Preface 7  
Abbreviations 8

### Scientific foundation of oncology

1. The global burden of cancer 10  
2. The nomenclature of oncology 12  
3. Environmental determinants of cancer 14  
4. The hallmarks of cancer I 16  
5. The hallmarks of cancer II 18  
6. The hallmarks of cancer III 20  
7. The hallmarks of cancer IV 22  
8. Cancer genetics and inherited cancer 24

### Clinical aspects

9. Communicating with cancer patients 26  
10. Presenting problems in a patient with cancer 28  
11. Paraneoplastic syndromes 30  
12. Metabolic emergencies in cancer patients 32  
13. Oncological emergencies 34  
14. Investigation and management of metastatic disease 36  
15. Tumour markers 38  
16. Screening for cancer 40  
17. Imaging in oncology 42  
18. Approach to treatment and response assessment 44  
19. Principles of surgical oncology 46  
20. Pharmacology of anticancer agents 48  
21. Principles of radiotherapy 50  
22. Adverse effects of treatment 52  
23. Management of nausea 54  
24. Analgesia 56  
25. Clinical trials in cancer patients 58  
26. The role of multidisciplinary teams 60  
27. End of life care 62

### Specific cancers

28. Carcinoma of unknown primary 64  
29. Breast cancer 66  
30. Lung cancer 68  
31. Mesothelioma 70  
32. Oesophageal cancer 72  
33. Gastric cancer 74  
34. Colorectal cancer 76  
35. Pancreatic cancer 78  
36. Hepatobiliary cancer 80  
37. Ovarian cancer 82  
38. Endometrial cancer 84  
39. Cervical cancer 86  
40. Germ cell tumours 88  
41. Prostate cancer 90  
42. Bladder and renal cancer 92  
43. Head and neck cancer 94  
44. Thyroid cancer 96  
45. Bone cancer and sarcoma 98  
46. Skin cancer 100  
47. Cancers of the central nervous system 102  
48. Neuroendocrine tumours 104  
49. Leukaemia 106  
50. Hodgkin’s lymphoma 108  
51. Non-Hodgkin’s lymphoma 110  
52. Myeloma 112  
53. Childhood cancers 114
