Preface ix
About the Editors xi
About the Book xiii
List of Contributors xv

SECTION 1 INTRODUCTION

1 Quantitative Modeling in Toxicology: An Introduction 3
   Melvin E. Andersen and Kannan Krishnan

SECTION 2 PHYSIOLOGICALLY-BASED TOXICOKINETIC AND PHARMACOKINETIC (PBPK) MODELING

2 PBPK Modeling: A Primer 21
   Kannan Krishnan, George D. Loizou, Martin Spendiff, John C. Lipscomb and Melvin E. Andersen

3 Pharmacokinetic Modeling of Manganese – An Essential Element 59
   Andy Nong, Michael D. Taylor, Miyoung Yoon, and Melvin E. Andersen

4 Physiologically Based Modeling of Pharmacokinetic Interactions in Chemical Mixtures 83
   Sami Haddad, Robert Tardif, Jonathan Boyd, and Kannan Krishnan

5 Physiological Parameters and Databases for PBPK Modeling 107
   Douglas O. Johns, Elizabeth Oesterling Owens, Chad M. Thompson, Babasaheb Sonawane, Dale Hattis and Kannan Krishnan

SECTION 3 MODELING TOXICANT-TARGET INTERACTIONS

6 Modeling Cholinesterase Inhibition 137
   Charles Timchalk, Paul M. Hinderliter, and Torka S. Poet
vi Contents

7 Modeling of Protein Induction and Dose-Dependent Hepatic Sequestration 167
Andy Nong and Melvin E. Andersen

8 Bistable Signaling Motifs and Cell Fate Decisions 181
Sudin Bhattacharya, Qiang Zhang, and Melvin E. Andersen

9 Ultrasensitive Response Motifs in Biochemical Networks 199
Qiang Zhang, Sudin Bhattacharya, Courtney G. Woods, and Melvin E. Andersen

10 Gene and Protein Expression – Modeling Nested Motifs in Cellular and Tissue Response Networks 219
Melvin E. Andersen, Qiang Zhang, and Sudin Bhattacharya

11 Modeling Liver and Kidney Cytotoxicity 235
Kai H. Liao, Yei M. Tan, Harvey J. Clewell III, and Melvin E. Andersen

SECTION 4 MODELING TISSUE AND ORGANISM RESPONSES

12 Computational Model for Iodide Economy and the HPT Axis in the Adult Rat 253
Jeffrey W. Fisher and Eva D. McLanahan

13 Two-Stage Clonal Growth Modeling of Cancer 269
Rory B. Conolly and Melvin E. Andersen

14 Statistical and Physiological Modeling of the Toxicity of Chemicals in Mixtures 283
Hisham A. El-Masri, Michael A. Lyons, and Raymond S.H. Yang

15 (Q)SAR Models of Adverse Responses: Acute Systemic Toxicity 299
Mark T.D. Cronin, Yana K. Koleva, and Judith C. Madden

SECTION 5 MODEL APPLICATION AND EVALUATION

16 Modeling Exposures to Chemicals From Multiple Sources and Routes 317
Panos G. Georgopoulos, Sastry S. Isukapalli, and Kannan Krishnan

17 Probabilistic Reverse Dosimetry Modeling for Interpreting Biomonitoring Data 353
Yu-Mei Tan and Harvey J. Clewell III
18 Quantitative Modeling in Noncancer Risk Assessment
Q. Jay Zhao, Lynne Haber, Melissa Kohrman-Vincent, Patricia Nance, and Michael Dourson

19 Application of Physiologically Based Pharmacokinetic Modeling in Health Risk Assessment
Harvey J. Clewell III

20 Uncertainty, Variability, and Sensitivity Analyses in Simulation Models
Sastry S. Isukapalli, Martin Spendiff, Panos G. Georgopoulos and Kannan Krishnan

21 Evaluation of Quantitative Models in Toxicology: Progress and Challenges
Kannan Krishnan and Melvin E. Andersen
