## Contents

### Contributors  ix

**Dedication: Pinhas Spiegel-Roy**  xiii

*Eliezer E. Goldschmidt*

### 1. Ornamental Palms: Biology and Horticulture  1

*T.K. Broschat, D.R. Hodel, and M.L. Elliott*

I. Introduction  3

II. Palm Biology  14

III. Palm Production  26

IV. Landscape Management  49

V. Interiorscape Management  61

VI. Palm Problems  66

Literature Cited  95

### 2. Nitric Oxide Applications for Quality Enhancement of Horticulture Produce  121

*Girigowda Manjunatha, Veeresh Lokesh, Bhagyalakshmi Neelwarne, Zora Singh, and Kapuganti J. Gupta*

I. Introduction  124

II. Nitric Oxide Chemistry and Biology  126

III. Nitric Oxide Effects on Postharvest Quality  131

IV. Nitric Oxide and Plant Hormones Cross Talk  135

V. Nitric Oxide in Disease Resistance  144

VI. Conclusions  146

Acknowledgments  147

Literature Cited  147
3. Molecular Regulation of Storage Root Formation and Development in Sweet Potato

V. Ravi, S.K. Chakrabarti, T. Makeshkumar, and R. Saravanan

I. Introduction 158
II. Root System 161
III. Endogenous Growth Regulators Affecting Storage Root Formation and Development 163
IV. Storage Root Development 168
V. Gene Expression During Storage Root Formation and Development 169
VI. Conclusions and Prospects 187

Literature Cited 191

4. Foliar Anthocyanins: A Horticultural Review

Jennifer K. Boldt, Mary H. Meyer, and John E. Erwin

I. Introduction 210
II. Coloration in Horticultural Crops 211
III. Anthocyanins in Flowers and Fruits 214
IV. Foliar Anthocyanins 215
V. Anthocyanin Biosynthesis and Regulation 217
VI. Environmental Factors and Anthocyanin Accumulation 222
VII. Physiological Functions in Leaves 228
VIII. Anthocyanins Affect Leaf Photosynthetic Rate 236
IX. Future Research 237

Literature Cited 239

5. Variability in Size and Soluble Solids Concentration in Peaches and Nectarines

John Lopresti, Ian Goodwin, Barry McGlasson, Paul Holford, and John Golding

I. Introduction 255
II. Environment and Tree Management Effects on Variation in Fruit Size and Soluble Solids 257
III. Fruit Sink Strength and Dry Matter Accumulation 271
IV. Flesh Anatomy, Fruit Size and Soluble Solids 284
V. Conclusions 294

Acknowledgments 299
Literature Cited 299
CONTENTS

6. Physiological Disorders of Mango Fruit 313
   S. Shivashankar
   I. Introduction 314
   II. Physiological Disorders 316
   III. Storage Disorders 335
   IV. Future Research Needs 338
   Acknowledgments 341
   Literature Cited 341

7. Fusarium Wilt of Watermelon: 120 Years of Research 349
   Ray D. Martyn
   I. Introduction 351
   II. Physiological Specilaization in F. oxysporum 355
   III. Effects of Inoculum and Root-Knot Nematodes on Wilt Resistance 370
   IV. Infection, Colonization, and Survival 374
   V. Management of Fusarium Wilt 389
   VI. Concluding Remarks 418
   Literature Cited 420
