**Part One: Introduction to Health Communication**  

Chapter 1  What Is Health Communication?  
In This Chapter  
Defining Health Communication  
Health Communication in the Twenty-First Century:  
Key Characteristics and Defining Features  
The Health Communication Environment  
Health Communication in Public Health, Health Care, and Community Development  
The Role of Health Communication in the Marketing Mix  
Overview of Key Communication Areas  
The Health Communication Cycle  
What Health Communication Can and Cannot Do  
Key Concepts  
For Discussion and Practice  
Key Terms

Chapter 2  Current Health Communication Theories and Issues
In This Chapter  
Use of Communication Models and Theories: A Premise  
Key Theoretical Influences in Health Communication  
Select Models for Strategic Behavior and Social Change Communication  
Other Theoretical Influences and Planning Frameworks  
Current Issues and Topics in Public Health and Health Care:  
Implications for Health Communication  
Key Concepts
For Discussion and Practice ........................................ 82
Key Terms .................................................................. 82

Chapter 3 Culture and Other Influences on Conceptions of Health and Illness ................................. 83
In This Chapter .......................................................... 83
What Is Culture? ......................................................... 84
Approaches in Defining Health and Illness ..................... 85
Understanding Health in Different Contexts: A Comparative Overview ........................................... 88
Gender Influences on Health Behaviors and Conceptions of Health and Illness ................................. 91
Health Beliefs Versus Desires: Implications for Health Communication ........................................... 94
Cultural Competence and Implications for Health Communication .................................................. 97
Key Concepts ................................................................ 99
For Discussion and Practice ......................................... 99
Key Terms .................................................................. 100

Part Two: Health Communication Approaches and Action Areas .......................................................... 101

Chapter 4 Interpersonal Communication ......................... 103
In This Chapter .......................................................... 103
The Dynamics of Interpersonal Behavior ......................... 104
Social and Cognitive Processes of Interpersonal Communication ..................................................... 106
Community Dialogue as an Example of Interpersonal Communication at Scale .................................. 111
The Power of Personal Selling and Counseling ................. 112
Communication as a Core Clinical Competency ............... 116
Implications of Interpersonal Communication for Technology-Mediated Communications ................ 128
Key Concepts ................................................................ 129
For Discussion and Practice ......................................... 131
Key Terms .................................................................. 132

Chapter 5 Mass Media and New Media Communication, and Public Relations .................................. 133
In This Chapter .......................................................... 133
Health Communication in the New Media Age: What Has Changed and What Should Not Change ........ 134
