Index

A
Akaike information criteria (AIC), 37, 58
Alpha, 6, 15
Anderson’s sufficient statistic, 37, 57
Arbitrage pricing theory (APT), 17, 26
Arbitrage, 17, 20
Asset-specific risk, see Idiosyncratic risk

B
Bernoulli–Gaussian process, 45, 120, 125, 131, 139
Beta, 6, 15
Beta risk, see Systematic risk
Book-to-market ratio, 25

C
Capital Asset Pricing model (CAPM), 14, 15
Carhart’s four-factor model, 26, 56
Chen, Roll and Ross model, 26, 56
Covariance, 2, 15
Covariance matrix estimation, 38
Empirical Covariance Matrix, 10
Fixed-point (FP) estimator, 44
Huber’s M-estimator, 43
M-estimators, 38
Robust methods, 43
Sample Covariance Matrix (SCM), 33, 38, 40, 56
Cramér–Rao lower bound, 47

D
Diversifiable risk, see Idiosyncratic risk
Diversification, 19

E
Efficiency, see Market efficiency
Eigen-decomposition, 33, 57
Eigenfactor, 5, 7, 31, 57
Eigenfactor selection, 31
154 Multi-factor Models and Signal Processing Techniques

Eigenvalue distribution Test, 51
Eigenvalues density, 52, 138
Empirical ad hoc approach, 24
Empirical matrix estimation, 10
Equilibrium, see Market equilibrium
Equity index, 15
Excess return, 10
Expected excess return, see Risk premium
Expected return, 2
Exposure, 6, 9
Alpha, 6, 15
Beta, 6, 15
Sensitivity, 6
Extended state space model, 130

F

Factor, 5
Factor analysis (FA), 5
Factor model
APT, 17
CAPM, 14
Carhart’s four-factor model, 26, 56
Chen, Roll and Ross model, 26, 56
Empirical ad hoc approach, 24
Fama and French model, 25, 56
Fung and Hsieh model, 27, 56
Multi-Factor model, 5
Sharpe’s Market model, 14
Factor representation, 4, 48
Factor selection, 11
Empirical ad hoc approach, 12
Statistical approach, 12, 31
Stepwise regression, 30
Fama and French factor
HML, 25
Sharpe’s market model, 25
SMB, 25
Fama and French model, 25, 56
Fixed-Point (FP) estimator, 44, 57
Fund of hedge funds, 9
Fung and Hsieh factor
Bond10y, 28
CreditSpread, 28
EquitySizeSpread, 28
MXEF, 28
PTFSBD, 27
PTFSCOM, 27
PTFSFX, 27
SP500, 28
Fung and Hsieh model, 27, 56

G

Gaussian
Random variable, 134
Vector, 133
Probability density, 133
White Gaussian vector, 133

H

Hedge Funds, 1, 9, 27
Hotelling’s T-squared statistics, 41
Huber’s $M$-estimator, 43, 57

I

IC$_p$, 49
Idiosyncratic risk, 6, 7, 10
Index  155

Information criteria, 36
  Akaike information criteria (AIC), 37
  Minimum description length (MDL), 38
Innovation, 83, 122
Innovation property, 75
Inversion lemma, see Matrix

K
Kalman Filter (KF), 61
  Correction accuracy processing, 84
  Correction filtering, 79, 83
  Correction update, 79
  Innovation, 83
  Innovation property, 75
  Kalman gain, 79, 84, 116
  Markovian property, 75
  Measurement equation, 73
  Prediction accuracy processing, 82
  Prediction filtering, 78, 81
  Regularized Kalman Filter (rgKF), 121
  Robust Kalman Filter (RKF), 119
  State equation, 72
  State-space model, 72
  Kalman gain, 79, 84, 116

L
  $l^1$-regularization, 124, 132
  $l^2$-regularization, 124, 132
Large panel data, 48
  Large panel data criteria, 49
LASSO, 121
Least squares estimation (LSE), 13, 61

Linear factor model, see Factor model

M
M-estimators, 42, 43, 52, 57
  Fixed-Point (FP) estimator, 44, 57
  Huber's M-estimator, 43, 57
Market
  Capitalization, 21, 25
  Efficiency, 20
  Equilibrium, 14, 20
  Portfolio, 14, 15, 20
Market risk, see Systematic risk
Market risk premium, 15
Markowitz's theory, 3, 10
Marčenko–Pastur density, 53, 139
Matrix
  Random, 52, 138
  Vandermonde, 47
Maximum likelihood estimation (MLE), 38, 40
Mean square error (MSE), 120
Mean-variance efficiency, 14
Minimum description length (MDL), 38, 58
Model order choice, 36
  $IC_p$, 49
  $PC_p$, 49
Akaike information criteria (AIC), 37, 58
Anderson’s sufficient statistic, 37, 57
Large panel data criteria, 49
Minimum description length (MDL), 38, 58
Random matrix theory (RMT), 51
Multi-factor model, 5
MUSIC algorithm, 35, 46

N, O

Net asset value (NAV), 4, 29
Non-diversifiable risk, see Systematic risk
Optimal portfolio allocation, 10
Outlier detection (OD), 121
Outlier estimation, 121

P

Parameter estimation, 13
Least squares estimation (LSE), 13
Sliding window OLS (SW-OLS), 13
PC
Portfolio, 3
Market portfolio, 20
Tradable portfolio, 19
Zero-cost portfolio, 19
Portfolio allocation, 8
Portfolio diversification, 19
Portfolio management theory, 1
Portfolio returns, 7
Markowitz’s theory, 3
Mean-variance efficiency, 3
Principal Component Analysis (PCA), 5, 31, 33
Asymptotic principal components, 48
Probability density
\( \chi^2 \) distribution, 37, 41, 45, 134

Bernoulli–Gaussian process, 120, 125, 131, 139
Eigenvalues density, 52, 138
Fisher–Snedecor (or Snedecor’s-\( F \)) distribution, 41, 136
Gaussian distribution, 41, 124, 125, 133
Hotelling’s \( T \)-squared statistics, 41, 138
Marčenko–Pastur distribution, 138
Marčenko–Pastur density, 53, 139
Multi-variate Gaussian distribution, 133
Snedecor’s-\( F \) (or Fisher-Snedecor) distribution, 41, 136
Student’s-t statistics, 41, 135
Wishart distribution, 42, 56, 138

R

Random matrix theory (RMT), 51
Recursive equations, see Kalman filter
Regression, 4
Regularized, 121
Regularization parameter, 121, 125
Regularized Kalman Filter (rgKF), 121, 131
Correction, 124, 132
Innovation, 123, 131
\( l^1 \)-regularization, 124, 132
l²-regularization, 124, 132
Mean correction, 124, 132
Mean prediction, 123, 131
Outlier detection (OD), 121
Outlier estimation, 121
Variance correction, 124, 132
Variance prediction, 123, 131
Return, 2, 3
Return-based style analysis
Style analysis, 8
Risk, 2, 18
   Idiosyncratic, 6
   Specific, 6
   Systematic, 7
Risk premium, 3, 19
Risk-free rate, 2, 10, 14, 18
Risky asset, 2, 5
Robust covariance estimation
   Fixed-point (FP) estimator, 44
   Huber’s M-estimator, 43
   M-estimators, 43
Robust Kalman Filter (RKF), 119, 124, 131
Robust methods, 42
S
Sample covariance matrix
   (SCM), 33, 38, 40, 42, 56
Sample mean, 39, 56
Security market line (SML), 15
Sensitivity, 6
Sharpe ratio, 3
Sharpe’s market model, 14, 15
Sliding window OLS (SW-OLS), 13
Small cap stocks, 25
Snedecor’s-F distribution, 41
Sparsity, 121
Specific risk, 6
State-space model, 72, 130
Stepwise regression, 30
Student’s-t statistics, 41
Style analysis, 7
Subspace methods
   MUSIC algorithm, 35, 46
   Principal Component Analysis (PCA), 31, 33
Systematic risk, 7, 11
T
Tactical portfolio allocation, 8
Transparency, 9
V
Value stocks, 25
Vandermonde matrix, 47
Variance, 2
Volatility, 2, 3, 18
W
White Gaussian vector, 133
Wishart distribution, 56, 138
