Preface, vii
Acknowledgements, viii
Learning objectives checklist, ix

Part 1
About X-rays, 1
- What are X-rays?, 1
- How are X-rays produced?, 1
- The resulting image on the X-ray film, 2
- How are X-ray images (radiographs) stored?, 2

Hazards and precautions, 3
- Radiation hazards, 3
- IRMER 2000, 3
- In women of reproductive age, 3

Chest X-ray (CXR) views, 4
- PA erect CXR, 4
- Other views, 4

Normal anatomy on a PA chest X-ray, 5
- Normal anatomy 1, 5
- Normal anatomy 2, 5
- Normal anatomy 3, 6
- Normal anatomy 4, 7
- Normal anatomy 5, 8
- Normal anatomy 6, 8
- Normal anatomy 7, 9
- Normal anatomy 8, 9

Presenting a chest radiograph, 10
- Be systematic, 10

Film quality, 11
- Rotation, 11
- Adequate inspiration, 13

Part 2
Overview of the ABCDE of chest X-rays, 14
The ABCDE of chest X-rays, 15

What to look for in A – Airway, 15
- Tracheal deviation, 21
- Carinal angle, 22

What to look for in B – Breathing, 16
- Consolidation/Airspace shadowing, 23
- Air bronchogram, 27
- Collapse (atelectasis) overview, 29
- Right upper lobe collapse, 30
- Middle lobe collapse, 31
- Right lower lobe collapse, 32
- Left upper lobe collapse, 34
- Left lower lobe collapse, 36
- Complete lung collapse, 38
- Pneumonectomy, 39
- Solitary mass lesion, 41
- Multiple mass lesions, 44
- Cavitating lung lesion, 47
- Fibrosis, 49
- Pneumothorax, 53
- Tension pneumothorax, 56
- Hydropneumothorax, 58
- Pleural effusion, 60
- Pulmonary oedema, 65
- ‘Bat’s wing’ pattern shadowing, 67
- Septal lines, 69

What to look for in C – Circulation, 18
- Dextrocardia, 71
- Cardiomegaly (enlarged heart), 72
- Left atrial enlargement, 73
- Widened mediastinum, 74
- Hilar enlargement, 77
- Hiatus hernia, 79

What to look for in D – Disability, 19
- Rib fractures and other bony abnormalities, 80

What to look for in E – Everything else, 20
- Air under the diaphragm (pneumoperitoneum), 82
- Subcutaneous emphysema/surgical emphysema, 84
- Mastectomy, 87
- Foreign bodies and medical interventions, 88
Part 3
Common conditions and their radiological signs, 94
  Pulmonary embolism, 94
  Bronchial carcinoma, 94
  Heart failure, 95
  Pneumonia, 97
  Chronic obstructive pulmonary disease, 97
  Tuberculosis, 98
  Asbestos-related lung disease, 103

Self-assessment questions, 108
Self-assessment answers, 113
Glossary, 122
Index, 128
