CONTENTS

PREFACE ix

ACKNOWLEDGMENTS xv

CHAPTER 1 SYSTEM OVERVIEW, TERMINOLOGY, AND BASIC CONCEPTS 1

Chapter Objectives 1
History of Electric Power 1
System Overview 2
Terminology 3
AC Voltage Generation 9
AC Connections 14
Three Types of Electrical Load 15

CHAPTER 2 GENERATION 19

Chapter Objectives 19
Real-Time Generation 19
Power Plants and Prime Movers 20

CHAPTER 3 TRANSMISSION LINES 43

Chapter Objectives 43
Transmission Lines 43
Conductors 45
Transmission Line Design Parameters (Optional Supplementary Reading) 50
Underground Transmission (Optional Supplementary Reading) 51
DC Transmission Systems (Optional Supplementary Reading) 52

CHAPTER 4 SUBSTATIONS 53

Chapter Objectives 53
Substation Equipment 53
Transformers 54
Regulators 63
Circuit Breakers 69
Reclosers 74
Disconnect Switches 75
Lightning Arresters 79
Electrical Bus 81
Capacitor Banks 83
vi CONTENTS

Reactors  84
Static Var Compensators  86
Control Building  87
Preventive Maintenance  88

CHAPTER 5 DISTRIBUTION  91

Chapter Objectives  91
Distribution Systems  91
Transformer Connections (Optional Supplementary Reading)  102
Fuses and Cutouts  110
Riser or Dip Pole  112
Underground Service  112

CHAPTER 6 CONSUMPTION  119

Chapter Objectives  119
Electrical Energy Consumption  119
Power System Efficiency  121
Power Factor  122
Supply and Demand  123
Demand Side Management  124
Metering  125
Performance-Based Rates  131
Service Entrance Equipment  132

CHAPTER 7 SYSTEM PROTECTION  147

Chapter Objectives  147
Two Types of Protection  147
System Protection Equipment and Concepts  148
Distribution Protection  152
Transmission Protection  155
Substation Protection  157
Generator Protection  158
Generator Synchronization  160
Overall Transmission Protection  162
Substation Automation  162

CHAPTER 8 INTERCONNECTED POWER SYSTEMS  165

Chapter Objectives  165
Interconnected Power Systems  165
The North American Power Grids  166
Regulatory Environment  167
Interchange Scheduling  170
Interconnected System Operations  171
System Demand and Generator Loading  177
Reliable Grid Operations  180
CONTENTS

CHAPTER 9  SYSTEM CONTROL CENTERS AND TELECOMMUNICATIONS  187
Chapter Objectives  187
Electric System Control Centers  187
Supervisory Control and Data Acquisition (SCADA)  189
Energy Management Systems  191
Wide Area Monitoring Systems (WAMS)  194
Smart Grid  196
Utility Communications Systems  207

CHAPTER 10  PERSONAL PROTECTION (SAFETY)  209
Chapter Objectives  209
Electrical Safety  209
Personal Protection  210
ARC-Flash  218
Electrical Safety Around the Home  222

APPENDIX A  THE DERIVATION OF ROOT MEAN SQUARED  225

APPENDIX B  GRAPHICAL POWER FACTOR ANALYSIS  227

RECOMMENDED READING  229

INDEX  231
