Acknowledgments xii
Introduction: Integration of Medicine in Dentistry xiv

Section I: Patient Assessment 1
1. Routine History-Taking and Physical Examination 3
2. History and Physical Assessment of the Medically Complex Dental Patient 24

Section II: Pharmacology 33
3. Essentials in Pharmacology: Drug Metabolism, Cytochrome P450 Enzyme System, and Prescription Writing 35
4. Local Anesthetics Commonly Used in Dentistry: Assessment, Analysis, and Associated Dental Management Guidelines 54
5. Pain Physiology, Analgesics, Opioid Dependency Maintenance Therapies, Multimodal Analgesia, and Pain Management Algorithms 67
7. Antifungals Commonly Used in Dentistry: Assessment, Analysis, and Associated Dental Management Guidelines 150
8. Antivirals Commonly Used in Dentistry: Assessment, Analysis, and Associated Dental Management Guidelines 155

Section III: Acute Care and Stress Management 159
9. Management of Medical Emergencies: Assessment, Analysis, and Associated Dental Management Guidelines 161
Contents

Section IV: Hematopoietic System 199

Section V: Hemostasis and Associated Bleeding Disorders 229
17. Von Willebrand’s Disease: Assessment, Analysis, and Associated Dental Management Guidelines 250
18. Coagulation Disorders: Common Clotting Factor Deficiency Disease States, Associated Systemic and/or Local Hemostasis Adjuncts, and Dental Management Guidelines 254
19. Anticoagulants: Assessment, Analysis, and Associated Dental Management Guidelines 262

Section VI: Cardiology and Renal Disease 273
20. Rheumatic Fever: Assessment, Analysis, and Associated Dental Management Guidelines 275
22. Hypertension and Target Organ Disease States: Assessment, Analysis, and Associated Dental Management Guidelines 288
23. Cerebral Circulation Diseases TIAs and CVAs: Assessment, Analysis, and Associated Dental Management Guidelines 300
25. Congestive Heart Failure: Assessment, Analysis, and Associated Dental Management Guidelines 311
26. Cardiac Arrhythmias: Assessment, Analysis, and Associated Dental Management Guidelines 315
27. Peripheral Circulation Disease 318
28. Renal Function Tests, Renal Disease, and Dialysis: Assessment, Analysis, and Associated Dental Management Guidelines 319

Section VII: Pulmonary Diseases 331
29. Pulmonary Function Tests and Sedation with Pulmonary Diseases: Assessment, Analysis, and Associated Dental Management Guidelines 333
31. Asthma and Airway Emergencies: Assessment, Analysis, and Associated Dental Management Guidelines 341
32. Chronic Bronchitis and Smoking Cessation 348
33. Emphysema: Assessment, Analysis, and Associated Dental Management Guidelines 356
34. Chronic Obstructive Pulmonary Disease: Assessment, Analysis, and Associated Dental Management Guidelines 358
35. Obstructive Sleep Apnea: Assessment, Analysis, and Associated Dental Management Guidelines 365
36. Tuberculosis: Assessment, Analysis, and Associated Dental Management Guidelines 367

Section VIII: Clinical Pharmacology 375
37. Prescribed and Nonprescribed Medications: Assessment, Analysis, and Associated Dental Management Guidelines 377

Section IX: Endocrinology 383
38. Introduction to Endocrinology and Diabetes: Assessment, Analysis, and Associated Dental Management Guidelines 385
39. Thyroid Gland Dysfunctions: Assessment, Analysis, and Associated Dental Management Guidelines 403
40. Adrenal Gland Disease States: Assessment, Analysis, and Associated Dental Management Guidelines 408
41. Parathyroid Dysfunction Disease States: Assessment, Analysis, and Associated Dental Management Guidelines 417
Contents

42. Growth Hormone Dysfunction and Endocrine Tissues of the Reproductive System 433

Section X: Seizure Disorders 437
43. Classic Seizures: Assessment, Analysis, and Associated Dental Management Guidelines 439

Section XI: Gastrointestinal Conditions and Diseases 447
44. Gastrointestinal Disease States and Associated Oral Cavity Lesions: Assessment, Analysis, and Associated Dental Management Guidelines 449

Section XII: Hepatology 465
45. Liver Function Tests, Hepatitis, and Cirrhosis: Assessment, Analysis, and Associated Dental Management Guidelines 467

Section XIII: Postexposure Prevention and Prophylaxis 493
46. Needle-Stick Exposure Protocol and CDC Recommendations for Dental Health-Care Providers Infected with the Hepatitis B Virus 495

Section XIV: Infectious Diseases 503
47. Human Immunodeficiency Virus, Herpes Simplex and Zoster, Lyme Disease, MRSA Infection, and Sexually Transmitted Diseases 505

Section XV: Oral Lesions and Dentistry 539
48. Therapeutic Management of Oral Lesions in the Immune-Competent and the Immune-Compromised Patient in the Dental Setting 541

Section XVI: The Female Patient: Pregnancy, Lactation, and Contraception 565
49. Pregnancy, Lactation, and Contraception: Assessment and Associated Dental Management Guidelines 567

Section XVII: Rheumatology: Diseases of the Joints, Bones, and Muscles 587
50. Classic Rheumatic Diseases: Assessment and Associated Dental Management Guidelines 589

Section XVIII: Oncology: Head and Neck Cancers, Leukemias, Lymphomas, and Multiple Myeloma 625
51. Head and Neck Cancers and Associated Dental Management Guidelines 627
Contents

Section XIX: Psychiatry 661
52. Psychiatric Conditions: Assessment of Disease States and Associated Dental Management Guidelines 663

Section XX: Transplants 683
53. Organ Transplants, Immunosuppressive Drugs, and Associated Dental Management Guidelines 685

Section XXI: Common Laboratory Tests 695
54. Comprehensive Metabolic Panel and Common Hematological Tests 697

Appendix: Suggested Reading 699
