  core domains 3
  critical thinking 5–6
  decision making 5
  end of life care 3–4
  information-processing theory 5
  health needs versus healthcare needs 2
  nursing versus social care 2
  single use medical devices, definition 94
sip feeds 230–1
  prescribing 231, 232
skin
  ageing process 349–51
  barrier films/creams 363
  structure and function 334, 349, 350
tears 375
  classification 378
skin-tunnelled cuffed catheters 133, 139
  advantages and disadvantages 134
  care and management 139–40
  complications
    clamps 149
    infection 146
    insertion 144
    pinch-off syndrome 149
    contraindications 138
    definition 138
  dressing 139–40, 167–8
  indications 138
  location/placement 138–9
  maintaining the patency of 137, 140, 162–4
needleless injection cap change 161–2
obtaining blood samples from 169–72
removal 140
slings 204
cleaning 207
small bowel, absorption 29
small round structure viruses (SRSVs) implicated in food poisoning 106–7
social behaviour changes, and infection 95
social care versus nursing care 2
socially isolated patients, nutritional support for 228–9
community care act 2
discharge planning 76, 117
home care environment facilities 117
sorbitol 239
specimens
collection 113–14
HIV infection 112
see also blood samples
speech and language therapists, community (CSALTs) 217–18, 218
spillages, dealing with 105–6, 115–17
spinal cord injury
autonomous dysreflexia 45–6, 50
bowel management 44–5, 50
spores, definition 94
St John’s wort 182
standard precautions see universal/
standard precautions
standards, infection control 99
staple removal 387–9
sterile, definition 94
sterilisation 94, 115
steroids
syringe drivers/pumps in palliative care 286
venepuncture 337
stomach, digestion and absorption 29
storage
of blood samples 338
of medicines 275
storage of medicines 179–80
Streptococcus pneumoniae 95–6, 108, 110
stress 10
subtotal colectomy 34
sucralfate–nutrient interactions 239
superficial veins 334–5
superior vena cava (SVC) implantable ports 141
PICCs 135, 136
skin-tunnelled cuffed catheters 138
supplementary nurse prescribing 181
suppositories
bisacodyl 37–8
constipation 34, 37–8
faecal incontinence 42, 43
glycerin 37–8
procedure guidelines 58–61
suprapubic catheters 307–8
surgery
for constipation 34
for faecal incontinence 43–4
urinary catheterisation following 309
venepuncture following 337
suture removal 390–3
swallowing 28
assessment of 219, 220
syringe drivers/pumps 182
contact information 291
definition 272
palliative care 291
advantages and disadvantages 276
anti-emetics 286
anxiolytics 285
background evidence 272–3
consent 288
crisis box 281
education and training 273–5
ethical issues 288
excess secretions, drugs used for 286
Graseby MS16A/MS26 syringe driver, use of 292–6
incident reporting 290–1
indications 275–6
intestinal obstruction, drugs used 286
McKinley T34 syringe pump, use of 296–300
monitoring 287
observation during infusion 300
pain control 281–5
prescribing and administering drugs 275
priming the extension set 279–80
problem solving 301
protection and positioning of the syringe driver 280–1
reactions at the infusion site 287–8
rescue doses of medication 286–7
risk management 288–90
selecting a needle/cannula 278–9
selecting a syringe driver/pump 276–8
siting the infusion device 280
sizes of syringes 279
steroids 286
symptom management 281–6
terminal agitation/acute confusional state 285–6
using a syringe driver 275–81
teamwork see multidisciplinary team
terminal agitation 285–6
terminal ileum, absorption 29
tetracycline–nutrient interactions 238
theophylline–nutrient interactions 239
therapeutic communication 6–7
barriers 9–10
non-verbal 8
skills 7
verbal 8–9
therapeutic relationship see nurse–patient relationship
thiamine 214
‘Thick and Easy’ 219
thioridazine–nutrient interactions 238
thrombocytopenia 334, 336
thrombosis 149
thrombotic occlusion 148
toe brachial pressure index (TBPI) 368–9
toileting routine 33, 34
Index

topical negative pressure therapy (TNP) 359
dressing renewal 382–6
tourniquets 336
toxic megacolon 40
training and education
anaphylaxis 113, 184
basic life support 113, 184
blood glucose monitoring 22–3, 24
bowel management 46
carers see patient/carer education
discharge planning 78
ear irrigation 88
foreign body in ear 85
home enteral tube feeding 234–5
home parenteral nutrition 242
infection prevention and control
IV therapy 132–4, 138, 183
manual handling 202, 203–4, 206
medicines management 178
anaphylaxis and basic life support 113, 184
prescribing 181
needlestick-prevention devices 105
nutritional assessment 219
patients see patient/carer education
pressure ulcers 375
syringe drivers/pumps 273–5, 289
urinary catheterisation 304
vaccination 113
venepuncture 333, 338, 341–2
tramodol 285
translation 10
transmission of infection, definition 94
transportation
of blood samples 338
of medication 180
transvaginal tape (TVT) 309
transverse colon 29
travel, overseas 112
triacylglycerols 212
tuberculosis (TB) 110–11
healthcare workers, health clearance for 99
prevalence 110
tunica adventitia 334
tunica intima 334
tunica media 334
tunneled catheters see skin-tunneled cuffed catheters
tympanic membrane 84, 85
examination prior to irrigation 85–7
ulcerative colitis 30
diarrhoea 39, 40
uniforms 101
universal/standard precautions 100
antibiotic-resistant microorganisms 108–10, 123–4
audit 119–20
blood and body fluids spillage 105–6
cleaning, decontamination and sterilisation 115–17
COSHH 115
discharge planning 117–18
foodborne illnesses 106–8, 123
handwashing/cleansing 101–4, 120–2
healthcare facilities 117
healthcare waste disposal in the community 114–15
HIV 111–12
home care environment facilities 117
immunisation/vaccination 112–13
infestation 112
last offices 113
MRSA 108–10, 123–4
personal protective equipment 100–1, 102–3
risk assessment 118–19
sharps handling/disposal 104–5
specimen collection 113–14
TB 110–11
waterborne infections 108
urethral surgery 309
urinary catheterisation and management 304, 312
anaesthetic/lubricating gel 307
background evidence 304
blocked catheters 310–11, 329, 330
catheterisation guidelines
female 316–19
male 312–15
catheter maintenance solutions 311
administration 326–9
costs 304
drainage systems 309–10
encrusted catheters 310–11, 330
infection 310
intermittent catheterisation 308–9
meatal hygiene 304
problem solving 329–30
risk management 304
selection of catheter 304–7
specimen collection 324–6
suprapubic catheters 307–8
changing 320–4
training and education 304
urine testing
blood glucose 20
nutritional status 222
vaccination see immunisation/vaccination
vacuum blood collection system 338, 339
valves, venous 334, 342
vancomycin-intermediate Staphylococcus aureus (VISA) 108
vancomycin-resistant enterococci (VRE) 108, 110
vancomycin-resistant Staphylococcus aureus (VRSA) 108
vapour permeable dressings 363
varicose eczema 369
vascular access devices (VADs) 131
see also central venous access devices; intravenous (IV) therapy
vasovagal reaction during venepuncture 341, 343
vegetarians and vegans, enteral feeds for 236
venepuncture 333, 343
anatomy and physiology 334–5
definition 333
education and training 333
guideline 344–6
improving venous access 336–8
indications 333
infection control 340
legal and professional issues 341–2
pain reduction 341
patients’ perspective 340–1
problem solving 342–3
safety of staff 340
selecting the equipment 338, 339–40
selecting a vein 335–6
specimen handling and transportation 338
venous spasm 342
verbal communication skills 8–9
verbal consent 14
vermiform appendix 29
vials, reconstitution/preparation of drugs for injection 190–1
viruses implicated in food poisoning 106–7
visually impaired patients 10
vitamins 214–15
A 214
B complex
B₁ (thiamine) 214
B₂ (riboflavin) 215
B₆ 215
B₁₂ 215
