  psychotic disorders 433, 438, 444
PTE see potentially traumatic (PTE)
PTSD see post-traumatic stress disorder (PTSD)
PTSD Criterion A 21–3, 25, 63
PTSD Criterion F 23
Index

PTSS see post-traumatic stress symptoms (PTSS)
PYD see Positive Youth Development (PYD)

RAND Draft Guidelines for International Trauma Training 264
rapid-cycling bipolar disorder 171
RCE see Resource Connection Envelope (RCE)
reenactment, definition of 217
refugees, TST for 386–7
relational PTSD, concept of 82
relationship betrayal 146
residential care settings, TST for 388
resilience and compassion fatigue 429
development by building sensory awareness skills 280–1
recipe for 279–80
steps for building 281–2
vocabulary of 285–6
Resilient Parent–Resilient Child group 247
Resource Connection Envelope (RCE) 304
retrieval-induced forgetting 143–5
Rivermead Behavioural Memory Test 122

SAMs see situationally accessible memories (SAMs)
Schachter’s two-factor theory, for post-trauma cognitive biases 218
schizophrenia 117, 168, 169, 170, 444
Schneiderian first-rank symptoms 168
school-based intervention program
dilemmas and challenges associated with 251–2
lessons learned during development of 250–1
modules of 248
process of implementation of 249
School Psychological Service 251
schools intermediate and middle school healing activities
language arts 239–40
social studies 240–1
models for addressing needs of children exposed to terrorism and war 243
building resilience with parents 247–8
building resilience with teachers 247
components of 245
dilemmas and challenges associated with 251–2
implementation of 245–6
lessons learned in development of 250–1
monitoring of needs in affected communities 249–50
school-based screenings 246–7
school-based treatment modalities 248
system-wide capacity and sustainability 249
training of school mental health professionals 248–9
role in prevention of child traumatic stress
attachment trauma 233–4
behavior problems 237
bullying issue 236–7
classroom activities for trauma transformation 237–8
environment and disciplinary policies 236
experiences of fear and terror 235–6
healing activities for early childhood education 238–9
healing activities for high school students or adolescents 241
healing activities for intermediate and middle school 239–41
strengthening of children’s self-regulation 234–5
SE see somatic experiencing (SE)
secondary traumatic stress reactions (STS) 9, 417, 422
background of 418–19
definition of 421
personal problems and conflicts 428
secondary traumatization, concept of 64–5
self-esteem
parents role in influencing 70
stressors interference with
development of 70
self-protective strategies, of attachment
and adaptation 393–4
sensations
acquaintance with 283
building of new vocabulary 285–6
exercise for
exploring 286–8
noticing 283–5
helping child or teen focus on internal
288–9
language of 289–90
“pendulating” between pleasant and
unpleasant 286
principles of tracking 293
sense of self, stressors interference with
development of 71
sensory-motor defensive movements 293
serotonergic system 114
services advocacy 383, 385
SES see socioeconomic status (SES)
sexual abuse 4, 5, 46, 47, 54, 71, 150,
393, 400
access to memory for 137–8
and unresolved trauma in childhood
397
see also child abuse; childhood sexual
abuse
shareability theory 145–6
SIT see Stress Inoculation Training (SIT)
situationally accessible memories (SAMs)
142
skill-based psychotherapy 383–4, 388
social anxiety 336, 437
social ecology, different layers of 379
social factors, influencing development of
PTSD 51–2
social learning model 220
social phobia 339
socioeconomic status (SES) 24, 93, 105,
117
somatic experiencing (SE) 275
crisis relief with groups 293–5
and fear of own reactions 287–8
and vulnerability of children to trauma
276–7
stabilization on site (SOS) 384
stem cell transplantation 95
stimulation-seeking theory 216
Strange Situation procedures 391, 401,
402, 403
Stress Inoculation and Prolonged
Exposure 298
Stress Inoculation Training (SIT) 325
stressors
categories of developmental needs in
children and adolescents
acquisition of appropriate coping
skills 71–2
healthy attachment 69–70
physical safety 68–9
self-esteem 70
sense of self 71
and child/adolescent development
67–8
family 65–6
external stressors 66
internal stressors 67
influencing development of PTSD
52–4
small t traumas and large T traumas
63–4
“stress-response” systems 217
STS see secondary traumatic stress
reactions (STS)
Subjective Unit of Disturbance (SUDS)
scale 305, 307, 336
substance abuse, TST for 387
substance use disorders (SUDs) 440,
443
SUDs see Subjective Unit of Disturbance
(SUDS) scale
SUDs see substance use disorders (SUDs)
switching behaviors, of dissociative
disorder patients 171
TAII see Transition to Adulthood
Attachment Interview (TAAI)
trance techniques 261
Transition to Adulthood Attachment Interview (TAAI) 391, 402–3
Trauma-Focused Cognitive-Behavioral Therapy 383
trauma-related cognitive attributions, for development of PTSD 54
trauma(s)
betrayal trauma
prediction 139
psychobiological responses 148
theory 138–41, 144, 149, 159
body–brain connection 282–3
childhood trauma 159
children’s responses to 374
classroom activities for prevention of 237–8
complex 434
concept in trans-cultural context 78–80
crisis relief with groups 293–5
developmentally adverse interpersonal exposure in youth 345–7
exposures and development of PTSD in children and adolescents 4–5
family’s role in protection from 65
and fear of own reactions 277–8
first aid guide for prevention of 290–3
group intervention for adolescents who experienced extreme 85
group sessions 85–6
mechanism of transmission of 64 of migration
in trans-cultural context 78–80
treatment for children and adolescents 80–3
vulnerabilities specific to children of migrants 83–4
prevention by appropriate support to overwhelmed child 281
recipe for 278
secondary traumatization 64–5
self-protective strategies 397
small t and large T 63–4
somatic experiencing for prevention and healing of 275
treatment for children/adolescents who have experienced exile 80–3
two-dimensional model of 139
vulnerability of children to 276–7
trauma system, definition of 376
Trauma Systems Therapy (TST) 9
adaptations
for child welfare 392
for medically traumatized children 387–8
for refugees 386–7
for residential care settings 388
for substance abuse 387
Advocacy Assessment and Plan process 385
assessment grid 380
assessment under 376–81
case studies 374–5
overview of treatment structure 376
phases of treatment and corresponding treatment modules 383
priority problems 381–2
problem identification 381–2
services under 382–3
home and community-based care 384
psychopharmacology 384–5
services advocacy 385
skill-based psychotherapy 383–4
stabilizing stage of treatment 381, 397
surviving stage of treatment 387
treatment duration 385–6
traumatic stress in children, development of 376
Traumatic Stress Studies, European Society for 205
traumatic stress syndromes 439
and survival-based modes of self-regulation 437–8
treatment principles and phases, for dissociative disorder patients 171–2
TST see Trauma Systems Therapy (TST)
TST-CW see TST for child welfare (TST-CW)
TST for child welfare (TST-CW) 388
TST for medically traumatized children (TST-M) 387–8
TST for refugees (TST-R) 386–7
TST for residential care settings (TST-RES) 388
TST for substance abuse (TST-SA) 387
TST-M see TST for medically traumatized children (TST-M)
TST-R see TST for refugees (TST-R)
TST-RES see TST for residential care settings (TST-RES)
TST-SA see TST for substance abuse (TST-SA)

Twist of Faith (documentary) 148
Type A strategies, for inhibiting display of negative affects in children 396, 401–2, 410
Type C strategies, of exaggerating displays of negative affect 396–7, 402

unresolved trauma, in childhood 69, 391, 392, 397, 401

VAMs see verbally accessible memories (VAMs)
variables, influencing traumatic reactions and recovery from PTSD 23–4
verbally accessible memories (VAMs) 142

Wechsler Intelligence Scale for Children–Revised 120
Wisconsin Card Sorting Test 121
World Health Organization 264

Youth Self-Report 218
Youths, PTSD in comorbidity disorders 25
complex reactions following traumatic events 25–6
complex trauma or developmental disorder 26–33
developmental disruptions 33–4
information processing because of traumatic experiences 34–5
method for assessing trauma 16–20
overview of trauma exposure and 345–7
personality traits and styles 24–5
PYD strategies and treatment for 204–6
see also antisocial youth
Youth Violence Exposure and Response 218
