Introduction xvii

Section 1 Background Information 1

1 Why Treat Obesity? 3
   What is the scale of the obesity problem? 3
   Why does it matter? 3
      Obesity and early death 4
      Obesity and type 2 diabetes 4
      Obesity and cancer 5
      Obesity and cardiovascular disease 5
      Quality of life 5
   Factors that increase the risk of obesity 6
      Smoking cessation 6
      Certain medications 7
   Obesity and its causes 7
      Why do practitioners need a good understanding of obesity causes? 7
      What are the causes of obesity? 8
      Biology and genes 9
      Eating and activity behaviours 10
      The obesogenic environment 10
   Health benefits of modest weight loss 11
   Conclusion 11
   References 12

2 Health Professionals’ Attitudes Towards Obesity and its Management 15
   What does the evidence say about discrimination and weight bias in society? 16
      In employment 16
      In education 16
      In health care 17
   Where does weight bias come from? 17
      Media and TV images 17
      Cultural factors 18
      Beliefs about the causes of obesity 18
   What are the consequences of weight bias? 18
      Psychological consequences 18
      Social and economic consequences 18
      Physical consequences 18
What is the impact of weight bias in the health care setting? 18
What can we do to reduce weight bias? 19
Conclusion 19
Reflective exercises 20
Recommendations for reducing weight bias in your practice 21
References 21

3 Treatment Options: The Evidence for What Works 24
Introduction 24
Combined approaches 24
Dietary treatments 25
  Eating frequency and patterns 25
  Improving the quality of the diet 25
  Low-fat diets 25
  The 600 kcal deficit approach 26
Meal replacements 26
  Very-low-calorie diets 27
  Low-glycaemic-index diets 28
  Low-carbohydrate diets 29
  Fad diets 29
Physical-activity treatments 29
  How much activity is needed? 30
  Intensity and type of activity 31
Behaviour modification 32
  An integrated approach 32
  Key strategies 33
Drug treatment 36
Surgical treatment 37
Conclusion 38
References 38

Section 2 Practical Application 45

4 Preventing Overweight and Obesity 47
Prevention of overweight and obesity 47
  Pre-conception and antenatal care 47
  The early years 47
  As life goes by 48
  Medications 49
What to do? 49
  If the response is negative 50
  Support materials 50
Conclusion 51
References 51

5 Providing A Person-centred Weight-management Service 53
Integrating a behavioural approach 53
  Working in a person-centred way 53
  How to integrate a behavioural approach in practice? 54
Identifying overweight and obesity 57
  Interpreting BMI 57

10 Getting the Most out of Brief Contacts 175
   Introduction 175
   What is a brief contact? 175
   Limitations of brief contacts 176
   Getting the most out of brief contacts 176
      Unhelpful approaches 177
      Raising the issue 178
      Engaging in a helpful conversation and exploring motivation 179
      Is now the right time? 179
      Discussing options 179
      Signposting the most suitable option 181
      Continuing to offer support 181
   Brief interventions (if ongoing support includes brief review appointments) 182
      What not to do 182
      Making the best use of available time for ongoing brief contacts 182
   Implications for services 182
   Examples of brief contacts 183
   Conclusion 184
   References 184

11 Evaluating Individual Weight-management Interventions 186
   Introduction 186
   What is monitoring and evaluation? 187
      Some definitions 187
      The seven pillars 187
      Evaluation can mean different things to different people 189
      Evaluation can vary at different times 189
      What makes evaluation challenging? 191
   Getting started 192
   Collecting information 192
   What to evaluate 194
      Effectiveness 194
      Clinical outcomes 194
      Risk factors 195
      Activity and eating behaviours 195
      Psychological health 197
      Health care utilisation and cost outcomes 198
      Patient experience 198
      Safety 202
   Conclusion 202
   References 203

12 Common Challenges and Misconceptions 204
   Introduction 204
   Causes of obesity 204
‘It’s my fault I’m obese’ 204
‘I must have a slow metabolism’ 205
‘It’s my genes, not my lifestyle’ 206
‘I’ve been told I’m not eating enough to lose weight’ 207
Physical activity 208
‘I can’t lose weight because my medical problems stop me from exercising’ 208
‘Exercise makes me eat more’ 209
‘I’ve been swimming for 20 minutes twice a week for 2 months and haven’t lost any weight’ 210
Diet 211
‘Certain foods can burn fat’ 211
‘I know breakfast is important but I just can’t eat in the morning’ 212
‘Carbs are fattening’ 213
‘Eating late at night causes weight gain’ 214
Note on patient dialogues 215
