Suggestibility in Legal Contexts: Psychological Research and Forensic Implications,
First Edition. Edited by Anne M. Ridley, Fiona Gabbert and David J. La Rooy.
© 2013 John Wiley & Sons, Ltd. Published 2013 by John Wiley & Sons, Ltd.
autism spectrum disorder (ASD) 142
Cognitive Interviews 202
interrogative suggestibility 45–6, 50–8
individual differences 142
vulnerable witnesses 149, 154–7, 164–5, 221
malingering 56–8
memory distrust 53, 56
social factors 14
suggestibility scales 45–6, 50–8
conduct disorder 93
cogitation 8, 47
confidence ratings 68, 160–1
conformity 9–10, 13
confrontation 14
see also memory conformity
constructivist accounts of misinformation effect 27–31
content overlap 77
contested confessions 173–4
contradictory misinformation 23–7
cooperative adult witnesses 197–8, 199–204
co-witness influence see memory conformity
crashing memories method 115
credibility 74–5, 207
cross-examination interviews 142, 227
cued recall tasks
individual differences 98, 100, 140
vulnerable witnesses 155–6, 161
damning evidence 177–8
Deese–Roediger–McDermott method (DRM) 114, 121
definitions of suggestibility 2–3
delayed free recall 35–7, 47–8, 87, 96
delayed suggestibility
individual differences 85, 86–7, 89–90, 97–9, 102, 218
memory conformity 63
vulnerable witnesses 162–3
depression 107–8
destructive updating 24–5
diabetes 187
Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) 155
directive questions 152
discomfort 184–5, 191
discontinuous memories 108–10
discrepancy detection 49, 100
discrete emotions 137–8
disjunctive questions 11
disputed confessions 53–6
dissociation 87, 109–10, 121
distraction 8
distraction burglaries 158
Down syndrome 142
DRM see Deese–Roediger–McDermott method
DSM-IV-TR see Diagnostic and Statistical Manual of Mental Disorders
dual task paradigm 181, 183–4, 186
ecological validity 227
effort after meaning 114
ego-depletion 180–1
elaboration 114
elderly witnesses see older witnesses elicited misinformation 32
emotional states
  acute suggestibility 91, 171–2, 174, 182–4, 190
  individual differences 129–30, 136–8, 143
environmental overlap 77
episodic memory 156, 158, 208
executive functioning 129, 135–6, 155
expectations 48
expectative questions 11
experimental approaches 1, 49
explanatory role hypothesis 35–9, 40
exploitation 154
expressive language abilities 131
eyewitnesses see vulnerable witnesses; witnesses
Eysenck and Furneaux suggestibility tests 4
fabricated details 32–4, 40
false allegations 209
false beliefs
  individual differences 133–4
  misinformation effect 29–30
  recovered memories 107, 111–21
false confessions
  acute suggestibility 173–4, 182
  forensic implications 226
  individual differences 99
  interrogative suggestibility 53–6
false feedback paradigm 118–19
false memories
  misinformation effect 27–8, 31, 35, 37–8
  recovered memories 16, 107, 111–21
false recollections 27–31, 32–4, 37–40
fatigue 172–4, 190
FIA see forgot-it-all-along
field dependence 86–7
financial scams 158
forced-choice tests 23–30, 73
forced fabrication paradigm 32–9
forensic implications 222–7
  acute suggestibility 190–1
  Cognitive Interviews 211
  individual differences 85, 91–2, 94, 99, 101–3, 143–4
  memory conformity 81
  misinformation effect 40, 218
  NICHD Protocol 211
  recovered memories 121
  timeline of suggestibility 222–6
