Abbreviated mental test score (AMTS) 16, 63
ABC cycle 40, 40
Addenbrooke's Cognitive Examination–ACE-R 18, 69–76

Adults
assessmen 10–11
bio-psychosocial 10–11
obsessional symptoms 11
panic attack 11
phobias 11
post-traumatic stress disorder 11, 12
risk 12
scales 10
screening questions, OCD 11, 12
continuation and relapse prevention 13
management steps 12–13
primary care
antidepressant drugs 9
IAPT 9
limitations 9–10
presentation 10
psychological treatments 9
QoF 9
suicide, risk 47
Agoraphobia 3, 7, 11
AMP (Improving Access to Mental Health in Primary Care) model 56

Antenatal and postnatal mental health
adverse obstetric outcomes 20
anxiety 20
case-finding and assessment 20
interventions 21
postnatal depression 19
suicide and risk assessment 21

Antidepressants
CBT 46
complicated grief 49
ECT 46–7
5-HT or noradrenaline 46
PHQ-9 47
RCTs 46
relapse, risks 47, 49
SNRIs
TCA 50
venlafaxine and duloxetine 49–50
SSRIs
CAMHS services 7
citalopram and escitalopram 47
first-line antidepressants 17
fluoxetine 49
lofepramine 49
mirtazapine 49
reboxetine 49
sertraline 47
TCAs 49
treatment algorithm 47, 48

Anxiety and depression
causes
biological factors 4
life events 3
psychological theories 4
speed of recovery 4
vulnerability and resilience 3
diagnosis and multimorbidity 2–3
epidemiology 3

Beck Depression Inventory (BDI) 10

therapeutic options 6–7
primary care 5–6

Cognitive-behavioural therapy (CBT)
adults 9, 12, 13
children and adolescents 7, 8
depression 25
older people 17
organisational barriers 26

Note: Page numbers in italics refer to Figures.
**Collaborative care approach**
- depression 24
- older people 17
- primary and secondary care 25

**Comorbid illnesses, drugs**
- cardiovascular comorbidity 50
- comorbid substance misuse 50
- gastrointestinal complications 50
- pain syndromes 50

**Computerised cognitive-behavioral therapy (cCBT) packages**
- 25, 40

**Correct QT (QTc) interval, ECG** 50

**Criminal justice system**
- assessment 36–7
- care 36
- community 38
- management
  - behavioural activation 38
  - custodial sentences 37
  - nervous disability 38
  - post-traumatic stress 38
  - prescription drugs 37
  - primary health team 37
  - psychotherapeutic modalities 37–8
- mental health care 38
- mental health problems 35
- New ‘Liaison and Diversion’ services 38
- offenders, groups 36
- person-centred collaborative formulation 36, 38
- psychosocial formulation 36–7, 37
- substance misuse 36, 39
- teams and disciplines, integrated care 38

**Depression** see Anxiety and depression

**Drugs**
- antidepressants 46–50
- comorbid illnesses 50
- next step treatments 51–2
- patients, different ages 51
- pregnancy 51
- SSRIs 46

**ECT** see Electroconvulsive therapy (ECT)

**Edinburgh Postnatal Depression Scale (EPDS)** 20, 21, 25, 26, 32, 36

**Ethnicity**
- anxiety and depression 31
- care, models 33
- clinical implications 32
- culturally specific psychosocial risk factors
  - disclosure of symptoms 31–2
  - ethnic density 31
  - life events and difficulties 31
- health service-related factors
  - health services utilisation 32
  - pathways to care 32
- management 32–3

**Forced mourning** 29

**General Anxiety Disorder**
- seven-item questionnaire (GAD7) 10, 60
- Generalised anxiety disorder (GAD) assessment questionnaire 10

**Grief**
- abnormal 28–9
- acute 27, 28
- complicated 28, 29
- definition 27
- DSM-5 criteria 27–8
- stages 27

**Hospital Anxiety and Depression Scale** 66

**Improving Access to Psychological Therapies (IAPT)** 9, 17, 21, 25, 26, 32, 36

**Liaison psychiatry** 25

**Long-term conditions (LTCs)**
- barriers, effective care 26
- carers 26
- case-finding/screening 24
- chronic depression 23
- management
  - elements 24
  - non-statutory support 25
  - psychological therapies and medication 25
  - rehabilitation programmes 24
  - self-management 25
- morbidity and mortality 23, 24
- non-specific symptoms 23
- prevention 26
- theories, aetiology 24

**LTCs** see Long-term conditions (LTCs)

**Montreal Cognitive Assessment (MOCA)** 18, 67

**Mourning** 4, 27–9

**NICE guideline ‘Common mental health disorders’ outlines approaches** 32, 33

**Obsessive-compulsive disorder (OCD)**
- obsessional symptoms 11
- screening questions 11, 12
- symptoms 2

**OCD** see Obsessive-compulsive disorder (OCD)

**Older people**
- antidepressants 17, 18
- case-finding questions 16
- CBT-based interventions 17
- clinical features 16
- collaborative care approach 17
- dementia 16
- GDS 18
- non-specific symptoms 16
- primary care 16
- risk factors 15

**Panic attack** 11, 20

**Patient Health Questionnaire-9 (PHQ-9)** 10, 24, 61

**nine-item Patient Health Questionnaire (PHQ9)** 10

**Phobias** 2, 7, 11, 20

**Postnatal depression** 19–21, 31, 32

**Post-traumatic stress disorder (PTSD)** 2, 8–9, 11–13, 20, 36, 38

**Psychosocial interventions, community**
- care, problems 53
- mental health care
  - community engagement 55–6
  - multifaceted model 54–5
  - quality of primary care 55
  - tailored psychosocial interventions 55
  - social prescribing 54
  - social problems 53–4

**Randomised controlled trials (RCTs)** 10, 46–7

**Resilience**
- ‘coaching’ approach 58
- decision-making 58
- definition 58
- depression and anxiety 3
- factors contributing 3
- psychotherapy 59
- self-development 58–9

**Selective serotonin reuptake inhibitors (SSRIs)** 7, 8, 12, 17, 46–7, 49

**Self-management** 25

**Serotonin and noradrenaline reuptake inhibitors (SNRIs)** 49–50

**Serotonin (5-HT) or noradrenaline 46, 49, 50**

**SMART goals** 42–3, 44

**SNRIs** see Serotonin and noradrenaline reuptake inhibitors (SNRIs)

**Social phobia** 7, 11

**SSRIs** see Selective serotonin reuptake inhibitors (SSRIs)

**TCAs** see Tricyclic antidepressants (TCAs)

**Therapeutic nihilism** 16

**Tokophobia** 20

**Tricyclic antidepressants (TCAs)**
- amitriptyline and clomipramine 51
- and SSRIs 49

**Vulnerability**
- antidepressants 46
- factors contributing 3
- GP, emotional and pragmatic approach 58
- 5-HT neurotransmission, brain 46
- psychoanalytic perspective 57–8
