VOLUME 1

PART I GENERAL CONSIDERATIONS 1

1 Classifying the Transformation Products (TPs) of Emerging Contaminants (ECs) for Prioritizing Research into their Impact on the Environment and Human Health 3
Jacek Namieśnik, Lidia Wolska, Radosław Czernych, Grażyna Gałęziowska and Monika Cieszyńska

1.1 Introduction 3
1.2 Emerging Contaminants – Emerging Problem 5
  1.2.1 Veterinary and Human Antibiotics 6
  1.2.2 Human Drugs 6
  1.2.3 Industrial and Household Wastewater Products 8
  1.2.4 Sex and Steroidal Hormones 40
1.3 Transformation Products of ECs 41
  1.3.1 Veterinary and Human Antibiotics 41
  1.3.2 Human Drugs 41
  1.3.3 Industrial and Household Wastewater Products 42
  1.3.4 Sex and Steroidal Hormones 42
1.4 Minimizing Environmental Risk of ECs and their TPs 43
  1.4.1 Designing a Risk Minimization Strategy 43
  1.4.2 Results of the Prioritization Procedure 45
1.5 Concluding Remarks and Future Perspectives 45
References 49

2 Transformation Products of Emerging Organic Compounds as Future Groundwater and Drinking Water Contaminants 65
Marianne E. Stuart and Dan J. Lapworth

2.1 Introduction 65
2.2 Sources and Pathways of Emerging Contaminants to Groundwater 66
2.3 Persistence in the Groundwater Environment 68
2.4 Emerging Contaminants and their Transformation Products in Groundwater 69
  2.4.1 Pesticides 69
  2.4.2 Pharmaceuticals 71
  2.4.3 Personal Care Products and Synthetic Musks 73
2.4.4 Caffeine and Nicotine 73
2.4.5 Alkylphenols and Other Endocrine Disruptors 73
2.4.6 Disinfection By-Products 74
2.4.7 Brominated and Fluorinated Compounds 75
2.4.8 Triazoles 75
2.4.9 Naphthenic Acids 76
2.4.10 Explosive Residues 76
2.4.11 Algal Toxins 76
2.5 Toxicity and Risk Assessment 76
2.6 Conclusions 78
References 79

PART II TRANSFORMATION PROCESSES AND TREATMENT STRATEGIES 87

3 Phototransformation Processes of Emerging Contaminants in Surface Water 89
David Vione and Serge Chiron
3.1 Introduction 89
3.2 Direct Photolysis and Sensitised Reactions in the Transformation of Emerging Contaminants 90
3.2.1 Direct Photolysis 90
3.2.2 Reaction with *OH 96
3.2.3 Reaction with CO3^− 100
3.2.4 Reaction with 3CDOM^+ 102
3.2.5 Reaction with 1O2 103
3.3 The Case of Photonitrilation 104
3.4 Towards the Modelling of Phototransformation Kinetics in Surface Water 106
3.4.1 Surface-Water Absorption Spectrum 108
3.4.2 Reaction with *OH 108
3.4.3 Direct Photolysis 111
3.4.4 Reaction with CO3^− 112
3.4.5 Reaction with 1O2 113
3.4.6 Reaction with 3CDOM^+ 114
3.4.7 Photochemical Transformation of Organic Pollutants 114
3.4.8 Photo-Transformation of Intermediates 117
References 118

4 Transformation Products of Emerging Contaminants upon Reaction with Conventional Water Disinfection Oxidants 123
José Benito Quintana, Rosario Rodil and Isaac Rodríguez
4.1 Introduction 123
4.2 Analytical Methodology for Transformation Products Identification 124
4.2.1 GC-MS-Based Approaches 125
4.2.2 LC-MS-Based Approaches 128
4.3 Factors Influencing the Kinetics of Chlorination 131
4.4 Overview of Typical Reaction Mechanisms During Free Chlorine Treatments 135
4.5 Review of Current Knowledge of Emerging Pollutant Reactions with Free Chlorine

4.5.1 Pharmaceuticals 138
4.5.2 Androgenic and Estrogenic Steroidal Compounds 146
4.5.3 Substances of Abuse 147
4.5.4 Bisphenol A and Nonylphenol 147
4.5.5 Bactericides: Triclosan and Parabens 147
4.5.6 UV Filters 148
4.5.7 Antioxidants 148
4.5.8 Cyanotoxins 149

4.6 Other Disinfection Agents 150
4.6.1 Chlorine Dioxide 150
4.6.2 Chloramination 152
4.6.3 Permanganate and Ferrate 153

4.7 Conclusions and Outlook 155
References 155

5 Approaches to Water and Wastewater Treatment for Removal of Emerging Contaminants: Ongoing Research and Recommendations for Future Work 161

Sixto Malato, Pilar Fernández-Ibáñez, Isabel Oller, Lucia Prieto-Rodriguez, Sara Miralles-Cuevas and Alejandro Cabrera-Reina

5.1 Introduction 161
5.2 Ozonation 163
5.3 Membrane Processes 165
5.4 Membrane Bioreactors (MBR) 167
5.5 AOPs Including Solar AOPs 169
  5.5.1 Solar Driven Advanced Oxidation Processes 170
  5.5.2 Different Approaches for Treating ECs by Solar AOPs 172
References 175

6 Transformation Products of Emerging Contaminants Formed during Advanced Oxidation Processes 179

Ioannis K. Konstantinou, Maria Antonopoulou and Dimitra A. Lambropoulou

6.1 Introduction 179
6.2 Pesticides 180
  6.2.1 Organophosphorus Insecticides 180
  6.2.2 Anilide Herbicides (ANHs) 183
  6.2.3 Phenylurea Herbicides (PUHs) 187
  6.2.4 Neonicotinoid Insecticides (NCIs) 198
  6.2.5 Glyphosate Herbicide 203
6.3 Phthalate Esters 203
6.4 Pharmaceutical Compounds 204
  6.4.1 Fibrates 205
  6.4.2 β-Blockers 211
6.5 Others 215
  6.5.1 Bisphenol A 215
  6.5.2 Triclosan 216
7 Enzymatic Reactors Applied for the Biotransformation of Endocrine Disrupting Chemicals

Juan M. Lema Rodicio, Mª Teresa Moreira, Gemma Eibes, Thelmo A. Lu-Chau, Lucia Lloret, Roberto Taboada, Adriana Arca-Ramos and Gumersindo Feijoo

7.1 Endocrine Disrupting Chemicals

7.2 White-Rot Fungi and Their Lignin Modifying Enzymes

7.3 Enzymatic Reactors

7.4 Determination of Transformation Products from the Enzymatic Treatment of EDCs

8 Biologically Mediated Chiral Inversion of Emerging Contaminants

Stuart J. Khan

8.1 Introduction

8.2 Enantiospecific Analytical Methods

8.3 Changes in Enantiomeric Composition During Biological Transformation Processes

8.4 Evidence for Biologically Mediated Chiral Inversion

8.5 Implications and Priorities for Future Research

References

PART III ANALYTICAL STRATEGIES

9 Quality Issues in Water Sampling, Sample Pre-Treatment and Monitoring

Sara Bogialli, Stefano Polesello and Sara Valsecchi

9.1 Introduction

9.2 Monitoring of Transformation Products in Water Bodies

9.3 Sample Representativeness and Stability Issues

9.4 Identification of Transformation Products and Legislative Requirements

References
10 Transformation Products of Emerging Contaminants: Analytical Challenges and Future Needs
Bozo Zonja, Jaume Aceña, Aleksandra Jelic, Mira Petrovic, Sandra Pérez Solsona and Damià Barceló

10.1 Introduction 303
10.2 Generation, Detection and Identification of Transformation Products at Lab Scale: An Analytical Challenge 305
   10.2.1 Detection of Transformation Products with GC-MS and LC-MS 306
   10.2.2 Identification of Transformation Products 309
10.3 Quantitative Analysis of TPs in the Environment 311
   10.3.1 Sample Preparation 312
   10.3.2 Determination of TPs in the Environment with High and Low Resolution Mass Spectrometric Techniques 313
10.4 Evaluation of the Toxicity of TPs 318
10.5 Conclusions and Future Needs 319
Acknowledgments 320
References 320

11 Advanced Mass Spectrometry-Based Techniques for the Identification and Structure Elucidation of Transformation Products of Emerging Contaminants
Paola Calza and Debora Fabbri

11.1 Introduction 325
11.2 Potential and Differences Among the Different MS Systems for Determining Unknown Compounds 326
   11.2.1 GC-MS versus LC-MS 326
   11.2.2 Capability and Potential of Instrumentation: The Right Analyzer 327
11.3 How to Proceed in the Structural Attribution 330
   11.3.1 Kind of Analysis to be Performed 330
   11.3.2 Strategies of Accurate Mass Screening for (non)Target Compounds and Unknowns: Elementary Composition Assignment 333
   11.3.3 Structural Attribution by MSⁿ 333
   11.3.4 Limitation 334
11.4 Accurate Mass Screening and Identification of Emerging Contaminants in Environmental Samples: Some Cases Studied 334
   11.4.1 The Spectra Library: GC-MS Approach 334
   11.4.2 LC-MS² (QqQ) Identification of Flouoxetine Transformation Products 335
   11.4.3 Identification of Unknown with LTQ Orbitrap 336
   11.4.4 Focus on the Same Pollutant Studied with Different Analyzers: The Case of Diclofenac 340
   11.4.5 The Use of FTICR-MS for Photodecomposition Transformation Products of Two Pesticides 340

References 320
14.2 Human Metabolites in the Aquatic Environment 415
14.3 Biotransformation Products in the Aquatic Environment 418
14.4 Transformation of Pharmaceuticals During Photolysis and Advanced Oxidation Processes 425
  14.4.1 Photolysis 425
  14.4.2 Advanced Oxidation Processes (AOPs) 439
14.5 Conclusions and Outlook 446
Acknowledgments 447
References 447

15 Transformation Products of Personal Care Products: UV Filters Case Studies 459
Kristina Pestotnik, Tina Kosjek and Ester Heath
15.1 Introduction 459
15.2 Main Physico-Chemical Parameters of UV Filters and their Influence on Environmental Behaviour 461
15.3 Occurrence of UV Filter Residues 465
  15.3.1 UV Filters 465
  15.3.2 UV Filter Transformation Products 467
15.4 Fate of UV Filter Residues 467
  15.4.1 Abiotic Processes 467
  15.4.2 Biotic Processes 475
15.5 Analytical Methods for Identification of Transformation Products 478
15.6 Effects and Toxicity of UV Filters and their Transformation Products in the Environment 483
  15.6.1 Ecotoxicity 483
  15.6.2 Estrogenic Activity 483
  15.6.3 Toxicity of Transformation Products 485
15.7 Conclusions and Future Strategies 486
Acknowledgments 487
Abbreviations 487
References 489

16 Transformation Products of Illicit Drugs 493
Dimitra A. Lambropoulou and Eleni Evgenidou
16.1 Introduction 493
  16.1.1 What are “Illicit Drugs?” 494
16.2 Fate and Treatment of IDs and Their Metabolites/TPs 495
  16.2.1 Environmental Fate of IDs and Their Metabolites/TPs 495
  16.2.2 Treatment Studies of IDs and Their Metabolites/TPs 497
16.3 Analytical Methods and Detection 503
  16.3.1 Sampling and Storage 503
  16.3.2 Analytical Methods and Detection 504
16.4 Occurrence of IDs and their Metabolites/TPs in the Environment 507
  16.4.1 Wastewaters 507
  16.4.2 Surface Waters 512
  16.4.3 Groundwater and Drinking Water 512
  16.4.4 Air 513
16.5 Ecotoxicity of IDs and Their Metabolites/TPs 513

16.5.1 Sewage Epidemiology 514

16.6 Concluding Remarks 515

References 515

17 Transformation Products of Artificial Sweeteners 525
Marco Scheurer, Heinz-Jürgen Brauch and Frank Thomas Lange

17.1 Introduction 525

17.2 Processes Leading to the Formation of Artificial Sweetener Transformation Products 527

17.2.1 Metabolism in Mammals Including Man 527

17.2.2 Abiotic Transformation 531

17.2.3 Biodegradation 536

17.2.4 Saccharin and its Transformation Products from Agricultural Sources 537

17.3 Summary and Conclusions 539

References 540

18 Transformation Products of Brominated Flame Retardants (BFRs) 545
Alin C. Dirtu, Alin C. Ionas, Govindan Malarvannan and Adrian Covaci

18.1 Introduction 545

18.2 Transformation Products of PBDEs 546

18.2.1 Degradation of PBDEs in Abiotic Matrices 546

18.2.2 Biotransformation Pathways for PBDEs 553

18.3 Transformation Products of HBCDs 557

18.3.1 Degradation of HBCDs in Abiotic Matrices 557

18.3.2 Biotransformation Pathways for HBCDs 559

18.4 Transformation Products of TBBPA 561

18.4.1 Degradation of TBBPA in Abiotic Matrices 561

18.4.2 Biotransformation Pathways for TBBPA 563

18.5 Transformation Products of NBFRs 566

18.5.1 Decabromodiphenyl Ethane (DBDPE) 566

18.5.2 1,2-Bis(2,4,6-tribromophenoxy)ethane (BTBPE) 566

18.5.3 2-Ethylhexyl2,3,4,5-tetrabromobenzoate (TBB) and Di(2-ethylhexyl)tetrabromophthalate (TBP) 567

18.6 Concluding Remarks and Future Perspectives 568

Acknowledgments 568

References 569

19 Transformation Products of Alkylphenols 577
Montserrat Cortina-Puig, Gabino Bolívar-Subirats, Carlos Barata and Silvia Lacorte

19.1 Alkylphenols: Types, Properties and Uses 577

19.2 Transformation of Alkylphenols and Identification of Transformation Products 580

19.2.1 Biodegradation 580

19.2.2 Photodegradation 587

19.2.3 Sonolysis 590

19.3 Occurrence of Alkylphenol Transformation Products in the Environment 591
22.3 Environmental Fate and Transformation of EDCs 652
22.4 Analytical Methodology 654
22.5 Occurrence and Endocrine Disruption Effects of the TPs of Selected EDCs 660
  22.5.1 Pesticides 660
  22.5.2 Industrial Chemicals 664
  22.5.3 Synthetic and Natural Steroids 667
22.6 Future Needs –Recommendations 668
References 669

23 Transformation Products of Hazardous Cyanobacterial Metabolites in Water 675
  Anastasia Hiskia, Theodoros M. Triantis, Maria G. Antoniou, Armah A. de la Cruz, Kevin O’Shea, Weihua Song, Theodora Fotiou, Triantafyllos Kaloudis, Xuexiang He, Joel Andersen and Dionysios D. Dionysiou

23.1 Introduction 675
23.2 Cyanobacterial Secondary Metabolites 676
  23.2.1 Hazardous Cyanobacterial Metabolites: Cyanotoxins 676
  23.2.2 Taste and Odor Compounds: Geosmin and 2-Methylisoborneol 681
23.3 Transformation Products of Cyanobacterial Metabolites in Water 682
  23.3.1 Fate of Cyanobacterial Metabolites in the Environment 682
  23.3.2 Chemical Oxidation 687
  23.3.3 Advanced Oxidation Processes 692
23.4 Research Gaps, Recent Trends and Future Needs 698
References 699

PART V GLOBAL SPACIALITY AND ENVIRONMENTAL STATUS OF TRANSFORMATION PRODUCTS IN THE ENVIRONMENT 709

24 Occurrence of Transformation Products of Emerging Contaminants in Water Resources 711
  Carlos Gonçalves, Maria A.D. Sousa and Maria de Fátima Alpendurada

24.1 Brief Introduction on the Sources of Transformation Products of Emerging Contaminants 711
24.2 Transformation Products in Natural Waters: From Contamination Sources to Drinking Water Production 713
24.3 Wastewaters as a Major Source of Transformation Products 732
24.4 Origin and Presence of Transformation Products in Drinking Water 738
24.5 Ubiquity and Regio-Specificity of Transformation Products 740
24.6 Transformation Products of Emerging Contaminants: Fate and Behavior 741
24.7 Conclusions 744
References 746

25 Occurrence of Transformation Products of Emerging Contaminants in Water Resources of the United States 751
  Imma Ferrer and E. Michael Thurman

25.1 Introduction: Emerging Contaminants 751
25.2 State-of-the-Art Techniques for the Identification of Emerging Contaminants and Their Transformation Products 752
25.2.1 Liquid Chromatography/Tandem mass Spectrometry (LC/MS-MS) for the Analysis of Target Compounds. EPA Method 1694

25.2.2 Liquid Chromatography/Time-of-Flight/Mass Spectrometry (LC/TOF-MS) for the Analysis of Non-target Compounds

25.2.3 Liquid Chromatography/Quadrupole-Time-of-Flight/Mass Spectrometry (LC/Q-TOF-MS) for Structural Elucidation of Unknown Compounds and Transformation Products

25.3 Use of Accurate Mass Tools for the Identification of Emerging Contaminants

25.3.1 Molecular Features

25.3.2 Accurate Mass Databases

25.3.3 Accurate Mass Filters and Isotopic Mass Defect

25.3.4 Accurate Mass Profiling

25.4 Occurrence of Transformation Products in Environmental Waters in the US

26 Spatial Modeling for Elucidation of Perfluorinated Compound Sources and Fate in a Watershed

Yasuyuki Zushi and Shigeki Masunaga

26.1 Introduction

26.1.1 Transformation Products of PFCs

26.1.2 History, Regulation and Pollution of PFCs

26.2 Source Identification of PFCs Using GIS

26.2.1 Study Area and Dataset

26.2.2 Method of GIS-based Source Identification

26.2.3 Results and Discussion

26.3 Spatial Distribution of PFOS and PFOA Contributed by Nonpoint Sources

26.3.1 Method for Spatial Prediction with Fine Scale; Use of the Digital Elevation Model (DEM) and Land-Use Regression (LUR) Model

26.3.2 Results and Discussion

26.4 Conclusion

Acknowledgments
