INDEX

AR4, 4th assessment report for the IPCC (Intergovernmental Panel for Climate Change)
future scenarios, 73–89
future climate, 76–77, 77f, 78f, 79f
future simulation and, 82–86, 84f, 85f, 86f, 87f

Biogeochemistry, 4, 41, 42, 48, 49
Biogeochemistry module, MC1, 5–7, 9f, 10t, 13 73–74
Biogeography, 4, 41–42, 43–48, 51
Biogeography module, MC1, 5, 6f, 6t, 7f, 7t, 73
Biomass thresholds, 5, 8t
BIOME2 model, 3
BIOME-BGC model, 4
Buildup index (BUI), 12, 88, 120
California, 4. See also Sierra Nevada
Canada 73–89
climate and, 77, 78f, 79f
future, 76–77, 77f
input data for, 74–77
soil, 74–75, 75f
methods of, 74–77
results of, 77–86
simulation and
future, 82–86, 84f, 85f, 86f, 87f
Carbon dynamics
climate and suppression effects on, 17–27
fire module and, 19
fire suppression and, 21–24, 25f, 26
NECB, 49
nitrogen dynamics and, 105
Carbon exchange, 49
Carbon pools, 5, 9f
Carbon sequestration, 26
CENTURY model, 4. See also MC1 model
biogeochemistry module and, 5, 13
MAPSS and, 43
nutrient cycling in, 36
CGCM2. See Coupled Global Climate Model version 2
Climate
DGVM simulation and, 75–77, 78f, 79f
ecosystem change and, 91–108
effects of, 3
fire, simulated, and, 17–27
fire area and, 21
fire occurrence and, 24
future, 76–77, 77f
ecosystem change and, 98–99
historical, 75–76
warming, in PNW, 106–7
Climate change, 3
ecosystems and, 42
restoration of, 18, 27
management decisions and, 154
martens and fishers in Sierra Nevada and, 135–47
Data Basin gallery for, 173
current distribution of, 136–41, 137t, 140t, 144–46
future projections for, 139–40, 139t, 142–43, 143f,
144f, 145f, 146–47
natural resource management and, 168–69
protected areas and, 171
Climate-induced changes
in fire frequency, 157
in VT, 156–57, 157f
Climate-informed STSMs (cSTSMs), 153
application in central Oregon
climate data for, 158
MC1 calibration for, 158
MC1 simulation results for, 158–59, 159f, 160, 161f, 162f
application in WCR
climate data for, 163
MC2 calibration for, 163, 164f, 165f
MC2 simulation results for, 164–66, 167f
developing, 155–57, 155f
Climate zone thresholds, 5, 7t, 8t
CMIP3. See Coupled Model Intercomparison Project Phase 3
CMIP5. See Coupled Model Intercomparison Project Phase 5
CO2
atmospheric, 106
effect, in MC1 model, 35–36, 118
FACE and, 69
Conservation Planning Atlases (CPAs), 174
