### Part 1  Contemporary Context  
1  Definition, Recognition and Assessment  3  
_Olive McKeown_  
Introduction  3  
Definition and terminology  4  
General considerations in the recognition and assessment of dual diagnosis  5  
How significant is the problem of dual diagnosis?  5  
Recognition and assessment  6  
Hypotheses  8  
Conclusion  11  

2  Explanatory Models for Dual Diagnosis  13  
_Peter Phillips and Sonia Johnson_  
Introduction  13  
Is substance misuse more prevalent among people with psychotic illnesses than in the general population?  14  
Which problem generally develops first in dual diagnosis?  16  
Does dual diagnosis have a neurobiological basis?  17  
Is dual diagnosis mediated by personality disorder?  18  
Do people with schizophrenia use substances as a form of self-medication?  19  
Have changes in the care and social circumstances of people with schizophrenia, particularly deinstitutionalisation, led to a rise in substance misuse in this population?  20  
Do the social situations and social difficulties of people with schizophrenia lead to substance use?  21

3 Consumer Perspectives
    David Webb
    Introduction
    Human experience and medicine
    Diagnosis, treatment and human rights
    Two worlds
    Significant contrasts
    Conclusion

Part 2 Common Presentations and Special Populations

4 Risk Assessment and Dual Diagnosis
    Lisa Reynolds and Jenny Oates
    Introduction
    Clinical risk assessment
    Principles of risk assessment and management
    The process of risk assessment and management
    Conclusion

5 Reducing Drug-Related Harm Among Mentally Ill People
    Peter Phillips
    Introduction
    Interventions and approaches
    Harm reduction
    Using harm reduction approaches with mentally ill individuals
    Dual diagnosis and harm reduction: the future?
    Conclusion

6 Motivational Interviewing
    Chris Glover
    Introduction
    What is MI?
    Conclusion
7 Psychological Interventions 67
Patrick Callaghan and David Jones
Introduction 67
The nature and type of psychological interventions 67
The evidence for psychological interventions in dual diagnosis 68
Individual therapies 70
Group therapies 70
Cognitive behaviour therapy and relapse prevention 71
Family interventions 72
Contingency management 72
Conclusion 72

8 Alcohol and Mood Disorders 76
Julie Attenborough
Introduction 76
Harm, alcohol and mental illness 76
Presentation: alcohol and mental illness 77
Medication and dual diagnosis 78
Conclusion 85

9 Polysubstance Use and Personality Disorder 89
Simon McArdle
Introduction 89
Prevalence 89
Service delivery 89
What is personality disorder? 90
Treatment and intervention approaches 91
Assessment 92
Stages of change 93
Therapeutic principles 99
Conclusion 100

10 Older People and Dual Diagnosis 102
Sue Excell
Introduction 102
An increasing population 102
Policy framework 103
Media representation of information on alcohol 104
Perception of old age 105
Alcohol use in older people 105
Complications of excessive alcohol use 106
## Contents

Assessment and screening 107  
Under-reporting 107  
Over-the-counter medication (OTC) 107  
Prescribed medication 108  
Conclusion 112

11 Stimulant Use and Psychosis 116  
*Lorna Saunter*  
Introduction 116  
Stimulant use in the United Kingdom 117  
Stimulants and drug-induced psychosis 117  
Stimulants and mental illness 121  
Stimulants and their use by people with existing psychotic illnesses 122  
Implications for practice 125  
Conclusion 127

12 Women and Dual Diagnosis 130  
*Julie Winnington*  
Introduction 130  
Gender differences in dual diagnosis 131  
The impact of dual diagnosis on families 133  
Dual diagnosis and domestic violence 135  
Dual diagnosis within the female prison service 135  
A case for gender-specific services 136  
Conclusion 137

13 Drug-Induced Psychosis 139  
*Hülya Bilgin, Murat Soncul and Peter Phillips*  
Introduction 139  
Dual diagnosis: a common problem 139  
The relationship between substance use and psychosis: aetiology 140  
A model of relationships between psychotic illness and drug and alcohol use 142  
Conclusion 144

14 Cannabis Use and Psychosis 147  
*Liz Hughes*  
Introduction 147  
What is cannabis? 147  
How is it used? 148  
Legal issues 148  
How it affects the user 148  
Psychological effects 149  
Physical effects 150  
Safety issues 150
Contents ix

The links between cannabis and psychosis 151
Interventions for cannabis and psychosis 155
Conclusion 158

15 Methamphetamine and Mental Health 163
Melinda Campopiano
Introduction 163
Initiation and continuation of methamphetamine use: missed opportunities 165
Methamphetamine and mental health: intoxication, withdrawal and psychiatric illness 168
Methamphetamine addiction: treatment and outcomes 169
Conclusion 170
Acknowledgements 171

16 Public Health and Dual Diagnosis 176
Linda Bailey
Introduction 176
Epidemiology 176
Causal relationship 178
Treatment for BBV 180
Other co-infections 181
Conclusion 183

17 Comorbidity or Complexity: A Primary Care Perspective on Dual Diagnosis 186
John Budd
Introduction 186
Policy framework 188
Epidemiology 188
Key features of general practice care 190
Physical health care 191
Mental health and substance misuse care 192
Limitations and potential in primary care 193
Conclusion 194

Part 3 International Perspectives, Policy and Development 197

18 Dual Diagnosis – North America 199
Theodora Sirota and Kathleen Leo
Introduction 199
Prevalence 199
Historical context 200
Socio-cultural and public policy considerations 201
