amylose, 343
amylopectin, 343
applications, 351–352
carbohydrate, 344
centrifugation process, 345
developments in extraction, 347
digestibility, 344
functional properties, 348, 349
gelatinization and retrogradation, 349
gums, 343
heat moisture treatment, 351
method of production, 344, 345
modified taro starch, 351
Tacca, 59, 102
Taro, 2, 13, 34, 35, 39, 110, 111, 112, 113, 160–166, 204, 326
acridity, 11, 12, 328
anthocyanins, 328
antinutrients, 20
antinutritional factors, 329
applications, 23–27
calcium oxalate, 22
classification, 13–15
climate and soil, 205
composition, 328
crop protection, 209–210
erg
energy source, 327

Taro, 2, 13, 34, 35, 39, 110, 111, 112, 113, 160–166, 204, 326
acridity, 11, 12, 328
anthocyanins, 328
antinutrients, 20
antinutritional factors, 329
applications, 23–27
calcium oxalate, 22
classification, 13–15
cclimate and soil, 205
composition, 328
crop protection, 209–210
erg
energy source, 327
Taro starch, (continued)
morphological characteristics and crystallinity, 350
pasting properties, 349, 350
phosphorus, 344
physical modification, 351
physical properties, 346, 348
simple process, 345
starch extraction, 345
wet milling process, 345
Taro yogurt, taro gurt, 398
taxonomy, 38
Tragopogon, 52, 90, 98
translocation, 107
Tropaeolum tuberosum, 38, 45, 82
Tuber, 34, 105
tuberization, 105, 108
Turnip, 34, 35, 39, 49, 87

Ullucus, 35
Ullucus tuberosus, 38, 45, 81
unloading, 107
utilization of cassava flours, 427
adhesive, 429
applications of HQCF in baked products, 427
bioethanol, 429
noodle, 427
syrup, 428

vacuum microwave drying sweet potato chips, 527

Water chestnut, 37
Winged bean, 37

Xanthosoma, 41, 68, 74

Yacon, 34, 37, 38
Yakeyake, 467
Yam, 2, 14, 35, 39, 110, 111, 112, 113, 166–171, 197
antinutrients, 20
bitter principles, 23
applications, 23–27
classification, 13–15
climate and soil, 197–198
crop protection, 201
D. alata, 168, 171
D. bulbifera, 168
D. esculenta, 168
dioecious, 167
Dioscorea, 166
Dioscoreaceae, 166
D. rotundata, 168, 170
harvesting, 201
improved varieties, 198–199
land preparation and planting, 200
management practices for intercrop, 200–201
manures and fertilizers, 200
origin, 2
planting material, 200
production, 9, 10
trailing, 201
white yam, 170
yam mosaic virus, 170
Yam bean, 37, 39, 216
climate and soil, 216–217
harvesting, 219
inter-cultural operations, 218
manures and fertilizers, 217–218
planting season and method, 217
Yam consumption, 559
Yamdaisy, 34, 36, 38
Yam production, 559
Yam products, 563
boiled and roasted yam, 563
composite flours, 571
extruded products, 570
fried yam products, 566
instant yam flour, 568
paste/stiff dough, 567
pounded yam, 564
yam chips, 565
yam flakes, 569
yam porridge, 563
Yautia, 35, 39, 111, 112, 113
Yellow lily yam, 34, 36

Zingiber officinale, 38, 54, 92
