238, 242, 243  
**Fully nonlocal QC (FNL-QC)** 300  
**Functional** 230  
**Functional derivative** 231  

**GAMESS** 436  
**Gating mechanism** 225  
**Gaussian basis functions** 102  
**Gaussian behavior** 456  
**Gauss-Seidel method** 236  
**Gear predictor-corrector integration method** 375  
**Generalized Born model** 400  
**Generalized gradient approximations (GGAs)** 91, 100  
**Generalized Langevin equation (GLE)** 328  
**Generic scale invariance** 180  
**Geometries** 4, 80  
**Geometry optimization** 48  
**Ghost atom** 7, 51  
**Ghost force reduction methods** 302  
**Ghost forces** 291, 302, 330  
**Ghost orbitals** 51  
**Gibbs ensemble Monte Carlo method** 451  
**Gibbs free energy surface** 388  
**Gpaw** 260, 269  
**Gradient expansion approximation (GEA)** 100
Gradient-corrected functionals 23
Grain boundary structure 297
Gramicidin A channel 252
Gram-Schmidt procedure 236, 395
Green solvents 424
Green-Kubo integrals 461, 467
Green’s function boundary condition (GFBC) methods 309, 310, 342
Green’s functions 227, 266
Green’s theorem 105
Grid point 234
Grid-curring methods 259
GROMACS 480, 481
Ground-state density 107
Ground-state density functional theory 91
Ground-state energy 96
Ground-state potential 120
Ground-state XC energy 139
H$_2$S-benzene complex 27
Hamiltonian 96
Hamilton’s equations of motion 330
Hand-shake region 291, 318
HARES 262, 269
Harmonic approximation of the potential 312
Harris criterion 175
Hartree energy 99
Hartree-Fock exchange 23, 101
Hartree-Fock molecular orbital theory 3, 25, 42, 63
Heat capacities 443, 444
Heavy-fermion quantum criticality 181
Heisenberg magnets 170, 187, 201, 205
Heisenberg uncertainty principle 44, 168
Hellman-Feynman forces 264, 342
Hellman-Feynman theorem 345
Helmholtz free energy 312
Henry’s law constant 450, 451
Heterogeneous multiscale method (HMM) 324
High harmonic generation (HHG) 142
High viscosity 462
Hofmeister effects 226
Hohenberg-Kohn (HK) theorem 96, 104, 106, 289
Hookean spring models 379
Hückel screening length 264
Huggins force field 429
Hybrid functionals 23, 101
Hybrid methods 287
Hydrogen bonding 1, 8, 39, 445
Hydrogen fluoride clusters 46
Hyperscaling relations 173
Idempotency 113
Imperfections 174
Impulse MTS methods 376, 382
Impurity quantum phase transitions 181
Incompatibility forces 311, 342
Induction 44
Inorganic chemistry 92
Interaction energies 48
Interfragment interactions 42
Intermonomer interaction 42
Interpolation operations 239
Ion channels 224
Ion transport 251
Ionic liquid (IL) 421
Ionic liquid simulations 427, 430
Ion-induced polarization 429
Ising ferromagnets 170
Ising model 184
Isochoric-isothermal MD simulations 447
Isocomittor surfaces 390
Isothermal compressibility 433
Isothermal-isobaric MD simulations 439
Isotherms 451
Iterative updates 235
Jacobi method 236
Justification for multiscale modeling 226
Kinematic constraints 297
Kinetic Monte Carlo 291
Kohn-Sham (KS) system 97
Kohn-Sham density functional theory 3
Kohn-Sham equations 255
Kohn-Sham orbitals 101, 102
Kohn-Sham response function 108
Kondo fluctuations 181
Koopmans theorem 99, 142
KS equations 102
KS orbital eigenvalues 120
Lagrange multiplier methods 322
LAMMPS 474, 480, 483
Landau free energy 170
Landau theory 169
Landauer theory 227
Landauer theory of transport 266
Landauer-Büttiker formalism 145
Landau-Ginzburg-Wilson (LGW) free energy 171
Langevin dynamics 369, 377, 383
Laplace equation 237
Laplacian operator 228
LDA-SIC functional 102
Learn-on-the-fly (LOTF) method 346
Least action principle 391
Length scales 223, 474
Lennard-Jones potential 373
LGW paradigm 180
Lie-Oxford bound 101
Limitations of real-space methods 236
Linear combination of atomic orbitals (LCAO) 65, 102
Linear R12 approaches 21
Linear response 92, 107, 470
Linear scaling for electronic structure 246
Linear-response TDDFT 126
Linhard function 141
Liquid densities 434, 439, 440, 442
Liquid structure 437
LMP2 17, 75
Local correlation approximations 14
Local density approximation (LDA) 91, 100
Local harmonic approximation (LHA) 312
Local QC 299, 340
Local spin density approximation (LSDA) 100, 118
Local time error 124
London dispersion 5, 22, 39
Long-range forces 382
Long-range stress fields 287
Long-time relaxation process 468
Low-frequency motions 382
Low-lying transitions 125
LYP 101
Macropscopic atomistic ab initio dynamics (MAAD) 317
Macroscopic dynamical properties 458
Madelung constants 265
MADNESS 269
Magnetic circular dichroism 93
Magnetic quantum phase transitions 196
Magnetic susceptibility 186
Many-body decomposition 54, 59
Many-body perturbation theory (MBPT) 42, 63
Many-body polarizable force field 468
Many-electron wave function 65
MATLAB 381
Maximization of the Diffusive Flux (MaxFlux) 387
Mayer force field 429
MDynaMix 440, 444, 480, 482
Mean displacement field 330
Mechanical behavior of materials 287
Medium-range correlation 24
Medium-range forces 379
Melting point 430
Message passing interface 254, 349, 395, 484
Metropolis-Monte Carlo 314
MGMol 262, 269
Milestone 403
Minimum energy path 388, 393, 396
MOIL 394, 397
Molar volume 433
MOLDYN 482
Molecular dynamics 260, 288, 346, 367, 385, 427, 439
Molecular mechanics 23, 24, 43
Molecular wavefunction 65
MOLPRO 16, 22
Molten salts 421
Monte Carlo methods 290, 312, 427, 430
Monte Carlo shooting method 385
MP2 3, 11, 42, 46, 62, 63, 72, 432
MPQC 22
Multigrid instead of k-space (MIKA) project 259, 261, 262, 269, 270
Multigrid methods 223, 336
Multitron transport 225
Multiphoton ionization (MPI) 142
Multiple time-scale simulations 290
Multiple time-step (MTS) 371, 372
Multiple-length scales 287
Multiple-time-step algorithms 322
Multiscale coarse graining (MSCG) 475
Multiscale phenomenon 289
Mutual-displacement boundary conditions 295
n-alkane dimers 73
NAMD 442, 474, 480
Nanoindentation 289, 297, 329
Naphthalene 94, 103, 114
Navier-Stokes/Monte Carlo method 290
n-Body decomposition (NBD) scheme 43
Near-sightedness principal of matter 229, 260
Néel phase 181
New approximate functionals 136
Newtonian equations of motion 367
Newtonian shear viscosity 441
Noble-gas atoms 127
Nodal displacements 294, 318
Node 234, 288, 322
Nonadditivity 54
Subject Index 529

Noncovalent interactions 39, 41, 46
Nonequilibrium Green’s functions 143
Nonequilibrium molecular dynamics (NEMD) 470
Non-Fermi liquid behavior in metals 169
Non-Gaussian behavior 436
Non-Gaussian dynamics 442
Noninteracting electrons 97
Nonlinear response properties 260
Non-Newtonian behavior 471
Nonuniform displacement fields 301
Nosé-Poincaré thermostat 333
Nudged-elastic-band (NEB) algorithm 388, 394
Numerical errors 233
Numerical grid 102
Numerical integration 427
Numerical integration grid 76
Numerical integration with force splitting 374
Numerical stability 370

Occupation number 112
octopus 260, 267, 269, 270
ONETEP 262, 269
Onsager-Machlup object function 391
OpenMX 269
OPLS force field 24, 394, 434, 438
Opposite-spin electron correlation 18
Optical absorption spectrum 92
Optimization of action 390
Optimized effective potential (OEP) method 99, 102, 121, 260
Orbital domains 17
Orbital-dependent DFT 137
Orbital-dependent functionals 102, 137
Orbital-free DFT 292, 304, 337
Orbital-free DFT-quasicontinuum method (OFDFT-QC) 292, 304
Orbitals 256
Order parameter 169, 171, 172, 190, 386
Organic chemistry 92
Oscillator strengths 110, 114, 126
Overlapping domain decomposition (ODD) 320

π Interactions 1
Parallel computing 229, 484
Parallelization 69
PARSEC 256, 260, 262, 269
Partial differential equations 223, 230, 288, 324
Partial path transition interface sampling (PPTIS) 403
Particle-mesh-Ewald (PME) method 265
Partition function 171, 184, 314, 331
Pauli exclusion principle 18, 44
Pauling points 14
PBE 118
PBE0 101, 118
Periodic boundary conditions (PBC) 300
Phase equilibrium condition 451
Phonon reflections 322, 335
Photobiology 93
Photochemistry 93, 120, 138
Plane waves 102, 112
Plane-wave basis sets 228
PNP solver 270
Poisson action functional 231
Poisson equation 229, 237
Poisson-Boltzmann equation 248
Poisson-Nernst-Planck (PNP) equations 250
Polarizability 5, 137, 440, 464
Polarizable force fields 24, 430, 464
Polarization 44
Polarization functions 103, 114
Polymers 137
Polynomial basis functions 234, 260
Potential function 369
Potentials of mean force (PMFs) 263, 331, 387
Power spectrum analysis 382
Power-law dynamical scaling 173
π-π interactions 1
Protein fluctuations 225
Protein folding 1, 397
Pseudoatoms 291
Pseudopotential 259
Pseudospectral approximation 15
PSI 22
π-stacking 62
Pulay forces 228
Pyridinium force field 442

QC free energy functional method 313
QC k-space quasi-harmonic (QC-QHMK) model 315
QC-ghost force corrected (QC-GFC) 303
QC-Mixed 302
QM/MM methods 262, 290
Quadratic configuration interaction (QCI) 42
Quantitative accuracy 469
Quantitative property prediction 428
Quantum atomistic static interface (QuASI) method 342
Quantum control 142
Quantum defect 128
Quantum defect extractor (QDE) 134
Quantum defect theory 129
Quantum energy functional 231
Quantum fluctuations 168, 177, 187
Quantum Hall effects 169
Quantum Monte Carlo (QMC) 100, 182, 198, 227
Quantum phase transitions 167
Quantum scaling 179
Quantum statistical mechanics 179
Quantum-to-classical mapping 184
Quasi-continuum (QC) method 297
Quasi-continuum Monte Carlo (QCMC) 314
Quenched disorder 173, 191
R12 methods 21, 68
Radial distribution functions 433
Random transverse-field Ising model 194
Random walk 461
Random-mass disorder 174
Random-phase approximation (RPA) 109
Random-T, disorder 174
Rare events 372
Rayleigh-Ritz principle 96
Reaction paths 371
Reactive trajectories 387
Real space grid 112, 121
Real-space methods 223
Reducing computational cost 11
Relaxation 235
Relaxation time 467
Renormalization group 168, 211
Representative atoms (repatoms) 298, 314
Resolution of identity (RI) 14, 15, 21, 68, 75, 103, 117,
RESP method 436
Response function 135
Restricted Hartree-Fock (RHF) 3, 434
Restriction operations 239
Reverse nonequilibrium molecular dynamics (RNEMD) 471
Rigid monomer approximation (RMA) 47, 53
RI-LMP2 17, 75
RI-MP2 75
Ritz projection operators 245
Room temperature ionic liquids (RTILs) 41, 421
Rotational mobility 456
Rotational relaxation times 441, 442
Runge-Gross theorem 92, 104
Rydberg series 129
Rydberg state 116, 120
Saddle points 73
Sadlej basis set 121
Same basis set 121
Same-spin electron correlation 18
SAPT2 26
Scaling hypothesis 172
Schrödinger equation 95, 229
Second-order transitions 167
Self-consistency 245
Self-consistent field (SCF) method 42
Self-consistent field hybrid atomistic coarse grain (SCF-HACG) 303
Self-diffusivity 442, 446, 458, 461
Self-interaction errors (SIE) 144
Self-interaction-free functionals 121
Self-penalty walk 394
Semiempirical methods 24
Sharp phase transitions 183
Shear rate 471
Shear viscosities 429, 462, 464
Shear-dependent viscosity 471
SIESTA 261, 262, 267, 269, 478
Silogens 345
Simple point charge (SPC) model 473
Single-pole approximation (SPA) 126
Size consistency 60
Size extensivity 60
Slater determinants 63
Slater-type orbitals 102
Slave atoms 314
SLLOD algorithm 471
Slow dynamics 455
Sluggish dynamical behavior 434, 442, 458
Smoluchowski equation 251
Solutes in ionic liquids 446
Solvation of gases in liquids 449
Solvation ordering 453
Solvatochromic shift 455
Solvant effects 2
Solvent polarity 455
Solvent relaxation 457
Solvent reorganization 455
Spatially varying dielectric constant 248
Specific heat 172
Spin densities 100
Spin-component-scaled (SCS) MP2 17, 18, 74
Spin-opposite-scaled (SOS) MP2 18
Spin-orbit splitting 126
Spin-scaled MP2 74
Splitting of forces 373
Stacked benzene 62
Staggered time integration scheme 329
Standard functionals 136
State point 429
Static properties 293, 429
Stilling-Weber (SW) potential 318, 344
Stochastic difference equation in length (SDEL) 391
Stochastic difference equation in time (SDET) 391
Stochastic forces 383
Stochastic forcing function 377
Stochastic series expansion (SSE) algorithm 200
Stress field 342
Stress tensor 462, 471
Stress-induced defect processes 289
String method 389
Strong fields 141
Structures 101
Subdiffusive motion 459
Successive overrelaxation (SOR) method 236, 252, 268
Superconductivity 169
Superconductor-insulator transition 196
Supercooled liquid 434, 455
Supercritical slowing down 183
Superfluid-insulator transitions 207
Supermolecular interaction energies 48
Superoxide dismutase (SOD) 401
Superuniversality 172
Symmetry-adapted perturbation theory (SAPT) 12, 24, 25, 26, 43, 141
Symplectic property 368

Taylor expansion 309, 312
Taylor series 296, 374
TDDFT 127
Test particle insertion method 450
Testing TDDFT 131
Thermal conductivities 429, 461
Thermodynamic integration 446
Thermodynamic properties 430
Thermochemistry 101
Three-body interaction energies 9, 59, 452
Tight-binding (TB) DFT 288
Time correlation function 386, 454
Time discretization 368
Time scales 290, 324, 367, 462
Time step 317
Time-dependent Kohn-Sham potential 92
Time-dependent basis functions 113
Time-dependent DFT 24, 91, 92, 118, 256

Time-dependent electron localization function (TDELF) 141
Time-dependent fields 141
Time-dependent Kohn-Sham (TDKS) equations 92, 106
Time-dependent Schrödinger equation 92, 141
Time-dependent Smoluchowski equation 268
Time-scale limitations 454
Time-step size 236
Tosi-Fumi force field 429
Towhee 482
Trajectory 381, 427
Transferability 289
Transition frequencies 92, 120, 126
Transition interface samples (TIS) 403
Transition path sampling (TPS) 385
Transition path theory (TPT) 389
Transition states 76, 78
Transition tube 389
Translational mobility 456
Transparent interface method 292, 349
Transport properties 430, 455, 461
Transporters 224
TransSIESTA 267, 270
Transverse-field Ising model 184, 197
Triple-zeta basis sets 116
Truncated basis sets 12
Tunneling 226
TURBOMOLE 22, 91, 102
Two-body interaction energies 9, 53

UHBD 270
Umbrella sampling 387
Unified Hamiltonian 318
United-atom interaction site 432
United-atom ionic liquid force fields 475
Unphysical behavior 78
Unphysical forces 291, 302
Unpolarized basis sets 114

Valence electrons 116
Valence-Rydberg mixing 124
van der Waals complexes 5, 23, 39, 40, 45
van der Waals density functional (vdW-DF) 23
van der Waals forces 45, 140
van Hove correlation function 456
Vapor pressure 424
Variational BC 334
Variational boundary value problem 233
V-cycle 242, 257
Velocity Verlet algorithm 349, 374
Verlet algorithm 322, 367
Vertical excitation energies 122
Vibrational frequencies 4, 18, 80, 118, 445
Vibrational wavenumbers 439
Vibrations 101
Vignale-Kohn (VK) approximation 136
Virtual atoms 322
Viscosity 445, 446, 461, 462
VMD 400
Volatility 424
Volumetric expansion coefficients 433
von Neumann equation 113

Water 45, 76, 93, 367, 379, 447, 450, 473
Water dimer 383
Water hexamer 68
Wave functions 256
Wave packet 135

Wave reflections 291, 312, 322
Wavefunction theory (WFT) 42
Wavelet applications to electronic structure 262
Wavelets 228
Weak disorder 174
Weak noncovalent interactions 40, 41, 43, 46
Weakly bound complexes 23, 39
Weighted Jacobi method 236
Wolff cluster algorithm 193, 195
World-line Monte Carlo algorithm 199
Writing multigrid solvers 253

XC kernel 124
X-ray edge spectroscopy 126

Zero-point vibrational energies 81
