### Index

- **Equations of state**, 73
  - Parameters, 74–78
- **Equilibrium data types**, 79
- **Excess free energy**, 76
- **Execution sequence**, 191
- **Extract block**, 173
  - Media Ch. 11, ExtractionExample
- **Extractive distillation**, 211–212
  - Effect of solvent concentration, 213
  - Solvent selection, 212
- **Flash2 block**, 104
  - Entrainment, 102–103
  - Media Ch. 7, Flash2Example
  - Specifications, 101
- **Flash3 block**, 104
  - Descriptive equations, 104
  - Key component, 105
  - Media Ch. 7, Flash3Example
- **Flash curve**, 25, 165
- **Flowtran**, 1
- **Fortran**, 58–60
  - Accessible variable, 61
  - Association of flowsheet variable with a Fortran variable, 62
  - Defining a Fortran variable, 62
  - Interpreted Fortran language rules, 58–60
  - Media Ch. 5, mixer5d
- **Fsplit block**, 35
- **Fugacity**, 73–74, 100, 105, 135
- **Gilliland correlation**, 163
- **Gmehling, J.**, 77
- **Graphic user interface (GUI)**, 13
- **Heater block**, 118
  - Media Ch. 9, heaters
  - Modeling a heat exchanger, 119–120
- **Heat stream**, 94, 118, 119–120, 126
- **Heatx block**, 122
  - Detailed design, 124, 128
  - EDR browser, 125
  - Exchanger Design and Rating (EDR), 117–125
  - Media, ch. 9, B3shellandtube
  - Options, 122, 123
- **Henry's law**, 74
- **Infinite dilution**, 31, 83
- **Initial values**, 53, 76, 83, 230
- **Joback's method**, 29
- **K**
  - \( k_{ij} \) parameter, 75
- **L**
  - **Linear least squares**, 78, 86
  - **Line search**, 227
  - **Liquid-liquid equilibrium**, 74, 79
    - **Mixed binary and ternary data**, 86
- **M**
  - **Manipulator blocks**, 40
  - **Material balance only calculations**, 14, 52
  - **Mathematics of regression**, 80
  - **Maximum likelihood**, 79, 80, 82, 86
  - **McCabe-Thiele method**, 156–160
    - **Minimum number of stages**, 159, 163, 198
    - **Minimum reflux ratio**, 158, 162, 163
    - **Side streams**, 150, 152–154
  - **Mcompr block**, 113
    - Media Ch. 8, mcompr
  - **Mheatx block**, 118
    - Media Ch. 9, mheatxexample
    - Zone analysis, 126–127
  - **Mixer block**, 37
    - Media Ch. 5, mixer5
  - **Mixing rules for equation of state**, 75
  - **Model execution**, 17
  - **Model palette**, 35
  - **Mult block example**, 42
  - **Mutual solubility**, 86
- **N**
  - **Navigation pane**, 6
  - **Newton-Raphson method**, 80
  - **Next function**, 6
  - **NIST TDE**, 91
    - **On-line data**, 91
  - **No heat balance**, 36
  - **Nonlinear equations**, 70
  - **NRTL (Renon) equation**, 77
    - **C parameter rules**, 82
  - **Numerical derivatives**, 49
- **O**
  - **Objective functions**, 79, 82, 197–198
    - **Fortran example**, 200
  - **Object manager**, 17, 25, 50, 171
  - **Onken, U.**, 77
  - **Optimization**, 197
    - **Algorithms**, 198
    - **Constraints**, 197
    - **Range**, 197
  - **Media Ch. 13, ExampleOne**
    - **Setup**, 199–201
