CONTENTS

1 Drug Pharmacokinetics and Toxicokinetics 1

2 GIT Anatomy and Physiology and Drug Oral Bioavailability: Impact of Species Differences 35

3 Drug Routes of Excretion 77

4 Physicochemical and Biopharmaceutical Properties that Affect Drug Absorption of Compounds Absorbed by Passive Diffusion 139

5 Physicochemical and Biopharmaceutical Factors Affecting Hepatic/Intestinal First-Pass Effect 173

6 Impact of Intestinal Efflux Transporters on Oral Absorption 203

7 Impact of Influx Transporters on Drug Absorption 269

8 Extended Clearance Classification System (ECCS) and its Utility in Predicting Clearance Rate-Determining Step in Drug Discovery 309

9 *In Vitro* and *In Situ* Approaches to Measure Intestinal Permeability and Efflux Transporters 331

10 *In Silico* Approaches to Predict Intestinal Permeability 347
### CONTENTS

11 *In Vivo* Preclinical Approaches to Deconvolute The Contribution of First-Pass Effect from Oral Absorption  
   357

12 *In Vitro* Approaches to Assess Hepatic Metabolism and First-Pass Effect  
   377

13 The Utility of ECCS as a Roadmap to Improve Oral Bioavailability of New Molecular Entities: Industrial Perspective  
   387
