INDEX

Absorption, 25, 37
Acceptable daily intake value (ADI), 349
Accuracy, 354
Active pharmaceutical ingredient (API)
  Adhesive property, 126
  Cohesive property, 126
  Moisture-sensitive, 41
  Particle size distribution, 126, 312, 313, 435
  Particle size, 40, 49, 66, 95, 107, 135, 162
  Suspension, 106
  Tensile strength, 126
  Theoretical model of particle size, 135
  Particle aggregation, 314
  Permeability, 435
  Solubility, 435
  Specific surface area, 320
Adsorption, 244
Agglomerates, 63, 188
Agglomeration study, 138–140
Agglomeration, 119, 128
Airlock, 44
American Standard Testing Method, 125, 126, 186
Amorphous form, 110, 284
Analytical method validation, 352–355
Analytical testing laboratories, 405
Angle of repose, 174, 177, 183
Antioxidant, 133
  Ascorbic acid, 133
  Butylated hydroxyl toluene (BHT), 133
  Ethylenediaminetetraacetic acid (EDTA), 133
API, see active pharmaceutical ingredient
ASTM, see American Standard Testing Method
Atomization, 79
BCS, see Biopharmaceuticals Classification System
Beads coating, 41
Benzodiazepine, 374
Bile slats, 274
Binder, 96, 133
Bioavailability, 26, 28, 129
Bioequivalence, 450
Biopharmaceuticals Classification System, 205
Drug discovery, 3–5
Drug Master Files, 230
Drug substance, micronized, 37, 74
Drugability, 5
Drug-excipient compatibility, 37, 437
Drug-excipient interaction, 37
Dry granulation, 117, 119, 128
Dry milling, 208
Dual radius, 153
Ductile excipient, 150
Dynamic image analysis, 318

ECD, *see* Electrochemical detection
Electrochemical detection, 374
Electrostatic
  Charge, 166
  Forces, 66
Ergonomics, 425–426
Excipient, 35
  Absorbance background, 329
  Auditing, 229
  Binder, 171
  Classification, 224
  Compactibility, 131, 132
  Control strategy, 230, 338
  Filler, 170
  Functionality, 438, 439
  Functionality testing, 35, 232, 233
  Impurities, 245, 338
  Library, 327, 331
  Material properties, 233
  Particle size, 227
  Physical property, 226, 233
  Physicochemical attributes, 225
  Quality system, 229
  Regulatory status, 228
  Selection, 75
Explosivity, 218

F₂ value, 274
Facility control, 451
FBG, *see* Fluidized bed granulator
Feed frame, 195
Fire suppression system, 424
Flow aid, 179
Flowability, 180–183
Fluid bed granulation, 41, 64
Fluidization, 64, 68–72
Fluidized bed dryer, 99
Fluidized bed granulator (FBG), 70, 93
  Process control, 80–83
  Spray gun, 79
  Spray nozzles, 71
  Airflow rate, 81
  Granulation liquid spray rate, 81
  Inlet air humidity, 81
  Inlet air temperature, 81
  Process variables, 83, 84
  Product humidity, 81
  Scale-up, 84
  Troubleshooting, 84
Fluidized bed jet mill, 211
Food and Drug Administration (FDA), 8, 9, 10
Fourier Transform Raman Spectroscopy, 110
Froude number, 196
Fusion, 227

Gas adsorption, 320
Generally recognized as safe (GRAS), 224
Geometric standard deviation, 57, 58, 60
Geometrical dilution, 100
Glove port, 414
Glyceryl triacetate, 247
Granulation
  Density, 146
  Endpoint, 99
  Liquid, 79, 97
  Mechanism capillary state 68, 91
  Droplet state, 91
  Funicular state, 68, 91
  Pendular state, 67, 91
  Particle size distribution, 123, 146
Granule progression
  Ball growth, 92
  Nucleation, 92
  Transition, 92
  Granule properties, 103
  Granule size, 80
GRAS, *see* Generally recognized as safe
