**A**

ABA research design, 325

Ability traits, 212

Abortion, 378–379

ABS (attachment behavioral system), 130

Academic challenges, 446

Acquiescence, 52

Adler, Alfred, 119–121. See also Psychoanalytic theory

Adolescence:
  delay of gratification in, 395

Adoption studies, 280–281

Adult attachment types, 131–134

Age:
  agreeableness and, 243
  five-factor model of personality and, 242–244
  psychological resilience and, 451–452
  socioemotional selectivity and, 452–453

Allport, Gordon W., 205–206

Allport’s trait theory, 206–207
  cardinal traits in, 207
  central traits in, 207
  comment on, 208
  functional anatomy of human motives and, 207–208
  idiographic research and, 208
  personality structure and, 206–207
  secondary dispositions in, 207

Amygdala:
  emotional learning and, 294
  fear responses and, 268

Anal personality type, 107, 108

Anal stage of development, 107

Anchoring, 377–378

Animal personality studies, 233

Anticipating events, personal construct theory and, 350–351

Anxiety:
  anxious-ambivalent infants, 131
  anxious-avoidant infants, 131
  defense mechanisms and, 80–85
  in personal construct theory, 353–355
  psychoanalytic concept of, 79
  in social-cognitive theory, 420–421

Applications:
  of behaviorism, 329
  of Big Five model, 245–248
  of Kelly’s personal construct theory, 363–364
  of psychoanalytic theory, 138–139
  of Rogers’ person-centered theory, 196
  of social-cognitive theory, 434
  of trait theory, 258–259

Archetypes, 123

Architecture of mental systems, 448

Assessment:
  in context (case study), 458–462
  defined, 56
  factor-analytic trait-based, 248–249
  fixed vs. flexible, 36–37
  nomothetic, 37
  in Skinnerian theory, 324–325
  in social-cognitive theory, 434
  in personality psychology, 38–39

Attachment behavior, psychoanalytic theory and, 93

Attachment behavioral system (ABS), 130–131

Attachment theory, 130–131
  adulthood, 131–134
  anxious-ambivalent attachment type, 131
  anxious-avoidant attachment type, 131
  cultural differences in attachment styles, 131
  developmental processes in, 130
  internal differences in, 132
  internal working models, 130
  parenting environment in, 160–162
  secure attachment type, 131

“strange situation” procedure in, 131

style continuity in, 135

Authenticity:
  feelings of, 147
  internally motivated goals and, 187–189

Average behavior, 39

Awareness, varying states of, 22

B

Bali, social practices in, 456

Bandura, Albert, 369–370. See also Social-cognitive theory

BAT (Behavioral Avoidance Test), 423–424

Beck, Aaron, 429–431. See also Cognitive therapy for depression (Beck)

Behavior. See also Behaviorism;
  Psychopathology discriminativeness of, 370
  internal and external determinants of, 19
  stability and variability in, 214–215
  token economy programs and, 326–327

Behavioral Avoidance Test (BAT), 423–424

Behavioral genetics, 278–285
  adoption studies, 280–281
  heritability coefficient, 282
  heritability estimates, 283
  heritability of personality findings, 282–284
  inappropriate conclusions from, 284
  molecular genetic paradigms, 284–285
  selective breeding studies, 278–279
  twin studies, 279–280

Behavioral signatures, 386

Behaviorism, 299–331
  applications of, 331
  classical conditioning and, 307–309
  comprehensiveness of, 330
  determinism and, 301
  environmental determinism and, 301–302
  experimentation in, 304–305
  observable variables in, 304–305
  Pavlov’s theory of classical conditioning and, 307–309
  science of personality in, 301–304
  scientific observation in, 136–137
  simple system strategy in, 305
  situational specificity in, 303
  Skinner’s theory of personality, 317–328
  strengths and limitations summary, 331
  systematic theory in, 329
  testability of, 329–330
  view of the person in, 300–302

Watson’s behaviorism, 305–307

Beliefs about self, see Self-schemas
Big Five model, see Five-factor model of personality

Biological bases of personality traits, 217–219

Biological foundations:
behavioral genetics, 278–285
brain and mood/emotions, 300–295
data interpretation on personality, 268–269
environmental interactions and, 286–289
evolutionary psychology and, 270–278
plasticity and, 295–296
proximate causes and, 269
suggested links and, 294
temperament and, 265–270
ultimate causes and, 270

Brain:
attachment and, 133–134
classical conditioning and, 316
constructs and expertise and, 347
cultural differences in the self and, 190
delay of gratification and, 400
extraversion and, 220
goals and, 413
hysteria and, 64
inhibition and, 268
left and right hemispheric dominance, 290–292
mood, emotion, and, 290–295
neuroticism and, 220
neurotransmitters and temperament, 292–295
oxytocin and, 445
personality and, 37–38
personality traits and, 229
self and, 296–297
sources of evidence, 38
studying and, 414
Brain plasticity, 295–296
Broaden-and-build theory, 180
Buddhist cultures, 454

C
CAPS (cognitive-affective processing systems), 384–386
Cardinal traits, 207
Case studies. See also under specific theories
as research approach, 42–44
strengths and limitations of, 49–51
Castration anxiety, 88
Catharsis, 63–64
Cattell, Raymond B., 211–212
Cattell's factor-analytic trait theory, 211–216
ability traits and, 212
behavioral stability and variability and, 214–215
communic on, 215–216
dynamic traits and, 212
evidence sources and, 212–214
five-factor model of personality and, 236
life record data (L-data) and, 212–214
objective-test data (T-data) and, 212–214
self-report questionnaire data (Q-data) and, 212–214
surface and source traits and, 211–212
temperament traits and, 212
Central traits, 207
Classical conditioning, 307–309. See also Skinner's theory of personality
basic neural and biochemical processes in, 315–316
conditioned emotional reactions in, 309–310
counterconditioning in, 311
discrimination in, 308
extinction in, 308
generalization in, 308
principles of, 306–308
psychopathology and change in, 309–315
recent developments in, 315–316
self-esteem in, 316
systematic desensitization in, 311–312
unconditioning of fear in, 310–311
Client-centered therapy, 170–173
Clinical research:
as research approach, 41–42
strengths and limitations of, 49–51
Cognitive-affective processing systems (CAPS), 384–387
Cognitive-affective stress management training (C-ASMT) program, 425
Cognitive complexity:
leadership and, 351
in personal construct theory, 345–347, 349
simplicity of construct systems and, 346, 348, 349
Cognitive therapy for depression (Beck), 429–431
approach to, 430–431
cognitive triad in, 429
faulty research on, 429–430
Cognitive unconscious, 73–75
Collective unconscious, 122
Compensatory striving, 120
Competencies, in social-cognitive theory, 372–373
Concept of self, see Self-concept
Conditioned emotional reactions, 309–311
Conditioned food responses, 313
Conditions of worth, 159–160
Conflict, intrapsychic, 108
Congruence, between self and experience, 156–159
defensive processes and, 156
self-consistency and, 157–158
Consciousness levels, see Levels of consciousness
Conscious thought, 39
Constructs, defined, 340
Constructive alternativism, 337
Construct system, 342–346, 348–349
cognitive complexity/simplicity, 346, 348, 349
core constructs, 342
peripheral constructs, 342
preverbal constructs, 342
Role Construct Repertory test, 344–345
submerged constructs, 342
subordinate constructs, 342
superordinate constructs, 342
unique information revealed by, 345–347
verbal constructs, 342
Construct validity, 40–41
Contemporary experimental existentialism, 183–184
Context specificity, in social-cognitive theory, 373
Contingencies of self-worth, 186–187
Contrast poles, 340
Conversion disorder (hysteria), 63, 64
Cool attentional focus, 443
Coping, social-cognitive therapy and, 425–427
Core constructs, 342
Correlational research:
as research approach, 44–47
strengths and limitations of, 51–53
Correlation coefficient, 45
Cortisol, 294
Counterconditioning, 311
Creative potential, fostering, 162
Cross-cultural research:
five-factor model of personality and, 232, 234–235
positive self-regard in, 200–193
on the self, 190–193
Cross-situational consistency, personality traits and, 251–255
Cultural determinants, of personality growth and development, 14, 17
Culture and personality, 453–458
in Big Five model of personality, 454
cognitive processes, 458
cultural psychology field, 455
culture as core concept, 455–456
generalizability, 454
independent and interdependent views of self, 457–458
karma concept, 454
new exposures and, 457–458
strategies for thinking about, 453–455
supplemental treatment of culture, 455
views of self, 457–458

D
Data of personality psychology, 33–42
fixed vs. flexible measures, 36–37
idiographic measures, 37
LOTs categories and, 33–35
nomothetic measures, 37
personality and brain data, 37–38
personality theory and assessment, 38–39
relationships between, 35–36
Death anxiety, 183
Death instincts, 78–79
Defense mechanisms, 80–85
behavior consequences of, 108–109
denial, 80–81, 155
distortion, 155–156
isolation, 82
projection, 81–82
rationalization, 83
reaction formation, 83
repression, 84–85
states of incongruence and, 156
sublimation, 83–84
Defensive pessimism, 446–447
Delay of gratification, 395–401
attractive qualities of rewards and, 398
cognitive process and, 398–400
live-model conditions for, 460–461
observed consequences, 397
social bases of, 396
Demand characteristics, 54
Denial, 80–81, 157
Depression:
cognitive therapy and, 430–431
cognitive triad of, 429
faulty cognitions and, 429–430
older adults and, 451
and social-cognitive theory, 420–421
Determinism, 299
Development (psychoanalytic theory), 85–96
anal stage, 87
genital stage, 88
importance of early experience in, 92–94
instinct development, 85–99
latency stage, 89–90
oral stage, 86
phallic stage, 87–88
thinking process development, 94–96
Direct conditioning, 311
Discrepancies, among parts of the self, 185–186
Discriminant validity, 41
Discrimination process, classical conditioning and, 308
Distortion of experiences, 157
Dopamine, 292–295
Dreams:
interpretation of, 110
in psychoanalytic theory, 68
Dynamics of functioning, 79–80
Dynamic traits, 212
Dysfunctional expectancies, 420
Dysfunctional self-evaluations, 420

systematic theory and, 4
testability of, 4
as toolkits, 27–28, 479–480
universality, 20–28

Personality theorists, goals of, 3–5
Personality types:
apal, 107
fixations and, 106
oral, 107
phallic, 108
psychopathology and, 106–108
regression and, 107
Person-as-scientist view, 339
Person-situation controversy, 252–255, 449
Pessimism, defensive, 446–447
Phallic personality type, 108
Phallic stage of development, 87–88
Phenomenal field (Rogers), 146
Phenomenological theory, see Rogers, Carl R.; Rogers’ person-centered theory
Phenomenology, 144
Phobia, 112–113
Phrenology, 263–264
Plasticity, 295–296
Pleasure principle, 65, 75
Political judgments, motivated unconscious processes in, 72–73
Political psychology, 351
Population, 38–39
Positive psychology movement, 179–182
classifying human strengths, 179–180
flow concept in, 181–182
virtues of positive emotions, 180–181
Positive regard:
cross-cultural research and, 190–193
need for, 158–160
Positivity of human motivation
(Rogers), 148
Preconscious level, 67
Presence, 173–174
Prevention of negative outcomes, 416
Preverbal constructs, 342
Primary process thinking, 94–95
Promotion of well being, 417–418
Projective tests, 101–106
Projective tests:
testability of, 137
thinking process development in, 94–96
view of the person in, 62–65
views of the unconscious in, 71
Psychodynamic personality
assessment, 101–106. See also
Projective tests
Psychological resilience, in later years, 451–452
Psychopathology:
attachment style and, 131–134
behavioral changes and, 222–224
behavior changes and, 18
behaviorism and, 309–312
case studies of, 174–176
in client-centered therapy, 171–173
conflict and defense and, 108–109
empathic understanding and, 171
free association and, 110
in Kelly's personal construct theory, 355–356
personality tests and, 106–108
in personality theories, 168–169
in psychoanalytic theory, 106–109
self-experience discrepancy and, 169–170
in Skinner's theory of personality, 324
in social-cognitive theory, 419–425
testability comparison on, 417–473
therapeutic conditions and, 170–171
transference and, 110–112
unconditional positive regard and, 171
Psychosexual stages of development
(Freud), 85–94
anal stage, 87
genital stage, 90
latency stage, 89–90
oral stage, 86
phallic stage, 87–88
Psychosocial stages of development
(Erikson), 90–92
identity formation, 91
latency and genital stages, 90–91
later stages of life, 92
positive and negative outcomes, 91
Psychoticism, 218, 221
Public policy ethics, 41–42
Punishments, operant conditioning and, 323
Q
Q-data (self-report questionnaires), 33–35, 212–214
Q-sort technique, 150, 172
Questionnaires:
five-factor model of personality and, 235–237
rejection sensitivity, 442
as research approach, 44–47
self-report, 35–36, 212–214
strengths and limitations of, 51–53
R
Random assignment, 47
Range of convenience, 338
Rational-emotive therapy (Ellis), 427–429
Rationalizations, 83, 169
Rational thinking, 95
Reaction formation, 82–84
Reality orientation, psychoanalytic theory and, 81
Reality principle, 76
Reciprocal determinism, 383–384
Recovered memories, 86–87
Regression, personality type and, 107
Reinforcers, operant conditioning and, 320–323
Rejection sensitivity, 441–444
Rejection Sensitivity Questionnaire (RSQ), 442
Reliability, research goals and, 40
Repression, 84–85
Rep test (Role Construct Repertory Test), 344–345, 349
Research, 31–58
case studies, 43–44
correlational, 44–47
data for, 33–39
ethics of, 41–42
evaluating approaches to, 48–55
experimental, 47–48
goals of, 40–42
reliability in, 40
validity in, 40–41
Response-based schedules, operant conditioning and, 321
Response styles, correlational research and, 52
Right hemispheric dominance, 290–292
Rogers, Carl R., 144–146
Rogers' person-centered theory, 143–164
applications of, 196
authenticity and internally motivated goals in, 187
client-centered therapy outcomes, 171–173
comprehensiveness of, 195–196
cultural differences in concept of self, 190–193
distortion and denial, 157–158
existentialism and, 182–184
fluctuations in self-esteem, 186–187
growth and development in, 160–164
human potential movement and, 177–179
ideal self in, 150
major contributions of, 196
measuring self-concept and, 152–153
need for positive regard in, 158–160
personality and brain, 150–151
phenomenological perspective in, 148
positive psychology movement and, 179–182
presence concept in, 173–174
process in, 154–160
psychological change in, 170–174
psychopathology in, 169–170
Q-sort technique in, 152
science of personality and, 149
scientific observation in, 193
self-consistency and congruence, 156–157
the self, 149–150
semantic differential in, 152–153
strengths and limitations summary, 197
structure of personality in, 149–150, 152–153
subception in, 156
subjectivity of experience in, 146–148
systematic theory in, 194
testability of, 194–195
theory and research developments in, 185–193
therapeutic conditions for change, 170–171
Role concept in Cattell’s theory, 215–216
Role Construct Repertory Test (Rep test), 344–345
Rorschach Inkblot Test, 102–103, 115–118
RSQ (Rejection Sensitivity Questionnaire), 442
S
Sample approach to assessment, 326
Sample size, 51
Schedules of reinforcement, in operant conditioning, 321
Schemas, 405–408. See also Self-schemas
Science of personality, 23
